

Why not try WYETH'S MALT EXTRACT?

Doctors highly recommend it to those

Who are run down;
Who have lost appetite;
Who have difficulty after eating;
Who suffer from nervous exhaustion;
And to Nursing Mothers,
as it increases quantity and
improves quality of milk.

PRICE, 40 CENTS PER BOTTLE.

Heating BY WARM AIR, OR COMBINATION (HOT WATER AND HOT AIR). Our Specialty.

We have letters from all parts of Canada saying

Preston Furnaces Are The Best.

Let us send you Catalogue and full particulars, and you can JUDGE FOR YOURSELF.

CLARE BROS. & CO., Preston, Ont.

COUTTS,

ACETOCURA

THE EXTERNAL REMEDY FOR
Rheumatism, Sciatica and
Nervous Diseases.

Mention this Paper.

Agents wanted in all small towns. It will pay energetic business men to write FOR TERMS.

REV. ALEX. GILRAY,
Collego Street Presbyterian Church, writes:
Dear Sirs,—

It is with much satisfaction that I learn that you have decided to establish a branch office in Toronto, believing as I do, that the more widely your Acetic Acid remedy is made known, the greater will be the gratitude accorded to you for the relief experienced by many sufferers in Canada. We have used your Acid for over eighteen years, and are now prepared to state that it is worthy of a place in every family. We have found it thoroughly safe and effective and have commended it to many,—for which we have been thanked. We wish you success in your new quarters, as we feel sure your success will bring relief here as it has already done to large numbers in the old land and other countries. Much will depend on the patient and persevering use of the Acid as set forth in your little book.

ALEX. GILRAY, 91 Bellevue Avenue,
Toronto, 28th Nov., 1893.

For pamphlet and all information apply to
COUTTS & SONS, 72 Victoria St.,

And sold by all Medicine Vendors throughout the World.

N.B.—Advice gratis, at the above address, daily between the hours of 11 and 4, or by letter.

MISCELLANEOUS.

Aluminum is being tried in the saddletrees and stirrups of certain cavalry in the Soudan. The saving of weight thus effected amounts to about six and one-half pounds.

A long distance telephone line in Spain, now under construction, from Madrid to Barcelona, and covering a route 500 miles long, will probably be completed in two or three months.

A British inventor has followed up the pneumatic tire and hub with a pneumatic wheel for bicycles. This is a flattened spherical chamber, fitted with compressed air, and contained within metallic side plates.

Bicycles are coming into increased use in the Belgian army, and the military authorities intend soon to establish a training school, to which every regiment will send a few men of the grade of corporal for instruction.

Turpin, the French inventor who makes such fearfully destructive war apparatus, has apparently eclipsed all his former efforts in this direction. *Le Temps* announces that he has just completed an electrically operated automatic mitrailleuse capable of discharging, at a minimum, 25,000 projectiles four times in fifteen minutes.—*Electrical Review*.

One of the deepest holes, made artificially, in the world, is the one sunk at Parvshowitz, in Western Siberia. It has a depth of 6,568 feet, and a diameter of 2.75 inches. Work has been stopped temporarily, in order to lower sensitive thermometers into the well; but eventually it is proposed to go down 8,000 feet. Temperature investigations afford the motive for this enterprise.

Motive power is soon to be distributed through the streets of Antwerp, in the form of water under high pressure. At numerous stations in the city there will be hydraulic motors, which will operate dynamos, to provide electricity for a limited region. The aim of this plan is to avoid the high cost of continuous current wiring and the high tension of the alternating current. It is a curious experiment.

It is important to keep the liver and kidneys in good condition. Hood's Sarsaparilla is the remedy for invigorating these organs.

The Greenwich Observatory, England, has received the promise of a 26-inch photographic telescope, to cost \$25,000. It will be used mainly for work on the international chart of the heavens at first. This instrument must not be confounded with the 28-inch glass which Mr. Clistie has already been fortunate enough to secure at government expense. Sir Henry Thompson is the giver of the proposed telescope.

Annunciators, indicating the name of the next station, are in use on the Metropolitan and District suburban roads in and near London. They are set, after leaving a station, by pulling a cord. One official controls the apparatus in all the cars of a train simultaneously. This method of imparting information is an improvement on the one now in general use, of bawling out the names more or less indistinctly.

