To the Editor of the Star:

Dear Sir,—It would be a satisfaction to many of the inhabitants of the western portion of our city if they were given some information regarding the drinking water supplied to their houses. For some time past the water has been extremely muddy. The writer keeps a flannel cloth on the drinking tap. this has to be washed every day, and the mud that comes from it is almost black. People in general prefer to drink water unadulterated with sand, etc.

Trusting that the superintendent of water works will give this matter his due consideration, I am, Yours truly, HOUSEKEEPER.

Judge MeLeod, in passing sentence, referred to the fact that a great many offences of this nature have been committed lately, and that the most of them had never been brought to light. It was an inconvenience to merchants to be on constant watch in order to prevent the pilfering of small articles from their stores. The only effectual way to put a stop to this pilfering would be when persons were found guilty of the offence to subject them to merited punsishment. He could very easily send Mrs. Bailey to the penitentiary for a period of years, but taking into consideration the fact that she was a mother with a young child and a husband at home, he thought the ends of justica would be served by imposing upon her suspended sentence. He would therefore not send her to prison, but would let her go upon her entering into the rown recognizance to appear within the next twelve months if needed.

GRAIN FREIGHTS REDUCED.

Canadian Competion Forces American Lines Down—Rate From Chicago to N. Y. 4 1-4 Cents.

NEW YORK, June 30.—A reduction in eastbound grain rates has been agreed upon by the Atlantic coast trunk line railways. It will take effect tomorrow and is made to equalize the rates prevailing on Canadian lines. The export interests of New York, Boston, Philadelphia and Baltimore will be thereby put in a position to compete with the Canadian grain dealers. By the new tariff also grain for Buffalo is placed upon a three cent basis. This is a reduction of one cent per bushel on wheat and flax, 3-4c. per bushel on corn and 1-2c. per bushel on barley. No reduction is made on oats, because the export movement is limited. A reduced rate on wheat means that grain can be brought from Chicago for 4 1-4 cents, counting floating elevator charges of 7-8 cents per bushel and can be placed on board ship for a 1-8c.
