Excellent

I have the honour to refer to the discussions on the Saint John River which have taken place between representatives of our Governments, and to propose that our Governments undertake additional measures to ensure the continued protection and enhancement of the quality of water in the international section of the Saint John River.

On September 21, 1972⁰¹, our two Governments established by Exchange of Notes the Canada-United States Committee on Water Quality in the Saint John River. The Committee was to cooperate in water quality planning in order to ensure the protection and enhancement of the quality of water in the Saint John River, consistent with the provisions and objectives of the Boundary Waters Treaty of 1909. Simultaneously, the Committee was also established to advise on further measures to be taken to ensure the protection and enhancement of the quality of water in the Saint John River, consistent with the provisions and objectives of the Boundary Waters Treaty of 1909. The Committee was presented to the International Joint Commission in February, 1977. Subsequent to that time, the Committee has focused on a further review and implementation of the water quality objectives recommended in its 1975 Report, and such objectives were adopted in November, 1980, by the Committee.
