

DROPS FISHING LICENSE CASES

Ontario Government To Withdraw Charges Against Port Stanley Fishermen.

MEMBERS DEBATE ISSUE

Howard Ferguson Opens Live-ly Discussion On Question in Legislature.

TORONTO, March 27.—The prosecution of a number of fishermen in the Port Stanley district for fishing without licenses was the subject of a protest in the Legislature today by Hon. G. Howard Ferguson, who, quoting from a St. Thomas newspaper, drew attention to the fact that the fishermen had, before the 15th of March, sent in their applications for licenses, together with certified checks. The day the fishing season opened they had started operations. Their licenses had not arrived, but they had no reason to doubt that they were on the way. A number of them, however, had been promptly "baited to court."

"It is cruel, harsh and unjust that under these circumstances they should be penalized," he concluded.

R. L. Brackin, K.C., of West Kent, produced data to show that on the 16th the fishermen received receipts for their checks and an intimation that the licenses would follow within a day or two. They started fishing on the 16th, as permitted by law, and on the 17th and 18th received their licenses, all dated the 16th.

Hon. Mr. Mills pointed out that the department was endeavoring to enforce the rule that all fishermen must have their licenses before commencing operations. Under the old system they were often allowed to go on without a license and pay for it out of their yearly earnings, which was not, in his opinion, good business. However, it had been decided to withdraw the charges against all but two of the men who had been given licenses, and who were fishing with nets of illegal mesh.

HITS CEILING WHEN MOTOR BACKFIRES

Special to London Advertiser.

KITCHENER, March 27.—While cranking a motor truck in his garage here, George Doerr, a well-known Kitchener transport man was thrown to the ceiling of the garage when the engine backfired. The force of the backfire pulled Mr. Doerr off his feet and lifted him so that his feet struck the ceiling. He was hurled to the floor, landing on his right arm and breaking it.

Sailing from Sydney, I called at

Magelang, Temanngong and Ambarawa (small towns at a good distance from the center of the toluene-growing country, and very interesting as opportunities for seeing the native in his own home), and Soerabaya, a gay place with excellent hotels and clubs, and within easy reach of the mountains, where elevations of 6,000 feet can be reached, with a corresponding drop in temperature which is most acceptable after a sojourn in tropical climates.

Sailing from Batavia for Australia, the steamer calls at Port Darwin on the north coast of Australia, a place with a wonderful harbor, but not a very desirable residence, then through Torres Straits to Thursday Island, the center of the Queensland pearl fisheries, down the coast inside the Great Barrier Reef, calling at Townsville, Rockhampton and Brisbane.

I left the boat at Brisbane and took train to Melbourne and Sydney, seeing a good deal of the country en route.

THE WEEK IN THE WORLD

SEEING THE WORLD FOR \$5,000

Exclusive Advertiser Review.

LONDON, March 27.—A tour undertaken by me last year gives some idea of what can be seen of the world on an expenditure of \$5,000.

I left England on March 9, 1921, and visited the following countries and towns in the order mentioned: Paris, Marseilles, then to Egypt, visiting Cairo and Luxor, seeing the best of the Egyptian antiquities, Karnak, the Tombs of the Kings, and the Pyramids.

After that Port Said to Aden and Colombo, then across to Southern India, calling at Dindigul, Trichinopoly, Madras, Bangalore, Bangalore, Secunderabad, Hyderabad (Deccan), a most interesting native city; Mysore, Seringapatam (all of historical interest to an Englishman), Bombay, Gwalior, with its rock fort and carvings; thence to the scenes of the Mutiny, Delhi, Agra, Cawnpore and Lucknow.

Benares, the Jharia coalfield, and Calcutta were next visited; from Calcutta I sailed to Rangoon, from there down to Penang and across to Medan, in Sumatra, returning to Penang, Kuala Lumpur and Singapore.

From Singapore boat was taken to Java, the tourists' paradise, where the following towns were visited, each of great interest: Batavia, Buitenzorg (with its wonderful botanical gardens), Bandung, Garoet (a beautiful mountain plateau 2,000 feet up, rimmed by live volcanoes), Cheribon and Semarang (centers of the sugar cane industry), and Djokakarta, a native city near the famous Hindu ruined temples of Borobudur.

