

IMPORTED PERCHERONS

THE FIRM OF HAMILTON & Hawthorne, Percheron Horse Importers, at Simcoe, Norfolk Co., Ont., having been dissolved, the business of importing and breeding high-class Percherons will in future be carried on by Robert Hamilton & Son, of the same place, more extensively than heretofore. With that intention, one of the firm will leave

for France on June 22nd for an importation of registered Percheron stallions and mares—about 20 of each, which will include none but those of the highest class, and will be the best ever brought to Canada. Percherons are fast gaining favor where best known, and are the best all-round farm and draft horses in the world, being good tempered, good feeders, compactly built, clean boned, strong and active. Intending purchasers will do well to wait until they have a chance to see our new importation.

Robert Hamilton & Son
SIMCOE, ONTARIO.

UNION STOCK - YARDS Horse Exchange WEST TORONTO, CANADA.

The Greatest Wholesale and Retail
Horse Commission Market.

CRUICKSTON STOCK FARM, GALT, ONTARIO

The services of any one of the following high-class stallions can be secured for approved mares by applying to the manager, **Mograzia**, Champion Standard-bred Stallion; **Bingen Pilot**, by Bingen, 2094; **Jim Tod**, by Tod, 2144, also sire of Kentucky Tod; **Crayne Mikado**, Hackney stallion, Champion at Chicago International, and the Canadian National, Toronto; **Baron Howes**, Champion Clydesdale stallion, considered by expert judges to be the best Clydesdale stallion in America. For all particulars, apply to

JAS. WETHERILL, Manager, Galt, Ont.

CLYDESDALES AND FRENCH COACHERS

We have still on hand a few choice Clydesdale Stallions, all young, that for size, style and quality will stand inspection. We have also a few Clyde fillies, imported and Canadian-bred, and two French Coach stallions. Correspondence and inspection invited. Our prices are easy and terms to suit. Phone connection.

R. NESS & SON, HOWICK, QUEBEC.

WAVERLY CLYDESDALES AND HACKNEYS

My 1910 importation of Clydesdale stallions and fillies, and Hackney stallions and fillies, are now in my barns. One and two-year-old Clyde fillies of a character and quality never before excelled. My Hackney stud was never so strong in high-class animals. All are for sale and prices right. **ROBT. BEITH, BOWMANVILLE, ONT.**

IMPORTED CLYDESDALES AND HACKNEYS

In my stables at Ingersoll, Ont., I have always on hand Clydesdale stallions and fillies, and Hackney stallions, personally selected in Scotland for their high-class type, quality and breeding. Let me know your wants.

W. E. BUTLER, INGERSOLL, ONT.

IMPORTED CLYDESDALE FILLIES

I have still on hand six Clydesdale fillies. They are big, smooth fillies, exceptionally well bred, and their underpinning is the kind Canadians like. I have only one stallion left, a right good one. My prices are as low as any man's in the business. Phone connection, right good one. **GEO. G. STEWART, HOWICK, QUEBEC.**

Ormsby Grange Stock Farm, Ormstown, P. Quebec.

Importation and breeding of high-class Clydesdales, a specialty. Special importations will be made for breeders at minimum cost. My next importation will arrive about July 1st.

Duncan McEachran.

QUESTIONS AND ANSWERS. Veterinary.

ECZEMA.

The hair comes off my three-year-old mare in spots, and comes on again a lighter color.

W. H. S.

Ans.—This is eczema. Unless her hair is quite short, clip her. Wash thoroughly every third day with a warm five-per-cent solution of creolin or zenoleum, applied with a scrubbing brush. Give internally 1 ounce Fowler's solution of arsenic in a pint of cold water, twice daily, for a week.

V.

PARTIAL PARALYSIS.

My lambs seem weak in the back, or lack power in their hind legs. After running a short distance, they fall down.

T. H.

Ans.—This is a partial paralysis. Give each lamb 4 grains nux vomica, twice daily, and allow to run on grass. It is hard to say what the cause of the trouble is. Probably it is caused by digestive derangement, but the grass eaten by both ewes and lambs should regulate this.

V.

LAME HORSE.

Horse has been lame since last fall. The muscles of his quarters, from tail to stifle, have become small, and I can hear a click when he walks. I have blistered several times without result.

W. H.

Ans.—I am of the opinion the trouble is partial dislocation of the patella (stifle bone). You do not say where you applied the blister. All that can be done is to repeatedly blister the front and inside of the stifle joint. It would be wise to show him to a veterinarian, to have the lameness definitely located, as my diagnosis may not be correct.

V.

LUMP JAW.

1. Cow has a lump under one jaw, and the root of her tongue is swollen. She cannot eat properly, and she discharges from her nostrils.

R. W.

Ans.—1. This is lump jaw. When the tongue is involved as in this case, it is called "Wooden Tongue." She may yield to the iodide-of-potassium treatment. This consists in giving iodide of potassium three times daily. Commence with one-dram doses, and increase the dose by ½ dram daily until her appetite and thirst fail, tears run from her eyes, and the skin becomes scurfy. When any of these symptoms become well marked, cease giving the drug. If necessary, repeat treatment in two months.

V.

REPEATED BLOATING, ETC.

1. Yearling heifer bloats during the day, and the bloating subsides at night.
2. Give a good blister to cure ringbone, or can it be cured?

3. Where can I get a veterinary book that would help me in staple diseases?

E. B.

Ans.—1. This is indigestion. Purge her with 1 lb. Epsom salts and ½ ounce ginger. Add to her drinking water ½ of its bulk of lime water. If necessary, keep her in the stable and cut grass for her for a week or two during treatment.

2. In some cases, blistering will cure the lameness of ringbone, but in most cases it is necessary to have them fired and blistered by a veterinarian. Two drams each of biniodide of mercury and cantharides, mixed with 2 ounces vaseline, makes a good blister.

3. Veterinary Elements, by Hopkins, sold by this office at \$1.20 postpaid, will be useful to you.

V.

GOITRE IN LAMBS.

I have had eight or nine lambs born with a tumor extending from the angle of the lower maxilla towards the sternum. I am sending you, under separate cover, one taken from a lamb only an hour old. It appears to me like a growth of fibrous tissue, and also malignant.

R. B.

Ans.—The tumor sent me is an enlarged thyroid gland, constituting what is known as goitre, a condition not uncommon in lambs, especially those of ewes that have had little or no grain during the winter, and more especially of those that have been largely fed on roots. In other cases, ewes in a certain locality produce lambs so affected, and the cause is not understood, but supposed by many to be due to water largely impregnated with lime. In some cases the condition proves fatal and in others will yield to the daily application of compound iodine ointment.
