TECUMSERS TRY AGAIN Second Game for Minto Cup to Take Place To-day at Vancouver.

The Tecumsels will make another effort this afternoon to lift the Minto Cup. The team will be changed around considerably in an endeavor to at least score against the champion Vancouver team. Querrie will himself play inside home, with Durkin outside, moving McGregor and McDougall farther out in the field. 'A report says that Bun Clarke made the statement that if Tehe was on the defenders' team, the Indians would not score a goal. He was successful in the first game all right, and it will be interesting to read about his second attempt. While la-

Last Lacrosse of Season,

The final lacrosse game of the season will take place at Scarboro Beach this afternoon, when the final game of the Mann Cup series will be played between the Vancouver and Young Toronto teams. Vancouver go into the contest with a lead of five goals. Vancouver have been working out every afternoon, and Young Torontos finished up their work with a hard workout last night, and every member of the team appears to be in the pink, with the exception of Johnnie Powers, who was injured in last Saturday's game. Only one change will be made in the locals' line-up, Madill being placed on the defence, which will be moved out one to fill up the vacancy made by the retirement of Powers. It is sunderstood that the Vancouver twelve will remain intact from hast Saturday's game. Last Lacrosse of Season.

Spring Steel Plate before?"

Walpole

You know how quickly all other so-called pads become floppy when subjected to water, snow or slush, allowing the hoof to settle into the pad and bear on the corn or tender spots, athus causing lameness.

This spring steel plate coming next to the hoof with an even, firm pressure, overcomes this fault and positively relieves all soreness, tenderness, bruises or corns.

The Walpole affords the horseshoer an opportunity to regulate not only he frog, but sole and wall pressure to suit every individual foot. The rubber sunexcelled for its holding qualities on ice or wet surfaces wood, stone or
