SIX HUNDRED MOUNTED MEN. As already said, the contingent, if Britain accepts it, will be mounted infantry, probably 600 men in all. Already the name of Col. Evans, in command of the mounted infantry at Winnipeg, is put forward as the one to go in command.

THE COMMANDER. Major Boulanger of Quebec will no doubt be one of the officers, as he has seen service already and was one of the first to volunteer in this instance. However, there are any number of good

FIRE AT STRATHROY.

Andrew Thompson's planing and sawmill at Strathroy was completely destroyed by fire early Monday morning. The loss will be considerable. The plant was all but completely destroyed, on which there is but little insurance. This is the third time Mr. Thompson has been burned out during the past eight years. About ten hands will be thrown out of employment. It is understood that Mr. Thompson intends rebuilding at once.

Leonard, for many years a valued member of this board, has been removed by death, be it, therefore, resolved that there be placed on record a minute expressive of the loss the company has sustained by reason of Mr. Leonard's death, and that there be conveyed to his family an expression of the sympathy and condolence of this board." The Southern Loan and Savings Company made a proposition to the Southwestern Farmers' and Mechanics' Saving and Loan Society to consider the question of the union of the two institutions, but the respective boards could not agree on a satisfactory basis of amalgamation, consequently the South-western will at once appoint a successor to their late lamented manager, W. E. Leonard.

A GRATIFYING COMPLIMENT. The entire front page of the current number of the Canadian Music and Trades Journal, of Toronto, is taken up with an excellent half-tone reproduction of the well-known features of H. Ruthven McDonald, former choir leader of the Wellington Street Methodist Church. The accompanying notice says:

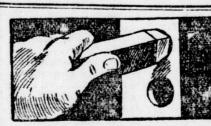

"We take great pleasure in presenting to our readers Mr. H. Ruthven McDonald, concert baritone, whose pleasing countenance graces our front page. Mr. McDonald has lately come to Toronto from London, Ont., where he made an enviable name for himself and where he established the famous McDonald Male Quartet, of which he is still director, they filling dates all over Ontario. As leader of Cook's Presbyterian Church choir, Toronto, Mr. McDonald has brought it into much favor with church-goers, weeding out all the bad singers and replacing them with competent vocalists. He is in much demand as a concert singer and has almost more dates than he can conveniently fill. His voice is one of great depth and power, his low notes being rich and full, while his upper register has almost the quality of the tenor, so wide is his range. But it is songs of the sea and other selections of that character that Mr. McDonald excels."

Annual Supper of "A" Co., 7th Regiment, a Great Success.

The annual supper of A Company, 7th Regmient, was held last night at E. Barrel's hotel, St. Johns, and was a thorough success. There was not a dull moment from start to finish, and the ified enjoyment that always attends the suppers of this company. was an attendance of about 50, and all acquitted themselves like men at the bountifully-spread tables. A toast list, introduced by Major Hayes, with all the regulation toasts, including "The King," "Our Country," "Canadian Militia," and "The Regiment," was duly honored. Speeches were made by Sergt.-Major Milligan, Drill-Sergt. Price, O. R. C. Shillington, Sergts. Erskine, Robson, Lieut. Taylor and Major Hayes. Songs were sung by members of the company, and by a quartet from the city, composed of S. Friendship, Miner, Collins and Grant, in fine style. A toast of special significance was made on behalf of the privates of the company by Pte. Newton, testifying to the good feeling of the men, to Drill Instructor Price, whose reply was well The absence, through sickness, of the color-sergeant of the company, J. Jacobs, was much regretted. The company arrived back in the city at about 2 o'clock. The committee in charge of the arrangements, Sergt. Erskine, Corp. McDonell, Ptes. Hayes, Lee and Newton, are to be congratulated, and the company score another successful supper.

