TO EQUIP DEER PARK

Management Decides to Purchase Air

Compressor, Hoist and Pump.

CONDITION OF THE MINE

Shaft Is Now Down 118 Feet, and

Crosscuts Both Ways Are Begun

on the 100-Foot Level—Pay Ore for

the Last Forty Feet.

It will be welcome news to those who are interested in the Deer Park to know that Manager E. J. Kelley authorizes the MINER to state that a complete machinery outfit will be ordered at once for the mine. This will consist of a four-drum compressor, steam hoist and pump.

Bids and specifications are already in for the plant, and it is only a question of time to be cut out at once so the machinery can be taken in and ore can be hauled out.

The mine never before looked so well. The shaft was sunk to a depth of 118 feet when Manager Kelley arrived this week. He immediately stopped sinking and started a crosscut from the 100-foot level, running in both directions from the shaft. The crosscut will be completed as soon as possible, and by that time the new hoist and pump will be in. When sinking will be resumed and the shaft taken down to the 200-foot level.

The recent assays have been very high. The last one made this week from ore taken from the bottom of the shaft showed \$40 in gold, 44 ounces in silver, with a good percentage in copper. The total value was about \$70. The good ore in the mine was first encountered when the shaft was down 74½ feet, and has continued ever since, so that the shaft has already passed through 40 feet of shipping ore. How wide the chute is can only be determined by the crosscut.

A Kick About Express.

Ever since the Dominion Express company transferred its business from an up town office to the Columbia & Western railway depot there has been no end of complaints about the service. We have received three packages of express ourselves since the agency was moved to the depot and in neither case have we received any notice through the mails that a package was there for us. It was only by accident in each instance that we learnt of there being express packages for us at the depot, though some of them had been a week in the office. We find many others making the same complaint and we beg to draw the attention of Superintendent Gutelius to it. If he has no time to inquire into the matter perhaps Mr. Heinze himself will find out whose negligence is causing these delays.
