ARE YOU A UNION MAN? YOUR ACTIONS ANSWER
Mr. Editor: I desire to see some of your valuable space to place a picture before the eyes of the union men in this city, which even if they are acquainted with it, they apparently have failed (as a whole) to realize the horror features, and have not striven systematically to change those revolting features to a picture of art.

tax for private benefit. It is only in living on the land that we should share the benefits from the land value. For it is by the aggregation of population that calls for improved conditions that causes the land value. Single Tax is not only a means to no new machinery to put it into operation. But into operation and factories would spring up. Wages would rise, better things and more of them, than under the present system of taxation.

Mr. Kerr went on to say that government should tax for government, not for profit; that alone is wise, which is just. He explained the rights of ownership thus. An individual takes from the earth some clay, moulds a brick; that brick is his; his labor produced it. Nature knows no other right than labor.

Mr. Roback was introduced by the chairman as the silver-tongued orator, and he certainly made a good impression. Mr. Roback said that he was glad to see so many young men, because it was they who were to carry on this great reform. He said that he was glad to see the future, and more than glad to see the old men in attendance, because the young men look to them for counsel. Single Tax was the first principle of Socialism; it was a principle that had to be first adopted before Socialists would realize their golden dream.

THE DEAR PROFESSOR!
A better example of the up-side-downness of the university point of view regarding political economy could not be desired than that which Prof. Seligman, of Columbia, exhibited in his paper before the American Economic Association last week.

land that is abolishing slavery, as an economic system, is there much to be thankful for? Slavery can be abolished because that change forces "free" labor to work for less than the cost of slave labor, which is but another way of saying that it abolishes slavery by substituting one form of slavery for another. Is this anything to boast of?
