

the chapter on Geology, but also the task of editing the whole work.

Dr. E. B. Delabarre, Professor of Psychology at Brown University, accompanied Dr. Daly on his journey along the coast, and has described the flora from an ecological point of view as most likely to be of interest to the average reader. His exhaustive list of plants has been omitted from the book, but is preserved at Brown University.

Dr. C. W. Townsend of Boston and Mr. G. M. Allen, who have written on the ornithology, made a special journey to Labrador to study its birds. Dr. Townsend has already published a book entitled *Along the Labrador Coast* as a further result of their expedition.

Mr. Charles W. Johnson, Curator of the Boston Society of Natural History, has undertaken the insects (Mr. John Sherman, Junior, expert on the beetles, has described this special group) and mollusks from a collection of Mr. Owen Bryant of Harvard, made in 1908.

Mr. Outram Bangs has supplied the list of mammals. Miss Mary J. Rathbun, the well-known expert at the United States National Museum at Washington, supplied all the information we have about the crustaceans, including a study of those collected by Mr. Bryant.

Dr. A. P. Low, Deputy of Minister of Mines in Canada, has contributed a chapter on the interior of this little-known land.

Mr. William B. Cabot of Boston, who for several years has made an annual visit to the Montagnais Indians of Labrador, and who has edited a dictionary of their language, has had unique opportunities for observing their habits. He has contributed a valuable monograph from his special experiences.
