

## FORESIGHT Means PROVIDENT CARE FOR THE FUTURE.

Is it foresight to waste money on a flimsy Cream Separator because it is a little lower in price? It may skim for a short time, soon gets out of repair and is ready for the scrap heap in a year or two.

"Care for the future" means select the **strongly-built MAGNET** Made by the Cream Separator Specialists, **The PETRIE MFG. CO., LTD., HAMILTON**

Whose great success has been attained by building this Cream Separator superior in every way to all other separators. Do not take our word for it but compare it, point by point, with any or all Cream Separators, and you will find each part in the MAGNET stronger and better adapted for doing the work for years than the parts in any of the others.

Here are the points:

- 1st. The square gear construction.
- 2nd. The strong and rigid frame.
- 3rd. The double supported bowl. MAGNET Patent.
- 4th. The skimmer in one piece, takes out all foreign matter, leaving perfectly pure cream.
- 5th. Perfect skimming, the advertised capacity.
- 6th. Easy turning. Children operate it.
- 7th. Easy cleaning. Clean within five minutes.
- 8th. Change of capacity in the same stand for a few dollars.
- 9th. Perfect brake. Saves time. MAGNET Patent.
- 10th. Sanitary strainer, on each tank, MAGNET Patent.
- 11th. Safety. All parts covered.
- 12th. Skims standing on the ground or any floor.

Our **GUARANTEE** covers each and every point. Send for catalogue.

Free to every Dairyman. Dept., E. under the management of a graduate, will answer all enquiries in regard to Dairying, free.

Our 12 years' experience as Dairy Specialists is at your disposal. We can, and will help you.

**F. W. EWING, SALEM P. O., ONT., ELORA STATION.**

### QUESTIONS AND ANSWERS. Miscellaneous.

#### ADDRESSES WANTED.

Will you please give Andrew Carnegie's and John D. Rockefeller's addresses?  
SUBSCRIBER.

Huron Co.

Ans.—The address of Andrew Carnegie is Skibo Castle, Sutherland, North Britain; that of John D. Rockefeller, 4 W. 54th St., New York, or Warwick, Rhode Island.

#### LAMPAS.

I have a mare four years old that I think has lampas. The flesh in the upper part of her mouth hangs down below her front teeth.  
F. A. J.

Ans.—Lampas is simply a congestion of the gums from irritation of teething. Horses over five years old are not troubled. As a rule, it is better left alone. In severe cases, such as the one inquired about, it is well to have a competent veterinarian scarify the swollen parts slightly with an ordinary lancet. The bleeding will relieve the congestion. Do not cut further back than the second bar, else dangerous bleeding may result.

#### CORN FOR SILAGE.

1. I am sowing seven acres of corn for to put in silo. I am going to plant three feet apart in rows, and sow with a drill. Do you think Canadian-grown corn would mature earlier than the American corn we get out of our seed stores?  
2. Do you know anything about Gold King corn, or White-cap corn?  
SUBSCRIBER.

Ans.—1. Corn from Canadian-grown seed will, generally speaking, ripen earlier than American corn of the same variety, and Canadian seed is nearly all of earlier-ripening varieties than what comes across the line.

2. White-cap Yellow Dent is a great favorite in Southern Ontario, where it is grown for the grain, which ripens thoroughly. It is one of the earliest-maturing of the Dent varieties. The Bailey Dent is another excellent corn. The flint varieties, such as Compton's Early, King Philip and Longfellow, ripen considerably earlier. Gold King corn is not known to us by that name.

#### WHITE FLIES ON HOUSE PLANTS.

Will you tell me what to do to kill those little "white flies" that infest house plants. I have seen treatment given for them in greenhouses, but could not tell from it how to apply for a few house plants. What will kill green lice on Cinerarias? I have a lot of nice plants blooming, and cannot keep them free from lice; they are on the leaves and among the bloom.  
MRS. W. B. F.

Ans.—There is no insecticide at present in use that will effectually do away with the small white fly that infests house plants which is suitable for amateurs to use. Sprinkling the plants well on the under side of the leaves with strong, soapy water frequently, and dusting the plants with soft-soot, wood ashes, or flowers of sulphur, while damp, will help to keep them down, as they do not like moisture. Sulpho tobacco soap, sold at large seed stores, is also a partial remedy. Fumigating with potassium cyanide is the most effectual way of getting rid of this pest, but this cannot be carried out in a dwelling-house on account of the deadly nature of its fumes.

Sulpho tobacco soap, or a solution of any of the nicotine preparations sold at seed stores, and spraying the plants with cold water, will keep down the green lice or green fly. It is very difficult to kill green fly on Cinerarias when once the plants are badly infested. Fumigating the plants with tobacco smoke is also a good remedy. Cinerarias are not good house plants.  
WM. HUNT.

First Jack Tar (to shipmates, who have hired a very small cart and a very large horse)—"Ow are ye goin' to see where ye're goin' with that there elephant in front of ye?"

Second Jack Tar—"That's all right, mate. Bill 'e's goin' to keep a look out to starboard, I'm goin' to look out to port, and the 'oss 'as got to look out ahead!"—Punch.

## BARN ROOFING

The "Eastlake" Steel Shingle is the only absolutely weathertight shingle on the market. Let us tell you why. A shingle to be proof against the severest storms must have at least a three inch overlap. The

### Eastlake Steel Shingle

is the only shingle that has that much. The so-called four-lock shingles have only an inch and a quarter overlap—not enough to keep out the drifting snow and rain, so this proves the "Eastlake" the only waterproof shingle. The roofing problem solved. Our free booklet, "Eastlake Metallic Shingles," tells how.

"Eastlake's shingles can be laid in one quarter the time it takes to lay a four-lock shingle."—The Philosopher of Metal Town.
