Great Dramatic Offering at the Nickel

"Cheaper To Marry" More Effective Than Ever As Picture.

While holding all of the intense dramatic appeal of the stage play, the screen version of "Cheaper to Marry," which is now playing at the Nickel Theatre, is far more colorful than Samuel Shipman's original story.

This is because the motion picture takes advantage of wider latitudes, and Robert Z. Leonard, in making this picture for Metro-Goldwyn-Mayer, has brought a lavish production of society and near-society life to the screen.

In addition to an exceptional cast, Leonard brings into this film noted dancers for his safe scenes, and fifty of the most beautiful bathing girls in California to the sequence devoted to showing intimate happenings in an exclusive women's athletic club. Limitations of the speaking stage made such elaborate settings impossible.

The cast includes Lewis S. Stone, Conrad Nagel, Paulette Goddard, Marguerite de la Motte, Louise Fazenda, Claude Gillinger and Richard Wayne. As the cynical Jim Knight, who does not believe in marriage, Lewis Stone adds to his fame as an actor. Paulette Goddard, of "Monsieur Beaucaire" fame, is seen as a modern vampire for the first time, roamed in beautiful creations and jewels. Conrad Nagel, always a capable actor, plays his role with rare accomplishment, as does Miss de la Motte, seen opposite Nagel for the first time.

The comedy is handled most admirably by Louise Fazenda and Mr. Gillinger, while Richard Wayne is the "other man" in the love affair between Mr. Stone and Miss Duval. Frederick and Fanny Hatton are given credit for bringing this powerful Shipman indictment against social radicalism to the screen without a change in the original plot.

At noon the tickets for the Casino-to-night were selling fast. Better make your selection early while the choice is good.—nov.3.11

Government and General Strikes

J. A. S. in the Westminster Gazette—"General strike" is of necessity a revolutionary weapon. It operates by causing or threatening anarchy, and the various plans for mitigating it, when it is once launched, are likely to go the same way as the prohibitions of poison gas in the late war. From the moment it is threatened the Government has an elementary duty to guard against anarchy, and if it considers that special preparations are necessary, it should appeal in its own name to the whole body of citizens and not shuffle off its responsibility on to any outside organization, whose appeal will at the best be sectional and irresponsible. The trade union leaders may think themselves justified in threatening a general strike, but they cannot in reason be aggrieved if the Government meets the threat by straight-forward action in defence of the public. They will, nevertheless, be aggrieved if it shirks this duty and appears to shelter itself behind organizations which have the appearance of organizing one class against another.

MERCANTILE MARINE.

BOSTON, Oct. 28.—Earnings of International Mercantile Marine Corp. in first eight months of 1925 were considerably below last year and although September definitely improved subsequent months probably will lapse into the trend of the preceding, leaving Marine with a substantially larger deficit than in 1924. Deficits after depreciation in 1924, 1923 and 1922 were, respectively, \$2,387,281, \$2,551,728 and \$2,408,061.

On Monday the transaction whereby New York Shipbuilding assets will be taken over by American Brown-Boveri will be completed and a first payment made to stock-holders of Shipbuilding. Terms on which the sale was consum-

mated are \$80 in cash and \$15 in 7 per cent cumulative, preferred of Brown-Boveri for each share of Shipbuilding. Marine is one of the largest holders of Shipbuilding. Its entire participation being probably about 33,000 shares. Cash payment alone would approximate \$1,000,000.

Regardless of final 1925 result, the Street is worried over Marine's inability to earn money on its preferred. Particular attention is called to failure to progress by the enormous gain recently in Agwi's earning power. Because Atlantic, Gulf & West Indies listed issues are second only to those of Marine in prominence on the Stock Exchange, it is sometimes forgotten that the two companies operate under entirely different conditions. The era of prosperity into which Atlantic Gulf has entered is due almost entirely to great expansion in coastal shipping to Florida, and undoubtedly the future course of Agwi's earnings will follow closely developments there.

Marine's difficulties are those of all trans-atlantic lines. There are far too many vessels in foreign trade for the business available.

There appears to be no possibility of betterment in ocean freight business in the near future, and Marine's continued and apparently growing deficits from operations point to the impossibility of retrieving the situation out of larger passenger receipts, to promotion of which the companies have applied themselves diligently. It is the expressed conviction of the best shipping authorities here and abroad that under existing conditions it is impossible to earn normal depreciation charges even with the best management in the world.

