They were cultivated early in the season till about the 6th of July, when the ground was sown with crimson clover, so as to prevent a late and immature growth of wood, and also to serve as a cover crop till next spring, when cultivation will be resumed. The experiment will be watched with interest, and it is hoped will lead to the more general culture of the larger fruits, to which it will no doubt be found that this province is better adapted than is generally supposed. Filed the Story of the Movements of the Forces Around the beleaguered City—A Costly Despatch.

An interesting story of how news is sent from the seat of war is told by the Associated Press in connection with a despatch from Port Arthur on November 2, and wired to the newspapers by the Associated Press on November 3. The despatch gave a complete review in chronological order of the movements of General Nogai's forces about the beleaguered city, and was the first authentic and direct message to the outside world from the headquarters of the final Japanese army, preparing for the final assault upon Port Arthur. It was the longest cable despatch which the Associated Press has ever received during the present war, and one of the largest it has issued during its existence as a news medium.

The despatch was filed at Chefoo by W. Richmond Smyth, a Canadian newspaper man, who was designated to accompany the third Japanese army to Port Arthur about six months ago. In the skeletonized form in which it required 14 hours in transmission, practically monopolizing the trans-Pacific cable during all that time, and cost the Associated Press \$1,753.

Psychine, sold for years at \$1.50 per bottle, is Now Sold at \$1.00

Psychine is for all vocal troubles, and is proving a great blessing to public speakers, singers, and all voice workers. In all unhealthy conditions of the throat or lungs there is soreness or inflammation, caused by imperfect nutrition, and a clogged condition of the blood vessels of the organs. This is also the condition in catarrhal affections. Needless to say, this has a most injurious effect on the vocal organs. Psychine being the greatest specific for blood purification, its effect in such disorders is prompt and effective. Although the trouble may be but trivial, yet it is in the throat that serious lung and stomach diseases have their beginning, and it is well to start treatment with Psychine at once. There is no more actual remedy for hoarseness, throat irritation, or speaker's sore throat, or throat affections common to voice workers than Psychine.
