

NOTHING succeeds like success and one of the best evidence of any business is the growth and development of its product emanates. Above we show a photographic illustration of our Laboratory. From one small room we have grown to a large fire-proof structure you see above, covering over 16,000 feet of which is devoted exclusively to the manufacture and marketing of our business. We are now one of the very largest proprietary manufacturing concerns in Canada, which is conclusive evidence that our goods have universal acceptance.

In presenting you with our latest Dream Book, we are gratified by the response of our many readers, who appreciate our efforts on behalf of the public. The past rings with the Testimonies proving the merits of our products, a number of which are presented in this Book.
