

CHAPTER VI.

DIGESTION: IN THE STOMACH.

Mechanism of Secretion of Gastric Juice—The Active Constituents of Gastric Juice—The Movements of the Stomach—The Opening of the Pyloric Sphincter—Rate of Discharge of Food from the Stomach	60
---	----

CHAPTER VII.

DIGESTION: IN THE INTESTINE.

Secretion of Bile and Pancreatic Juice—Functions and Composition of Pancreatic Juice and Bile—Chemical Changes Produced by Intestinal Digestion—Bacterial Digestion in the Intestine—Products of Bacterial Digestion—Protection of Mucous Membrane of Intestine Against Autodigestion—Movements of the Intestines—The Absorption of Food—Resumé of Actions of Digestive Enzymes	71
---	----

CHAPTER VIII.

METABOLISM: ENERGY BALANCE.

Introductory—General and Special Metabolism—Energy Balance—Caloric Value of Foods—Basal Heat Production—Influence of Food, Muscular Work, Atmosphere, and Size of Body.....	83
---	----

CHAPTER IX.

METABOLISM: THE MATERIAL BALANCE OF THE BODY.

Starvation-Nitrogen Balance—Protein Sparing—The Irreducible Protein Minimum—Varying Nutritive Values of Different Proteins	91
--	----

CHAPTER X.

THE SCIENCE OF DIETETICS.

The Proper Amount of Nitrogen—Chittenden's Experiments—The Most Suitable Diet for Efficiency—Chemical Composition of the Common Foodstuffs	99
--	----
