

entirely by its own Faculty, composed of Medical teachers of long experience.

From its inception, "STABILITY AND EFFICIENCY, with PRACTICAL TEACHING IN EVERY BRANCH," has been the motto, and the basis on which the College has been, and will continue to be conducted.

The only modification made in this Institution for many years, was the passing of an Act by the Legislature in 1887, raising "Trinity Medical School" to the standing and dignity of a "Medical College," a position well earned by many years of successful teaching.

TRINITY MEDICAL COLLEGE WILL, MORE THAN EVER GO ON ADVANCING AND IMPROVING every Session, keeping well abreast of the rapid advances of science, and of the requirements of the medical profession, as laid down from time to time by the Ontario Medical Council.

Thoroughness in TEACHING—making it as PRACTICAL AS IT CAN BE MADE in every Department, and PUNCTUALITY and ZEAL in all College work, will as heretofore, be steadily maintained in view of the high position this Institution has gained by continued strict attention to these fundamental essentials of a sound medical education.

All the lectures, except those on Clinical Medicine and Clinical Surgery are delivered in the large College Building, situated in the immediate vicinity of the Toronto General Hospital. This College has found it essential to medical students, and a great saving of their valuable time, to have the lecture rooms where they are taught the nature of disease, AND ALL THE BRANCHES OF SCIENCE RELATED TO MEDICINE, as close as possible to the General Hospital. The Clinical teaching is all done in the Hospital. Very special attention has been paid to the fitting up of the Lecture and Dissecting Rooms, Laboratories, etc. They are large, exceedingly well lighted, and contain every appliance required for Practical Teaching.

One of the largest rooms in the College, and well lighted from the ceiling, is set apart for the Museum; and the Reading Room is well supplied with the leading journals and papers. The Faculty continue to make every improvement necessary for the comfort and convenience of the constantly increasing number of students in attendance. To meet the requirements of the increasing Anatomy classes, the new Dissecting Room was built. It is spacious—lighted from the ceiling, and, for SANITARY REASONS IS ENTIRELY SEPARATE FROM THE REST OF THE COLLEGE BUILDING. Large additions have been recently made to it comprising