MR. JOHN HENDERSON, 335 Bathurst street, Toronto, was cured many years ago of a complication of diseases at the Saltcote Sanitarium, Ayrshire, Scotland, where our remedy is largely used. At home his people were never without it.

Experiments made in India under the auspices of the health authorities at Calcutta indicate that cholera may be prevented by vaccination with anti-choleraic virus. In a village of 200 inhabitants 116 were inoculated with this virus. Out of ten cases of cholera in a recent epidemic in the village, resulting in seven deaths, every one of the persons affected was among those who had not been treated. This may not be conclusive, but it is very reassuring.—*Philadelphia Record*.

Some months ago a Dublin inventor claimed for a preparation of his that it would preserve eggs in perpetual freshness. To thoroughly test the efficacy of the invention, which, if successful, would revolutionize the egg market, an experiment was carried out at the Freeman offices. A sample of eggs immersed in the patent solution, which is a thin grayish paste of the consistency of honey, have remained undisturbed there for a period of four months, and when opened the other night in the presence of experts were found to be all perfectly fresh.—*London Public Opinion*.

When our consciousness turns upon the main design of life, and our thoughts are employed upon the chief purpose either in business or pleasure, we shall never betray an affectation, for we cannot be guilty of it; but when we give the passion for praise an unbridled liberty, our pleasure in little perfections robs us of what is due to us for great virtues and worthy qualities. How many excellent speeches and honest actions are lost for want of being indifferent where we ought?—*Sir R. Steele*.

A new patent process of hardening steel articles which has been tried by Krupp, the Mannesheims and other German firms, is now being brought to the attention of British manufacturers. It is said that drills prepared by this method cut through the hardest steel without the aid of any lubricant, and last much longer than the usual run of drill. In the operation of hardening, the drill or other object is brought to only a dark-red heat, dipped in a composition known as "Duro" for ten to twenty seconds, then heated slowly until cherry-red, and cooled directly in tepid water.

"A little farm well tilled,
A little cellar well filled,
A little wife well willed."

What could you wish a man better than that? The last is not the least by any means, but how can a wife be well willed if she be the victim of those distressing maladies that make her life a burden? Let her take Dr. Pierce's Favorite Prescription and cure all painful irregularities, uterine disorders, inflammation and ulceration, prolapsus and kindred weaknesses. It is a boon and a blessing to women. Thousands are in the bloom of health through using it, when otherwise they would be under the sod. Are you a sufferer? Use it, or some day we may read—

A little wife self-willed,
Rosewood coffin early filled,
Spite of doctor well skilled,
Ovarian, Fibroid and other Tumors
cured without surgery. Book, testimonials and references, mailed securely sealed for 10 cents in stamps. Address, World's Dispensary Medical Association, Buffalo, N.Y.

In drawing up a will it is always best to call in the aid of a solicitor. Otherwise your executors may have a lot of trouble, and the bulk of your property be swallowed up in law costs. These consequences are likely to follow in the case of the will of Morris Roberts, the Birmingham prize fighter. The bulk of the property is to remain in the Bank of England for twenty years, at the expiration of which time it is to be equally divided among the sorrowing relatives.—*London Figaro*.

Fencing for young ladies is coming in vogue in Copenhagen, where several young ladies of good social standing have recently been receiving lessons in this graceful and health-giving pastime. It would seem that the members of the fair sex can hold their own against the men in fencing, and that they, in fact, frequently excel the latter in precision, swiftness and grace of movement. Nor can there be the slightest doubt that fencing affords an unusual amount of varied and healthy exercise at the same time.

Nothing in an English village or town is more touching and thrilling than the ringing of the nine o'clock bell, commonly called the curfew, says the *Boston Herald*. It was once quite common in New England in the country towns; but in the disuse into which the ringing of bells has fallen it has largely passed away. It is a custom which has found a home among people of English descent, and its early revival is evident from the signs of the times. The new interest in the pealing of bells is manifesting itself in the demand in Cleveland, in Baltimore and in other cities that the curfew shall be restored; and when once the peals are rung from the Christ Church bells in this city, it will be almost imperative that the curfew shall be heard from the centre of old Boston.
