

G. EUSTACE BURKE

Writes on the Advantages of Canada-Jamaica Trade

And Shows How Much Good Might be Derived From a Proper Direct Steamship Service.

G. Eustace Burke, commercial agent for Canada in Jamaica, writes to the Jamaica Daily Telegraph as follows: It will hardly be denied that the government, the elected representatives of the people, and the country at large, are not only desirous, but anxious for an appreciable development in trade exchange between this and the Dominion of Canada. It is further recognized that it would be a material economical move of the first importance to endeavor to cultivate a direct Canadian demand for the island's fruit and products generally, and bananas more so in particular, one of the features being that, practically, today all outside shippers and growers are debarred from participating in the advantages which the Canadian market offers as a source of remunerative output.

Again, it is freely conceded that to bring about the desired consummation it would be necessary that there should be an additional steamship service with frequent sailings, and equipped on modern lines, making direct quick passages.

At every turn, however, one is met with the stock hackneyed averment that while the matter is certainly of paramount importance to producers, whereby Jamaica can pay her fair share towards a substantial subsidy, and as this is the only means by which producers and the country generally can ever hope to have a "finger in the Canadian pie," nothing progressive must be looked for in the near future.

Will any one venture to say that the present or future outlook for 1939 is any better than today? Or, is there nearer solid uncontestable ground with all the hurricanes and droughts that have afflicted the island since the year 1900, than there is now? In regard to the question of subsidizing the line of vessels for such a service the Canadian government is now in the habit of being approached upon the matter.

Later, it may be so! I am, etc., G. EUSTACE BURKE, Commercial Agent for the Dominion of Canada in Jamaica.

COMING SURE. Dr. Pugsley Announces That New Brunswick Will Obtain Share of Fishery Award.

Dr. Pugsley said last night, with reference to the fishery award, that the claim will be pressed, and we will get it. You may say that, speaking to me on the subject, I said that there is every indication that our efforts will be successful. As regards the transfer of all our fisheries to the Dominion, that is a matter to be considered further, and there will of course be a compensation to be agreed upon.

Sick Stomach Is working-- Sick Owner is Idle

DR. VON STAN'S PINEAPPLE TABLETS

which digest your food and rest your stomach. You want relief and cure. Pineapple relieves at once and cures quickly. No stomach can be cured except it can rest while digestion goes on safely. The patient eats heartily while taking his cure. It strengthens the weakest stomach.

Pineapple is nature's simplest and quickest cure--Price, 35c.

In five minutes after using Dr. Agnew's Catarrhal Powder the healing has begun, and it continues till the work is quickly complete.

Another fact: signs are not wanting that Canadian food products and manufactures, if slowly, are at least sure, making themselves appreciably felt on the market. Nor is the industrial products also most particularly desired to place here, of so perishable a nature as to require very rapid transportation facilities.

In the words of that profound thinker, Dr. George Parkin, LL. B., C. M. G., as appeared in the Gleaner of the 30th ulto: "Canada is going to grow very largely, and become very ambitious, and conscious of a very great future before it. Of this there are no intelligent opinions."

I would have it distinctly understood that this communication is not intended to criticize the executive or methods of the administration, nor yet to censure the lethargy of those whose material interest should at least inspire them to push the matter, for it is neither my right and less my inclination, but rather it is intended, essentially, as a note of warning.

Dr. Pugsley said last night, with reference to the fishery award, that the claim will be pressed, and we will get it. You may say that, speaking to me on the subject, I said that there is every indication that our efforts will be successful.

CHARLOTTETOWN, May 31.—Premier Peters returned last night from Ottawa, where he had a conference with Sir Wilfrid Laurier and other members of the cabinet respecting the island's claim to a share of the Halifax fishery award and other matters. It was decided to submit to a board of arbitration the following: Fishery awards, increase in provincial subsidies, and the transfer of all our fisheries to the Dominion for a consideration.

It may, however, be said that at the legislative session of 1903 the sum of \$2,500 was voted, and Mr. Olivier declared that to make the best arrangement with the Canadian government to relieve the desired end.

AT ACADIA.

Fine Weather Makes Convocation Most Enjoyable.

Wolfville Thronged With Visitors, and Exercises Attract Much Attention.

