

NEW YORK ADVERTISEMENTS.

Reay's Envelope Patent Self-Feeding Folding and Stamping Machine. Capacity, 25,000 per day.

GEORGE H. REAY,

MANUFACTURER OF

ENVELOPES AND ENVELOPE MACHINERY,

DEALER IN AND IMPORTER OF

FOREIGN AND DOMESTIC PAPERS,

No. 77 John Street,

NEW YORK.

Extract from the "London Mechanics' Magazine," April 9th, 1869.

"The important economy of these machines is illustrated by the fact, that over two hundred of them are at present in operation in the United States, where they were originally brought out, and many others in England, France, and Germany. Two have recently been shipped to Egypt. Messrs. Waterlow alone employ six of these machines, which give every satisfaction. The mechanical arrangements are most perfect, and we believe this excellent apparatus only requires to be known, to be generally used for envelope making, by our leading manufacturing stationers."