Wireless Set With 60 Valves

WIRES AS THICK AS A MAN'S ARM.

RUGBY—On an ebony panel covered with dials, switches, and coloured lights, are buttons that in a few weeks' time will control the world's biggest wireless set, which has the whole Empire within its projected range.

Although the controller who will sit at this board will not send the messages—they will be tapped out in the General Post Office in London—an instrument at his side will tell him what is passing.

With one set of buttons he can issue orders that are written in electric lights in the generating room. His charges are the mammoth machines. The terminals as big as top hats, insulators the size of milk churns and much the same in shape, and cylindrical coils in which a man could sit and have tea are, fortunately, not his concern.

From a switchboard 25ft. by 8ft. the great plant used to make local current suitable for lighting the valves is controlled.

Valves 2ft. High

Another panel nearly 50 feet long, and covered with switches and wheels big enough to control a battleship, is the switchboard from which the three generators yielding the 18,000 volts for the aerial are controlled.

In the spare valve room are hundreds of valves, each two feet high, and the cheapest of a valve running into three figures. Each valve has its own "pedigree card" on which its whole history is carefully kept.

Sixty valves are in actual use on this set, each cooled by water. They are hidden behind eight separate panels, and on each of the eight is a dial telling whether the required water pressure of 46 gallons a minute for each radiator is being maintained.

Perhaps the "wiring up" is the biggest surprise of the whole set. The amateur lifts the lid of his set to display it. At Rugby a visitor is taken to an upper hall built over the set. The wiring is as complicated as that of a home three-valve receiver, but each wire is really a copper tube thicker than the thickest human arm.

They are linked for final tuning to 19 condensers and to the coils. Each condenser is bigger than a piano. And the coils, similar to those adjusted on an ordinary broadcast receiver by a gentle turn of the fingers, can only be adjusted by a turn on a big wheel by a man of normal strength.

The wire used is as thick as a man's wrist, containing so many thousands of other wires that it takes several men several days to make one connection between two ends.

Aggression in Business

London Daily Express: There remains only one way in which we can increase our share of the world's trade. We must abandon our insular aloofness, adopt the methods of good salesmen, and push our goods far and wide by adapting them to the requirements of the different territories in which we seek to do business. We must have young men, men with modern ideas, men with a knowledge of geography and a skill in foreign languages, men who are alive and alert. The young world must be brought in to redress the balance of the old.

The Recall of General Sarrail

Declared Responsible For Death of 3,000 French Soldiers in Syria.

PARIS, Oct. 29.—M. Millerand in the Senate Committee to-day demanded the recall of General Sarrail, French High Commissioner in Syria. He declared that General Sarrail was responsible for the death of 3,000 French soldiers and serious injury to the prestige of France in order to cover the blunder of the party which had appointed him to the post. Persistent reports of the gravest trouble in Syria have developed a most serious feeling in political and official circles. The situation is commented upon vigorously in the lobby of the Chamber, where much impatience is shown at the meagre information received from the High Commissioner. There is insistent demand among the opposition groups for his recall and a rumor was current to-day that M. Briand, the Foreign Minister, had requested that he be relieved of his command.

The Syrian is under the authority of the War Ministry.

The Foreign Office, however, denied this evening that any action had been taken with respect to General Sarrail. Latest developments tend to lessen the danger in the Syrian zone, but opposition deputies have given notice to the Premier that they will insist on a full explanation after the Chamber reconvenes on Tuesday next.

Jamaica Protests Seizure of Ships

KINGSTON, Jamaica, Oct. 22.—(A. P.)—The seizure of two Caymanian schooners and the arrest of their crews numbering 13 by the Columbian Government was brought up in the Legislative Council yesterday. The Government has decided to ask the British Foreign Office to inquire into the circumstances of the case.

The Columbian Government has alleged that the vessels were catching turtles in the prohibited zone, but it is reported that a British warship may proceed to Cartagena, Colombia, to investigate the occurrence.

The Cayman Islands, lying about 200 miles northwest of Jamaica, are included under the Government of that colony.

Melita's First Officer is Again Remanded

Southampton, Eng., Oct. 30.—Thomas Towers, former first officer of the Canadian Pacific liner Melita, charged with the murder of Captain A. H. Clews, the vessel's commander, last week, was again brought into court to-day and remanded until November 5th.

