London, Monday, Sept. 8.

H. M. STANLEY TO LECTURE IN LONDON.

London has a great treat and a great nonor in store in the shape of a visit and lecture by the celebrated African explorer whose fame fills the world-HENRY M. STANLEY.

Apart from Toronto, London will probably be the only other place in Ontario

The lecture will take place on the even ing of Wednesday, Jan 7, next.

All London and all Western Ontario will be at this lecture. A number of our most prominent citizens

have become guarantors, in the sense of subscribing in advance for so many tickets. It is the intention of these gentlemen to extend the list in subscribing-guarantors-all of whom will have the privilege of choice of seats, say two days in advance of the general public.

There is a possibility of the presence in London at the same time of Mrs. Stanley, the accomplished wife of the hero of

We congratulate London on the treat and honor in store.

LONDON'S REFUSE AND THE RIVER. No one has ever suggested that the provisions of the Public Health Act are unary, or that the welfare of the people would be conserved by reverting to the old order of things when neither law-makers nor local authorities paid much attention to the sanitary condition of the munici-

The law provides for the prevention of nuisances, and places it in the power of taxpayers believing themselves to be aggrieved by the negligence of corto take the initiative for down nuisances. Such an corporation, in the regular process of was several years ago indicted for causing a nuisance to residents of London West through the running of the sewers into the Thames and the maintenance of a dam at Springbank. No burried steps were edy matters, as we all know, neither were the courts very exacting in carrying out the law. If we mistake not, carrying out the law. If we mistake not, action on the inding of the jury against the city was practically suspended when the second suit by Mr. Chapman was begun. The anxiety of the authorities not to crowd

The anxiety of the suthorities not to crowd The anxiety of the authorities not to crowd the city into hurriedly devising remedies was thus exemplified, and in the meantime, by s exemplified, and if the Asylum for of life.

Insane here and elsewhere, the Ontario

How, Government has been showing London and other municipalities what can be done to provide effective means for the disposal of Attempts are made to make a political

a report published in to-day's ADVENTIBER. In register to learn the decided yunfair. No Government should be attacked because it is anxious to should be attacked because it is anxious to provide trees for the future by should be attacked because it is anxious to provide trees for the future by the should be a legislature for replanting. In this Province, we have a dished in to-day's ADVERTISER should be attacked because it is anxious to carry out laws enacted by a legislature for the benefit of the whole public. If it is desirable that the pollution of the streams desirable that the benefit of the whole public is the benefit of the whole public. If it is desirable that the pollution of the streams desirable that the progressive Government, a reasonable forest p should go on, that beautiful rivers should be made common sewers, that the public health should be imperiled, and that Ontario should lag behind the rest of the world in sanitary progress and in devising methods for preserving the public health, then let us have the Public Health Act repealed, and the Provincial and local Boards of Health sent about their busic. Thus, for a comparatively small annual expenditure, the Province will be able to of Health sent about their business; let us adopt the penny-wise pound foolish idea that all money spent in removing impurities from the homes of the people and in keeping their surroundings, including the streams, as cleanly as possible, is wasted. But until we are prepared to the people and the people and the streams, as cleanly as possible, is wasted. But until we are prepared to the people and the forest wealth will be depleted. to do that we must face the issue raised, which is that London and all places similarly situated must reform their methods for getting rid of domestic refuse.

PROVINCIAL RIGHTS TRIUMPH.

Chanceller Boyd and Judges Ferguson and Robertson, sitting in the Chancery Division of the Ontario High Court of Justice, have given judgment in favor of the Ontario Government on an important question regarding the powers of the Legislature, which, as has been its custom, the present Ottawa Government has illegally

endeavored to curtail. Premier Mowat, in the interests of the people of Ontario, promoted a bill in the be criminal statistics? Lieutenant Governor the power of "com-muting and remitting sentences for offenses against the laws of this Province or offenses bad way, unless a long continued drought ngainst the laws of this Fronties of olders, so of deluge should come to their relief.

over which the legislative authority of the provided extends."

The Act was held by the Forminion Government to be ultra vires, tis contended by some that those who Queen's avenue, for one month only.

or beyond the power of the Legislature to pass, because the pardoning power was, by the Act of Confederation, vested exclusively

in the Governor-General.

The case submitted to the Chancery Court has settled the point, unless, indeed, the Dominion Government is foolish enough to carry the matter to the British Privy Council, where, in all previous attacks on Provincial autonomy, as upheld by Mr. Mowat, the Dominion Government and its

onstitutional lawyers have been worsted.
Chancellor Boyd, who voiced the
nanimous opinion of the court, delivered powers of the Legislature. Again it was laid down as a principle that, under the imperial law creating the Dominion, the Federal and Local Governments are each placed in possession of powers with which the other has no right to interfere. The offenders against statutes power to pardon effenders against statutes enacted by the Legislature is held to clearly belong to the Lieutenant-Governor. As the Chancellor ably puts it, "the Parliament of the Dominion and the Legislature and territory delegations of sovereign powers sufficient for all purposes of effect-ive self-government." And in further exof the Province enjoy each in its own sphere position of this view, the Chancellor asserts that "sovereign power must substantially operate and be manifested in Ontario legislation in order to the efficient exercise of territorial government under the sanction of the Imperial Act." This is the view which Premier Mowat has always main-

all authority at Ottawa.