Magelang, Temanngong and Ambarawa (small towns at a good distance from the center of the toluene-growing country, and very interesting as opportunities for seeing the native in his own home), and Soerabaya, a gay place with excellent hotels and clubs, and within easy reach of the mountains, where elevations of 6,000 feet can be reached, with a corresponding drop in temperature which is most acceptable after a sojourn in tropical climates.

LOCKOUT WILL AFFECT 500,000

Situation in British Engineering Industry Grows Serious.

SUBMIT PROPOSALS

25,000 Liverpool Workers To Strike Against Wage Cut.

LONDON, March 27.—Negotiations between representatives of the engineering unions and their employers again broke down this afternoon and the situation in the engineering industry was regarded as serious. The employers refused to withdraw their lockout notices unless certain guarantees were forthcoming from the unions.

It was considered likely this evening that unless the unions concede the employers' claims to the right of exercising managerial functions in matters of shop regulations, 500,000 union workers affiliated with the engineers will be given lockout notices within the next day or two. It was officially stated this evening that the employers' proposals would be submitted to a conference of representatives of all the unions concerned tomorrow morning and that the decision reached at that meeting would be considered by the employers tomorrow afternoon.

25,000 TO GO ON STRIKE.

LIVERPOOL, March 27.—Twenty-five thousand men in the engineering and shipbuilding trades here have decided to go on strike tomorrow as a result of a sudden announcement by the employers putting national wage reductions into force. The Newcastle and Southampton unions have voted to take similar action.

EGREMONT PIONEERS PASS

Jas. Hooper, Aged 80, and Jos. Moore, 70, Die.

Special to London Advertiser.

DURHAM, March 26.—Two pioneers of Egremont Township passed away Saturday, James Hooper and Joseph Moore, aged 80 and 70 years respectively. The former had been a resident of Canada since he was 8 years old. He was married in 1867 to Miss Jean Walters, who survives him, with seven of the eight children born to them, viz.: Isaac, Matthew, David, Herbert, George, Myrtle (Mrs. Jos. Lawrence) and Mabel (Mrs. W. A. Lawrence).

The latter pioneer, Joseph Moore, was born in the township in which he died, and had never resided anywhere else. He is survived by a widow and four children, William in Durham, Mrs. D. McKelvey, New Lis-burn, Mrs. T. Bailey, Egremont, and Mrs. W. Turnbull, Glenora.

THERE was only one portion of today's proceedings that contained a general note of unanimity of members and parties in the Progressive movement in all departments of the press article which reflected in a defamatory manner on the nation. After the opposition proceeded to make the path of the interim vote, futile though the attempt may have been, as stony, uneven and rough as possible. Finally the Progressives, who were on the outside in all this, rose and remarked that after all, combat in debate was very well by way of diversion, but not the business of government as he viewed it.

In this, the interim vote of supply, the Progressives, it was well illustrated today, are at more of a loss than they were in the debate on the speech from the throne. For, while the government, being in power, knows the conditions in the department by contact, and the opposition knows the detail of departmental management because they but recently, or rather comparatively recently, vacated the administration of departmental affairs, the Progressives cannot have an understanding of the reasons and cannot have an insight, with the exception of their leader, who was formerly a cabinet minister, into the necessity of voting the public moneys, with reference to the use of public moneys and application thereof.

Then the leader of the opposition, who, to do him full justice, is a master of artifice, has adopted the tactics of trying to, on some issues altogether beside estimates, drive the government into a corner, and then torment it and bait it to ridicule as being inconsistent, and all else unbecoming to a great party.

RECOVER STOLEN HARNESS

Harold Wilkinson, Mt. Horeb, Identifies Property Lost By Him December, 1921.

Special to London Advertiser.

LION'S HEAD, March 27.—Harold Wilkinson of Mount Horeb was called to Lion's Head on Thursday to identify a set of double harnesses, which Wilkinson claims was taken from his stable on Dec. 27, 1921. Wilkinson identified the harness as being his.

A man compared with the theft was arraigned in court, but sufficient evidence could not be given to convict the accused, and he was let go. It is said that as the theft was committed in Grey and the accused is a resident of Bruce the case would have to come up before a magistrate in Grey. The case is being dropped on this account.

