**NEW MILE RUNNER FOUND.**  
Yale has been lucky in finding a mile-runner ready made. He is W. J. Hall, a divinity student, from Japan, who is a veteran and distance man. He has won the event at the two practice meets held at the Yale field this spring. Waldron, Stevens and Jacobus were all point-winners in the dual meet against Harvard last year, and they are in good form this spring.  
Fanchot should win the two-mile event with ease in both the Harvard dual games and the intercollegiate. His present form shows that he is close to record time. Burnstead, Donahue and Van Tassel are promising dark horses. The rumored withdrawal of the crack Harvard hurdlers, Scheuber and Con-

verse, from the track team, has given Yale stock a boost in those events. Clapp, Mers, Milburn and Capt. Thomas are making the best showing in these at any Yale set of timber-toppers has shown in years. Clapp's friends have always maintained that in taking third place last year he did not do himself justice.  
Yale's best high jumper will be G. F. Victor, who should better six feet before the season closes. He was shut out from competition by a scholarship technically. Duval and Jack are doing five feet nine inches in practice. In the broad jump Fulton and Bodman have marks of 22 feet. Fallows, who made 22 feet four inches last year, has been doing practically no training. Bowman, the baseball pitcher, has a preparatory school record of 22 feet, and he may be pressed into service for the intercollegiate meet.

## FROM AUSTRIA.

Many Immigrants are Now Coming to Canada.

VIENNA, April 21.—The social economic committee of the reichsrath has presented an interesting report to the government on the subject of immigration. The committee points out that this question is one of great urgency, saying that in the ten years ending 1890 and 1870 Austria lost through emigration 2,000 persons annually, and this number had increased to 45,000 persons in the year 1902.

The committee notes that a large portion of the recent emigrants is going to Canada. This is particularly true in the case of the Bohemians, who in North America is now so large that it is probable an independent Greek-Catholic episcopate will be established either in the United States or Canada to minister to their spiritual wants.

## HERE'S A ROAST.

"FILIPINOS, If Plucky, Could Seize Manila"

Englishman Says Officers Neglect Things and Drink—Complains of Red Tape.

BOSTON, April 21.—"A half hundred plucky Filipinos could seize Manila near capturing Manila such is the condition of American affairs there," said Chief Officer A. H. Brown of the British steamer Roseley, Captain Robertson, who just in from Manila and Cuba, with a cargo of hemp.

"All stories are flying about the city of the actions of American officers," he continued. "Generals and lieutenants, I was told, spend their time drinking at the hotels and many of them are carried off to bed every night completely stupefied, so that, if an attack was made they could not resist it."

Mr. Brown had been speaking with some bitterness of the strictness of the regulations at Manila when the subject of the American army was the port regulations at Manila, when introduced.

"Everybody out there seems to be trying to feather his own nest," he said, "to the detriment of his official duties. The Filipinos could take the city if they had the courage."

"But the rebellion is over," said the reporter.

"Over! Why, you ought to see the Manila papers. Every morning they are full of reports of horrible murders and mutilations. I don't think you will ever subjugate that people. They profess the best of feelings for Englishmen, Germans and even Spaniards, but they hate Americans. Why, in Cebu, the last port we touched at, we heard of the murder of two American school teachers. The sort of thing is going on all the time."

"The hotels at Manila are very bad. I know a man who stopped at the best one, the Oriente. At the end of the week the clerk said to him:

"'Sir, you had two pieces of soap this week."

"The city is as dirty as when the Spaniards had it. You have not improved in anything. A filthy river giving out a foul stench runs through the middle of it. And the port! No one can go aboard a vessel after 5 o'clock at night. The captain was detained one night until a few minutes after 5, and had to go to a hotel. It would have cost him too much money to get permission to go to his ship."

"We have a customs man on board the boat. The mosquitoes bothered us so that the steward went ashore for some netting to put across the window. They wouldn't allow it to be brought on board without his first going through and inspecting it."

The officer even refused to let the captain bring some flowers which were given him aboard. But he made no objection to our taking whiskey on. Manila is the worst port I ever was in."

### THE STOCK EXCHANGE.

NEW YORK, April 22.—Members of the New York stock exchange abandoned business today for the dedication of their handsome new building. The ceremonies were arranged to begin at 11 o'clock with prayer followed by speeches from Mayor Low and President Keppeler of the Exchange. The board room was a bower of flowers while along the side seats were arranged for the invited guests, including men of finance known the world over.

It is just two years since the work of tearing down the old building was commenced. During that time the stock exchange members have occupied the old Produce Exchange floor. It was expected that the work would be completed within a year, but the difficulties were greater than the architects and contractors had counted upon. The building, which looks small beside the neighboring skyscrapers, presents a striking appearance with its massive and beautifully carved stone pillars and decorations. The interior has been arranged for the comfort in every way possible of the members. An impregnable vault was built for the safety of securities, the heating, cooling and ventilating arrangements are perfect. The board and other rooms are large and beautifully decorated.

The new building fronts on Broad street and extends through to New, with an opening on Wall, as in the old exchange. It was found necessary to go forty-two feet below the level of Broad street. Caissons were built on solid rock and a wall of cement was thrown about the whole foundation. Vaults for safe deposit Companies and for the cooling and heating of the building are in the cellar. The main board room is 144 by 160 feet. The ceiling is 74-1-2 feet high.

The luncheon club and offices of the exchange officials are on the floors above. The members save these for the first time today.

## WISE WORDS.

Prof. Robertson Addressed Members of Legislature.

In the Interests of Manual Training and Consolidated Schools in this Province.

FREDERICTON, April 21.—Prof. Robertson, of Ottawa, addressed the members of the legislature this afternoon in the interests of manual training and consolidated schools. He advocated an increased expenditure for public schools, particularly for consolidated schools and for special courses of instruction in the Normal school and university whereby farmers and other classes could have special instruction in fruit culture and other lines. He spoke in complimentary terms of the school systems of the United States. He had recently visited the consolidated schools in Ohio and Iowa and their present status there more than justified the expectations of the friends of the system. He asked the legislature to grant twenty thousand dollars per year towards the establishment of such courses as he had outlined in connection with the normal school and university. The present system of education tended to take our sons out of the province. He advocated a system which would educate the head, the hand and the heart. The address was listened to with great attention by a large audience.