WOLFVILLE, N. S., May 30.—A bright Sunday, full of the brightness of early summer was succeeded by a most delightful evening with the moon at its full.

The assembly hall was again crowded to the doors by friends of the institutions to hear the address before the college Y. M. C. A. The music was very inspiring under the direction of Prof. Maxim.

The public closing exercises of the Academy took place on Monday evening in College Hall, and were largely attended. The faculty and students marched in to the strains of Schubert's "March," played by Miss May.

An interesting feature of the closing exercises is senior class day at the Academy, which was held on Saturday afternoon in Alumnae Hall. Admission was by invitation, which took the form of exceedingly dainty programs in cream paper.

A very delightful reception was held at the home of Mrs. J. R. and Mrs. Trotter on Monday afternoon. A large number availed themselves of this opportunity to pay their respects to the president and his estimable partner.

Wolfville is crowded to its utmost with friends of the institutions, and among the distinguished visitors is the Hon. H. R. Emmerson in his official private car from Ottawa, here on account of the graduation of his son, Henry Reed Emmerson.

HORTON COLLEGIATE ACADEMY. Horton Collegiate Academy is one of the oldest of the higher institutions of learning in the maritime provinces. For over 74 years it has maintained a continuous record under successive principals for high class training in the fundamentals of a liberal education.

We offer \$1,000 for a disease germ that Liquozone can't kill; and most of the sick are sick because of germs. One bottle free.

We have purchased more than a million 50c bottles of Liquozone and given them free to the sick. During the past four months we have spent over \$50,000 to announce and furnish this offer. We have done this to convince the sick that Liquozone does what medicine cannot do, and we are willing to do the same with you, if you need it.

Liquozone is the result of a process which, for more than 20 years, has been the constant subject of scientific and chemical research. Its virtues are derived solely from gas-largely oxygen—by a process requiring immense apparatus and 14 days' time.

Liquozone is so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it cannot kill. The reason is that germs are vegetable; and an excess of oxygen—the very life of an animal—is deadly to vegetable matter.

50c. Bottle Free.

If you need Liquozone, and have never tried it, please send us this coupon. We will then mail you an order on your local druggist for a full-size bottle and we will pay your druggist accordingly for it. This is our free gift, made to convince you to show you what Liquozone is, and what it can do. In justice to yourself, please accept it today, for it places you under no obligation whatever.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquozone kills the germs, wherever they are, and the results are inevitable. By destroying the cause of the trouble, it invariably ends the disease, and forever.

BIG SYDNEY STRIKE HAS BEEN DECLARED.

Eighteen Hundred Men Have Quit Work-- Would Not Even Open Messages from Directors.

HALIFAX, May 31.—A strike was declared upon the plant of the Dominion Iron and Steel Company at Sydney tonight, and tomorrow morning one thousand eight hundred men will be idle.

The men held a mass meeting tonight, when over six hundred men were initiated into the P. W. A., their labor organization. Great enthusiasm prevailed throughout the proceedings, and the declaration of a strike was received with rousing cheers.

The men say they are determined not to yield but will stay out until their demands are acceded to. The day shift ceased work with the six o'clock whistle, and at midnight the night shift came out. At that hour the picket line was on duty, and tomorrow morning it is expected not more than a dozen men will enter upon the plant.

The strike is bound to have a great effect on business interests in Sydney. The outcome of the negotiation of the steel company and department. The strike is bound to have a great effect on business interests in Sydney.

JILTED AFTER LONG ENGAGEMENT. NEW YORK, May 31.—Miss Nellie M. Hunter, who lives at No. 2,465 Broadway, has begun an action in the supreme court against George B. Hulme, claiming \$50,000 damages for breach of promise.

Incident in Boston Which Somewhat Resembles the One in St. John. BOSTON, June 1.—This city had an unfortunate child-birth case last night, similar to the one which was chronicled some time ago in St. John.

ABOUT ETHEL STEEVES. F. B. Ingraham Will Adopt the Child. BOSTON, June 1.—After a bitter contest in the Plymouth county courts, Francis B. Ingraham of Wellesley has been granted the right to adopt Ethel Steeves, young daughter of Winthrop Steeves of New Bedford, formerly of St. John.