Additional charges were placed against him of attempting to kill David K. Gilmour, assistant chief engineer, and John Holliday, second engineer of the Melita, both of whom were wounded during the shooting, which occurred while the vessel was at Antwerp.

Professional Boxer Knocks Himself Out

(By Canadian Press)

Boston, Mass., Oct. 31.—George Marble, of East Boston, knocked himself out last night and lost the decision in the annals of local boxing.

Marble met John Fitzgerald of the same district, in a bout in the 125 pound class and had the better of the match. He knocked Fitzgerald down once in the first round, drove him in a corner and floored him with a terrific right to the jaw. The impact threw Marble backwards and he fell landing on the back of his head with

Science in Relation to Industry

TORONTO, Ont., Oct. 26.—(By Canadian Press)—S. B. Gandy, President Toronto Board of Trade, has just received from Dr. H. M. Tord, President, Honorary Advisory Council for Scientific and Industrial Research, and President of the University of Alberta, his acceptance of an invitation to introduce the subject of "Scientific Research in Relation to Industrial and Agricultural Development" at the Conference of Boards of Trade and Chambers of Commerce to be held in Winnipeg, Man., on Nov. 15.

John M. Irvine, of the Edmonton Journal and President of the Edmonton Board of Trade, will speak on "Immigration and Colonization—the Need, the Prospects and the Method." The full agenda will include the discussion of a number of important national problems.

Investigation

SOPHS INTO INITIATION PROCEEDINGS.

TORONTO, Oct. 26.—An investigation is being conducted at the University of Toronto into the initiation last week of freshmen of university college in which, it is reported, the freshmen were forced to kiss the entrails of an animal which had been brought from the civic abattoir. The Capus of the university is expected to make a definite statement as to whether or not the president of the Sophomore year will be expelled.

Officials of the student organization, the students administrative council have intimated that it is more than probable that official prohibition will be put on initiations of any kind within the university.

The university college ceremony, last week, eclipsed all past tradition, it is said.

The Age of Noise

London Daily News: The normal healthy man accustomed to city life is no doubt scarcely conscious of what a visitor from the Middle Ages would sound like the infernal din of a lunatic world. He does not become really conscious of the noise until it ceases. But even in the normal man the perpetual pressure on the brain of these terrific manifestations of material energy is apt to produce irritation, sleeplessness, and other early symptoms of neurotic disability. For others they are a sheer torment of the soul as well as a direct menace to their bodily well-being.

Brain and Stomach

Sir Arthur Keith will not allow the young hope of vigor in both stomach and brain. A man, it is his grim creed must choose. Sooner or later inexorable laws demand that he who works his brain shall suffer in his stomach. "Most of us," says Sir Arthur, ruefully, "who take to habitual study have to pay the price." We know that many ill the scholar's life, assail, toll, snore, want, the patron, and the goal, to these, with sympathy profound, we now add an aching stomach. But it is by such confessions that young men will be attracted to the life of scholarship and research? Is this the way to increase the intelligence? Sir Arthur will hardly save the situation by his assurance that he knows "no student who would exchange a regulated brain for the healthy appetite of the mental slug-gard." To call our young men and maidens to a vocation in which they shall learn to disdain a healthy appetite is, we submit, no hopeful enterprise.—London Daily Telegraph.

Sees After 20 Years

DIES WITHIN FOUR HOURS.

BRIDGEBURG, Ont., Oct. 29.—Excessive joy over the recovery of his sight, which he lost 20 years ago through overstudy, caused the death

here, Saturday, of Frederick Clark.

Clark's infinite patience through his years of darkness had been a subject for marvel on the part of his friends, to whom he had always declared he would some day see again.

Quite recently friends and relatives subscribed a fund to enable him to undergo an operation, which proved successful. When the surgeons removed the bandages from his eyes he exclaimed in ecstasy, "I can see again!" Within four hours he was dead.

His death was ascribed to shock following over-excitement.

British Champion to Tour America

NEW YORK, Oct. 29.—Tommy Milligan, of Scotland, welter weight and middle weight champion of the British Isles is planning his second invasion of America. Jesse McMahon, new matchmaker of Madison Square Garden, announced he has signed Milligan for three matches in this country terminating with a title contest with Mickey Walker, world's welter weight champion.