WILL PAY NURSE'S SALARY IN PART

Special to London Advertiser.

INGERSOLL, March 27.—At the regular meeting of the board of education tonight, a resolution was passed whereby the board will pay the sum of \$300 for the services of the health nurse for the ensuing nine months. This will supplement \$150 already paid by the board, as well as the amount paid by the Kiwanis Club.

A resolution was also passed granting permission for the holding of a dental survey in the public school. The following were appointed prize committee in connection with the annual commencement exercises: J. C. Hegler, John Lee, L. V. Healy.

World News

Cut Short

THE HAGUE, March 27.—The judges of the Permanent Court of Justice met today in the Peace Palace, putting the final touches on the rules to govern the procedure of the court, which is now ready to sit formally on June 15.

Although nothing definite is known regarding the first cases to be tried, it is generally expected that advisory cases will be among them.

VIENNA, March 27.—The National Assembly today passed the bill providing for the administrative and financial reforms which France and Great Britain stipulated were necessary before credits could be extended to Austria. The Pan-Germans supported the measure, but announced they had not changed in their opposition to the government.

Although in favor of the bill, the Socialists abstained from voting as a protest against the government's opposition to the rental tax and its failure to adopt other measures desired by the Socialists.

AMSTERDAM, March 27.—Holland is presenting a notable example in military retrenchment, according to War Minister Jonkheer van Dijk, who presented the war budget to the second chamber last night.

It was his unavoidable duty, said the minister, to ask for money for military purposes, as a hostile attack was always possible and defensive measures were necessary, and the moment had not come for realization of the disarmament ideal, even for small countries.

At the same time, continued the minister, his present budget was only 73,000,000 guilders, as compared with 78,000,000 guilders when he entered upon his duties.

As the 1913 war budget represented 14 per cent of the entire government budget, and the present war budget only 8 per cent, he added that Holland stood in the front rank of nations, so far as military retrenchment was concerned.

LONDON, March 27.—During the discussion of the vote of 118,500 officers, men and boys for the royal navy in the report stage in the House of Commons, Saturday, Mr. Amery, financial and parliamentary secretary to the admiralty, said the reduction in personnel were to be made on the assumption that the naval treaty signed at Washington would be ratified, as he believed it would be. If by any grave mischance, however, the treaty should not be ratified, the estimates, of course, would have to be subjected to revision.

Mr. Amery added that in the American navy a reduction from 139,000 to 99,000 had been suggested by a committee of the lower house, while the secretary of the navy had suggested 115,000, and no doubt the actual figures would be somewhere between. The Japanese figures, he said, were 80,000.

After further discussion the vote was agreed to without division.

PARIS, March 27.—Questions relating to the Dardanelles and Thrace and financial measures were under consideration by the Near East Conference of the Allied Foreign Ministers at both the morning and afternoon sessions today. The utmost secrecy was maintained, and the communiqué given out this evening was noncommittal in every way.

It is learned, however, that three solutions of the Dardanelles question were discussed, although no definite decision was taken. The first solution provides for the retention of Soutari by the Straits. The second for Turkish possession under allied control, and the third for the retention of Soutari by the Turks, with the Allies holding the Constantinople side.

As regards Thrace, it is reported that the French advocate the return of Adrianople and the better part of Eastern Thrace to Turkey, while the British contention is for the closest possible adherence to the Enos-Midia line.

The ministers listened to the views of Marshal Foch, Brig.-Gen. Sir Charles Harrington, commander of the British forces in Constantinople, and Maj.-Gen. Giovanni Mariotti of Italy on the Dardanelles and Thracian problems. The definite settlement of certain military points was referred to the generals.

between. The Japanese figures, he said, were 80,000.

REPORTS GOOD CROP PROSPECTS

TORONTO, March 27.—More optimism with regard to fall wheat prospects in Ontario is indicated by the official reports as to the provincial department of agriculture this week. The department's representative in Kent County, which has the largest fall wheat acreage of any in the province, says:

"Fall wheat and clover are continuing to stand the weather without any appreciable deterioration, and will probably come through all right."

