

MAGIC LANTERNS.

Brief mention has been made of the large range of magic lanterns shown by Nerlich & Co. Some of the lanterns merit special mention. In japanned tin lanterns we give illustrations of two different kinds. No. 7 has a japanned tin body with dome shape top and side door, japanned tin stage and

are made of brass, beautifully finished and lacquered, and are mounted on a solid brass foot, making the entire front perfectly rigid. The stage is open all round, and therefore allows the slides to be inserted from the top or the sides. This is very useful for chemical experiments. There is a panelled door fitted with a brass bound blue glass sight hole with brass sliding shutter on each side of the body for use when the lime-light is applied. The entire brass front and stage slides in brass runners or guides, which are fixed to the front foot by brass screws. This lantern is fitted with a 4-inch diameter plano-convex compound con-

dense damaged by water, and on this account are being cleared out at a low price.

THE SEASON FOR GAMES.

In connection with the extensive line of games shown by the Copp, Clark Co., Ltd., to which reference was made last month, and consisting of games made by themselves and some copyrighted in Canada, the firm have in addition a large stock of standard games, including checkers, chessmen, dominoes of all kinds, etc.

Several new things in card games are out this month. The game of Poker Dice is new. The pack contains 49 cards, the figures are pictures

front tube and sliding tube, with brass O.G.; fitted with 4-inch diameter plano-convex compound condenser in brass cell, and double combination achromatic front lenses (with large size lenses to the back combination), in brass mount, with rack and pinion adjustment, a 3-wick Russian iron paraffin lamp (with wicks 2 inches wide), and jointed Russian iron chimney. The net wholesale price of this line is \$9 each.

Another, No. 8, has the body of japanned tin, with dome shape top and handsome moulding on back door and also on the side door, the latter having a brass bound sight hole fitted with blue glass, japanned tin stage, with front tube and sliding O.G. tube made entirely of brass beautifully finished and lacquered, fitted with a 3-wick Russian iron paraffin lamp (with wicks 2 inches wide), jointed Russian iron chimney, and a 4 inch plano-convex compound condenser in brass cell, and double combination achromatic front lenses (2 inches diameter, 6 inches equivalent focus), in brass mount, with double pinions to the rack adjustment, and fitted with sliding shutter or flasher. The net wholesale price is \$16.50 each.

A splendid lantern for public entertainments is No. 15, the net wholesale price of which is \$25. The body of this lantern is made entirely of Russian iron, and is fitted with a brass cell for the condenser. The stage and front tube and sliding O.G. tube

denser in brass cell and double combination achromatic front lenses (2 inches diameter, 6-inch equivalent focus), in brass mount, with double pinions to the rack adjustment and fitted with a brass flap shutter having a

groove to carry shapes of colored glass for tinting slides. The lamp has wicks 2 inches wide, with a deep reservoir holding oil enough for a two hours' entertainment.

A JOB IN SLATES.

The Copp, Clark Co., Ltd., announce a job line of Peerless slates. They were a

of dice, and the four suits are of different colors. The rules are the same as for poker with dice. The price is \$2.40 per doz.

A new playing card is the New Era, prettily designed backs in delicate colors, artistic court cards, rounded corners, altogether a taking line. The price is \$3.60 per doz. The case is attractive.

The Little Duke toy cards are also a new line. They are artistically turned out in all respects, figures well drawn, high colorings, on the best boards, and neatly enclosed. The price is \$1.60 per doz.

"AMERICA'S BEST" SLATE.

The Copp, Clark Co., Ltd., have been appointed agents in Canada for the "America's Best" slates. The trade will find several important selling qualities in these slates. The slate itself is of high quality. The frame is very light, but is made stronger by the patent interlocking joint which ordinary hard usage cannot loosen. There is thus a considerable saving in freights, and the cases are very different in this respect from the ordinary case of slates.

A RANGE OF LOCK BOXES.

An attractive line of lock boxes is shown by the Copp, Clark Co., Ltd., and the firm believe they have the best range in the market. The boxes are fitted either with lock or slide, and attractively decorated with
