An Independent Paper on the Politica Situation.

An inquirer in the Montreal Herald asks the editor why he is so positive in his belief as to the decadence of the Dominion Government, why he thinks the Government will suffer at the next elections. The Herald answers in a series of paragraphs, the following of which we commend to the careful consideration of our readers:

which we commend to the careful con-sideration of our readers:

"The propie of Canada believe in honest legislation and honest government. The legislation and govern-ment have for many years been dishon-est and corrupt. The details we have published from day to day. Hence the Government have lost the respect of

many who hoped something better.

"The people believe in government by the people for the people. The practice of this Government has been to enrich its friends and friendly rings out of the public property and by means of tariff legislation. Contractors and others, who have profited by these favors, hold up their hands for the Government, but the people who suffer and are stripped have

people who suffer and are stripped have only indignation and detestation for these who are securging them.

"The people believe in the cost of the food and fuel of the lewest point. The Government have enhanced the cost by the imposition of special taxes both on food and fuel, for the enriching of in-

food and feel, for the enriching of in-dividuals and rings and sections. Hence the disjointent and anger aroused among the working classes.

"The people believe in the rights of the Provinces being respected and in the most friendly inter-Provincial relations being maintained, as a necessity to the continuance of the Union. The Govern-ment, on the other hand, have assailed Provincial relates, withheald the tarritory

well-nigh beside themselves in their eagerness to grasp a portion of the public
property. In fact, the Government is
a Government of a small minority, who
by a strong effort have been able to long
hold at bay their unorganized opponents, but none can longer fail to see that
those who trusted the Government have
been deceived; the public irressurp; see
heen de public credit threatened, and so the defusions of the people are dispelled. It is
doubtful whether the present Prime
Minister will ever venture to lead his
party at another election. He certainly
will not if a favorable opportunity of escape is offered him.