It seems about time that these intermeddiers with the good government of On-tario resolved to desist from their attacks on the rights of the Legislature and the people of this Province. Not once have they been upheld in their interpretation of the istitution under which we live.

tained, in opposition to the centralizing policy of Sir John Macdonald and his as-

sociates at Ottawa, who have had a perfect mania for taking the rights of the Provinces

from them with the object of centralizing

THE WAY TO KEEP OUR RICHES. One of the most interesting features at the first meeting of the American Forestry Association, which began its sittings in Quebec on Wednesday, was the harangue of Old Sioui, whom ex-Premier Joly introduced as "the Huron chieftain, a valiant son of the forest." His plea for the retention of the forests was a novel one. "Gentlemen, he said "remember in your noble pursuit the sons of the forest; spare, if you can, our hunting-grounds from the merciless axe of the lumbermen, that our sons may find in them the game which is so dear to a Huron heart.

It can hardly be expected that much attention will be expected that much at-tention will be paid to the reasoning of this fine old specimen of the aboriginal game-lover. But it seems to be conceded on all hands that the forests of the country are being cut down much too fast for the good of the Dominion. A change of policy is required on the part of both the Do-minion and Provincial Governments, if Canada is to be saved from the fate of all countries which have cut down their forests, and have failed to take proper means for reafforesting the territory controlled by them. It is acknowledged by every intelligent investigator that a country which would dged by every intelligent would tigator that a country which would continue fruitful must have plenty of trees in order to secure a proper distribution of rainfall. The sad fate of more than one old world nation has proved that. There is also good authority for the belief that it is in the interest of the public health that trees should be plentiful. Eminent medical men have told us, indeed, that trees are the bealth of a country, and conservators of the health of a country, and health is a necessity to the full enjoyment

How, then, is the forest wealth to be maintained? There seems to be a disposi-tion on the part of the Governments of the day to sell the forests as the public needs dictate, and take the money to pay the cost of managing public affairs. There is nothing wrong in that resolution, if our rulers will estion of the action of the Provincial wrong in that resolution, if our rulers will pard of Health, as detailed by Dr. Bryce in only take care to reafforest the country.

Again we say Forest Reform must be the watchword from now onward.

PERSONAL: AND GENERAL. .The still watches of the night ought to be wound up.

-The melon-colic days have come-in equal quantities.

The small boy's three R.'s—rushing, roaring and 'riggling. -Can it be that the extreme dryness of

school books creates a thirst for learning? Figures don't lie, but they get into

+++ -With no excess of heat or cold to com-

wish to keep London's river clean are attacking London, but surely it is those who want the river to be dirty and to become still more filthy, who are assailing the city.

-Typhoid fever is playing and havoc in many a Toronto home, and in Hull, Que, diphtheria is epidemic. Both are filth diseases, and could be prevented if reas able care were taken in regard to the food, drink and surroundings of the people.

-Whether as a point of precedence Caran admirable address on the respective powers of the Dominion and Provincial Governments in the matter under review.

The finding is that the act was within the placed above Lord Salisbury, or below the Lord Mayor of Longueza of the Lord Mayor of don, or whether a cardinal has any official rank or status whatever in England—these are burning quetions in the English press

-As a sort of companion piece to "mug-wump," the Yankees have coined the new word "jiboose." A Mugwump is a Republican who forsook his party to the extent of voting for Cleveland and de-nouncing Blaine when those gentlemen were nominated for the Presidency, and who is in a state of perpetual disgust with B. F. Harrison. A Jiboose is defined as a professed Democrat, who is better and purer than his own party in his own estimation. It would seem in consequence that in proportion as our neighbors place principle above party the more jiboosity and nugwumpery there is in the country.

-In the Labor Day parade at Allegheny City, near Pittsburg, the other day, a German flag carried by the Bakers' Union was seized by a party of native born mechanics, trailed under foot, and torn to pieces. Such outrageous treatment arises plainly from the notion that a foreign flag carried in a procession betokens hostility to American institutions. Nothing could be farther from the truth. Love of one's own country and one's own flag is something that will never be eradicated from human nature, and the display of this natural and praise worthy emotion by a piece of foreign bunting in a parade cannot detract from the supremacy of the American flag in Ameri can terfitory. In pleasant contrast with this illiberal treatment is the conduct of the town authorities at a recent anniversary celebration in Long Island, who assigned place on the programme of the procession to "foreign born citizens with flags and banners."
