

RANGES, STOVES, & C.

X

ABOVE ILLUSTRATION SHOWS OUR NEW

Splendid "Buffalo" Oval Fire Pot Range,

WITH HIGH AND LOW CLOSETS. It has a very effective agitating grate constructed on entirely new principles, with a draw out drop centre, by the use of which all clinkers, stone, etc., are easily removed without disturbing the body of fire. This handsome range is fitted with every useful modern appliance; is fully trimmed with Nickel Knobs, Panels, &c. It is a splendid worker. While being cheap for a large six-hole Range there is no better article on the market. Will keep a good coal fire all night when needed.

We have other styles of High Shelves, which will give a variety of eighteen styles of Ranges in Nos. 8 and 9.

A Fine Profitable Line for every Stove Dealer to have.