Manitoulin declares that the winter in the northern counties of the province has been ideal for fall wheat on account of a "good covering of snow."

Essex County says that the extent of plowing already done points to a larger acreage in field crops this coming season than for many years. The open fall last year enabled much land to be turned under and the open spring following made plowing general by March 15 in that county.

REPAIR BLYTH PHONE SERVICE

BLYTH, March 27.—The repairs to damage done to the rural telephone system here by the recent ice storm, when a great many of the poles were a tangled mass, are about finished, and the system is in good working shape again.

The land in this section is about ready for the spring work. All it needs is a nice warm rain, and the farmers would all be busy.

SHOWS NEEDS OF JUVENILE COURT

Judge H. S. Mott Addresses Kiwanis Club of St. Thomas On Vital Subject.

URGES EARLY PETITION

Toronto Official Outlines Work and Advantages of Special Judicial Institution.

Special to London Advertiser.

ST. THOMAS, March 27.—Judge H. S. Mott, of the juvenile court of Toronto, strongly urged the establishment of such a court in this city to help solve problems arising from juvenile crime, when he addressed the Kiwanis Club of this city, at the regular weekly luncheon held at the Parkview Hotel, Monday noon.

A juvenile court, Judge Mott claimed, working in conjunction with the local Children's Shelter, the Kiwanis Club and other organizations, was one of the most urgent needs of St. Thomas and Elgin County.

"I think that you should have such a court here," he said. "If I did not think that you needed one I would not be speaking here today. I did not come to please your fancy, but to tell you the things that the juvenile court of Toronto is accomplishing and to show you that a similar court would help our Kiwanians in your work among under-privileged boys."

Urges People Petition Council.

Judge Mott did not believe that the cost of establishing a court in this city would be very great. With an efficient children's shelter already in operation he believed that the matter would be quite simple. He urged the club as a body to petition the city and county council to ask the attorney-general's department to make the juvenile court act operative in this city.

"No matter what some men and women may think about their obligations to the under-privileged boys and girls of Ontario, they cannot escape the fact that they have unavoidable responsibilities. Judge Mott insisted. If one man's boy has all the opportunities that can be offered him but another man's son is handicapped by heredity influence or environment, the boy with the opportunities is also handicapped."

"The future of your boy depends on the future of this other boy," the speaker declared. "You must not overlook this fact. Every boy who has not a chance to develop becomes a mortgage on the boy who has had a chance. You dare not sit down and allow the needy boy to pass out. The future of any country depends on its boys and girls. They are the assets of Canada of today and of the future. We have magnificent natural resources and are an important part of a great empire, but these things are

all subsidiary to the people of the nation. The greatest national resource is to be found in the cottages of our land."

Describes Work of Court.

Judge Mott described the manner in which the Toronto juvenile court operates from the time a boy or girl is turned out from the different character moulding processes, a responsible citizen, capable of determining right from wrong and appreciating the importance of law and order being maintained.

E. H. Caughell has been appointed treasurer of the Kiwanis Club. He will be succeeded as chairman of the attendance committee by Harold Tanner.

U. S. FOOD PRICES DECLINE.

WASHINGTON, March 27.—Retail food costs in ten cities of the United States showed a decrease ranging from 1 to 4 per cent during the month from February 15 to March 15, according to statistics announced today.

Get Your Free

\$1.00 PACKAGE OF GENUINE YEAST VITAMINE TABLETS from your druggist today.

If you are thin and emaciated and wish something to help you put on flesh and increase your weight, Yeast Vitamine Tablets should be used in connection with organic iron. With outorganic iron, both food and Vitamines are absolutely useless as your body cannot change inert, lifeless food into living cells and tissues unless you have plenty of organic iron in your blood. Organic iron takes up oxygen from your lungs. This oxygenated organic iron enters your blood stream and is absorbed into your body, just as fire enters with coal or wood, and by so doing, it creates tremendous power and energy. Without organic iron in your blood your food merely passes through your body without doing you any good.

Arrangements have been made with the druggists of this city to give every reader of this paper a large \$1.00 package of Genuine Yeast Vitamine Tablets absolutely free with every purchase of a bottle of Nuxated Iron.

NUXATED IRON For Red Blood, Strength and Endurance

for swellings
