A shout. A pull at the whistle, screeching forth its note of victory. Then, the blare of the whistles was drowned in a greater sound, a roar that reverberated through the hills like the bellow of a thousand thunders, the cracking and crashing of trees, the splintering of great rocks and crashed downward in an all-consuming rush of destruction. Trees gave way before the constantly gathering mass of white, and joined in the downfall. Great boulders, head. abutting rocks, slides of shale! "Linda Lee, Inc."

WHILE the first purpose of the book is to entertain, I have endeavored to record certain aspects of life in the Hollywood film colony in a phase which will come to be recognized as a parallel in motion picture history to that feverish era of "The Days of '49."

Within limitations of its single volume, "Linda Lee, Inc.," paints a true picture, colored only by the author's vision. It pretends neither to expose nor to palliate. It is merely a plain presentment of conditions with which I became conversant in the course of nine years of dabbling in picture making.

Curiously enough, "Linda Lee, Inc.," was written in every detail before the occurrence of that tragedy in real life which focused the attention and disgust of Canada on Hollywood-and was inspired by the author's memory of a conversation with a famous star and her husband, in which we agreed that, providing means were not found to stem the excesses of a certain element more conspicuous than representative Hollywood, some such tragedy was inevitably to be expected.
