### Billie Burke, in Paris, Tells All About the Forthcoming Change in Feminine Hair and Hats

[By Billie Burke.]

The Ritz-Carlton, Paris, July 29 .-Paris in summer, especially the latter part of July and all of August, is given over to the tourist. All the "haute mode" is away at the French summer resorts or at the country

However, when this letter is being written, one sees some of the fashlonables still in the gayest city of ail

the world. Fashions in hats and hair have again begun to change. Contrary to the general opinion, one does not jump abruptly from one mode into another. The present tight skirts and large waists have been about eight years in the process of evolution from the wide skirt, the small waist and the

big hips period. It does not take quite so long, however, to change the shape of a hat as it does the shape of a woman, so we may look for the new hat and the new hair modes to come in universally by the spring styles. This winter you will see the extreme dressers and many actresses who pride themselves on being a little in front of the procession with hats pushed way up in the back and held there by the hair, which is worn in a high psyche knot like ones in the sketches.

These hats are very piquant looking and I think the wearing of hats of the kind illustrated will necessitate a change in the "sloppy carriage" which now is so popular. \_A hat pushed down over one's eyes makes one hold one's head up. Consequently one cannot walk with the ugly drooping shoulders and the protruding abdomen that is so much in vogue at the present moment.

Everything now, however, points to the high profile in the back and a flat look from the front of the head, while just the opposite is correct for the

pose of the body.
Incidentally, I'm going to make a confession. I AM A HAT FAN and so, of course, I bought one of each of the styles that I am sending you. Two of them were in black and white and the other was all white, but I haven't adopted yet the style of gowns that is skin tight in the back and which makes the front curved - and much "to the fore." Perhaps I will do so, for as yet all gowns are made with draping that is forced forward and a high, round abdomen effect that was seen in the United States here and there before I left.

One vould imagine that vestry meetings occur daily, instead of once a year, to hear those men of antiquated ideas, advance the reason, that presence at them would take women out of their homes. The women in England from time immemorial have been members of the vestry, and when the Anglican Church was planted in Canada, the law on vestries was the same as in England, After some years the Canadian rule was changed by inserting the word "male," thus excluding women, and taking away a right that had been theirs. In nine other diocese in Canada, this right has been restored, viz: Nova Scotia, Montreal, Ontario, Ottawa, Niagara, Saskatchewan, New Westminster, Calgary and Caledonia,