"The square peg in the round hole" figuratively expresses the use of means unsuited to the desired end. A great many people who have been cured of dyspepsia and other diseases of the stomach and its illied organs of digestion and nutrition by the use of Dr. Pierce's Golden Medical Discovery say: "We tried many medicines with only temporary benefit. It was not until we began the use of Golden Medical Discovery' that we found a complete and lasting cure."

It is undoubtedly true that Dr. Pierce's Golden Medical Discovery holds the record for the perfect and permanent cure of indigestion and other diseases of the stomach and associated organs of digestion and nutrition. It is not a palliative. It cures the cause of disease and builds up the body with solid healthy flesh, not flabby fat.

INDIVIDUALISTS

They Were Plain Anarchists Before th Murder of the President.

[Boston Transcript.]

Boston anarchists are not the same as they were a few months ago. Several changes have occurred in their camp since the assassination of the president, partly because of their own diplomacy, and it is asserted by all who were questioned on the subject that they are not holding any meetings. When they occupy themselves at all with the principles in the creed it is merely to read or to think, and they may have to do more thinking than reading in the near future if the postoffice department carries out its new policy of imposing prohibitory conditions for the distribution of anarchistic publications through the mails.

Another change has become noticeable in Boston. There is not so much enthusiasm over the name "anarchism" as there used to be. Some of the socalled philosophical anarchists say that this word has become soiled by constant association, in the public mind, with the idea of violence and rashness, and does no longer represent the movement. It should, therefore, be dropped. "Individualism" has been suggested as a substitute, and meets with favor among a certain class, but it is objectionable to communists, who believe in a different form of "govern-

ment. Neither does it appeal with any great force to the minds of the Russian and Polish Jews who call themselves anarchists. These three factions, however, are not likely to consult each other in the choice of a new name, as they never held exactly the same views, and are now drawing finer lines than ever. It would not be surprising to find communists and individualists pooling issues, although theoretically they are two opposing factions who are brought together merely by a common desire to reduce the power of the government, but both of them claim to be uncompromisingly opposed to the plain anarchists. The latter would overthrow the government by measures which are too revolutionary to receive an outspoken sanction from any of

Having taken this turn the anarchist movement in Boston may lose its identity in the public mind, but go on with unabated vigor along a different course local interests splitting on internal

disagreements.

HUNTRESS REPENTS

Lady Florence Dixie Now Writing About the Cruelty of Hunting.

Women do not seem likely to encroach on at least one of man's pleasures, that of hunting. The most celebrated shot among English women has abandoned hunting entirely and published a pamphlet on "The Horrors of

Sport." She knows what she is talking about. Her husband was an ardent hunter, but she was such an enthusiast that his shooting preserves did not satisfy her, and she would rent a Scottish moor or deer forest for her own use. She was called by her friends the female Nimrod, and her house was full of trophies of her skill. Now she has taken up her pen to decry the old wea-

pon, the gun. Lady Florence Dixie is this reformed Nimrod. She has killed lions in Africa, gazelles in Arabia, bears in the Rockes. With her brother, Lord James Douglas, she took a journey through

Patagonia. A good many years ago another brother, Lord Francis Douglas, lost his life in the Alps. This intrepid woman later climbed the very peak in whose ascent he was killed. She says that have done "a tithe of the hunting I have done at home and in foreign lands"; so that her renunciation of the sport seems to mean that here, at any rate, women are not going to contest with men for privileges. She

"Many a keen sportsman will acknowledge that a feeling of self-re-proach has at times come over him as he has stood by the dying victim of his skill. I know that it has confronted me many and many a time. I have bent over my fallen game and seen the beautiful eyes grow dim. I have ended with a sharp, yet merciful knife, the dying sufferings of creatures that had never harmed me. I, too, have witnessed the angry, defiant glare of the wild beast's fading sight as death deprived him of the power to wreak his vengeance on the human being that had taken his free life. The memory of those scenes brings no pleasure t my mind. On the contrary, it haunts with a cruel reproach, and I fain would that I had never done deeds of skill-and cruelty."
