A Simple Remedy Which Will Interest Catarrh Sufferers.

In its earlier stages catarrh is more of a nuisance than a menace to the disease exten to the throat, bron-

and intestines. Catarrh is essentially a disease

the mucous membrane, the local symptoms being a profuse discharge of mucous, stoppage of the nostrils, irritation in throat, causing coughing, sneezing, gagging and frequent clearings of the throat and head. The usual treatment by local

douches, snuffs, salves, etc., often gives temporary relief, but anything like a cure can only be obtained by a treatment which removes the catarrhal taint from the blood and the disappearance of the inflammation from the mucous surfaces.

JOHN BURNS ON DEER HUNTING

The Disgraceful Method in Vogue Explained and Exposed.

Bailiff John Burns started this (Wednes day) morning for his thirty-sixth consecutive annual deer hunt. Mr. Burns is an enthus; astic hunter, and at the same time a strong advocate of a reasonable degree of protection being given to the game. There seems to be a great deal more truth representative yesterday. "Yes, sir, I have no hesitation in saying that the law that allows deer to be driven into the water by hounds and clubbed to death is a disgrace general health, but sooner or later the to the Province. Such a thing is not to I blame the would-be hunters, who take keeping, and tried to make a living by law does not say they shall or must do it. your face again." It simply says you may do so. If the law by some oversight should say a man may steal his neighbors' sheep, it is to be hoped that there are thousands upon thousands of men in Outario who, on principal, would not steal sheep. Now, a man who goes into a boat and sits on a lake till the loops run a deer into the water, and knocks it on the head with a club or our or executive. and string a feer into the water, and knocks it on the head with a club or oar, or even rows up within a few feet and shoots 't while it is wallowing there helplessly, that man would steal sneep if he dare. He does the one because the law allows him, and he does not allow him. Buffalo Bill once have does the deer that he got a shot at he think of a would-be hunter or sportsman who would row up within a couple of feet of a deer wallowing in the water, with the mocent pleading eyes staring him in the tace, and knock it on the head with a the operating table. the face, and knock it on the head with a cmb? Our cousins over the river are getting on to the fact that we are out to exterminate our game and are flocking over in dozens to help us, precisely as a flock of crows would come when they scented a dead carcass. Last Thursday evening-toctober 24th fifty hunters and some fifteen or twenty hounds passed through Windsor on their way from Michigan to the Muskoka hunting grounds. These men could have had a deer hunt in their own country by going perhaps half the distance and save the \$25 license that they have to pay in Ontario. But in Michigan they dare not take a dog. If a man should run a deer into the water and kill it in Michigan. I am not sure of the penalty he would suffer, mucous surfaces.

A new remedy which meets these requirements, and which so far has been remarkably successful in curing catarrh, is Stuart's Catarrh Tablets.

These tablets act upon the blood and mucous membranes only. They can hardly be called a secret patent medicipe, as they are composed of such valuable remedies as Sanguinaria.

Hydrastin, Eucalyptol And similar. Hydrastin, Eucalyptol and similar cleansing antiseptics, which cure by eliminating from the blood and mucous surfaces the catarrhal poison.

Stuart's Catarrh Tablets are large, pleasant-tasting lozenges taken internally, allowing them to dissolve slowly in the mouth; in this way they reach the outing ail.
