a large and complete assortment of  
**Boots, Shoes and Rubbers,**  
which will sold at lowest rate for cash.

**WASHINGTON LETTER.**  
[From our regular correspondent.]  
Washington, D. C., Nov. 19

To resume or not to resume is a question which agitates financial circles a good deal just now. Of course Secretary Sherman proposes to resume January 1, and the banks are taking account of stock to see where things are coming out. Many sensible men among the resumptionists begin to realize the difficulties to be encountered, as the time approaches. Sentiment aside, and practical results alone considered, there seems to be some common sense in the reasoning of Gen. Butler, as reported from an interview in New York about it after the election. "Tell me how far \$135,000,000, and I will tell you how I think resumption will succeed," remarked old "eye-see," as a French newspaper calls him, and he then proceeds to indicate the way he expects it to work, in the following language: "Suppose gold stays at its present premium, 1 of 1 per cent. If it is not handy for you to present your greenbacks at the Treasury on the day of redemption, you can take them to a broker and get gold for the premium, and a slight commission or without any premium if the Secretary is redeeming as fast as presented. When it only costs you a little over a dollar to insure \$1,000 worth of greenbacks, being as good as gold, you will insure, won't you? If resumption wins you will not have lost so much as you pay for silver in a day on every thousand dollars, and if resumption doesn't win you will have made money, how much you don't know. So there will be a rush to get the gold, and when it is got the owners will make special deposits of it at once. The greenbacks will go into the Treasury and—there, because there is no way to get them out, and the gold will be hoarded or go into the bank as special deposits, and stay there. Just so much withdrawn from circulation. Now imagine \$100,000,000 to be taken out of the circulation of the country to-morrow. What would happen? Don't you think there would something that could be heard? But that isn't all of it. The National banks admit to having twenty-two hundred millions of deposits. Everyone of them will want gold. Resumption to be successful must include the whole mass of deposits, circulation and greenbacks. A man with \$100,000 on deposit asks for gold. It can't be given him; so he draws it out and takes it to a broker—of which there will be thousands spring up—and sells for gold. How long will Sherman's \$135,000,000 stand in such a storm? Only the other day he called on the National banks for \$3,700,000 of the \$45,000,000 which they have on deposit as the proceeds of the four per cent. The banks appear to apprehend that this result will transpire, in some degree at least, and a committee of New York bankers have just been in consultation with Secretary Sherman devising means to make the supply of gold and legal tenders meet the demand. After January 1, silver will be received by the banks only as a special deposit, that is the depositor must agree to take it back again in payment of his drafts upon the bank.

**WASHINGTON LETTER.**  
[From our regular correspondent.]  
Washington, D. C., Nov. 19

command; a trunk into which a man gets only to be discovered somewhere else; "do not which strike and bells which ring with no other viable motive or cause than the word to do or not to do." The second night mystery, in which he is assisted by Miss Heller, is a thing beyond all comprehension. Next week we are to have Kiraly's spectacle of "Around the World in Eighty Days," which has lately been the sensation in New York and Philadelphia. As the city is filling up with strangers, no doubt manager Ford will achieve the success he deserves and his pockets fill with ducaats. People must be so amused and they know a good thing when they see it.  
DOM PREGO.

**Suicide by Starvation.**  
REMARKABLE DETERMINATION OF CONRAD KAPP, A GERMAN MECHANIC—HIS DEATH FROM STARVATION, A MATTER OF BUT A FEW DAYS.  
Conrad Kapp, a German, residing in Keokuk, Indiana, is undergoing a slow process of suicide by starvation. He is a capitalist by trade, and until recently had been employed in the car shops of the Keokuk & Des Moines Road. When it became known in July last that the road had been leased to the Chicago, Rock Island & Pacific, and that there was a probability that the shops would be removed from Keokuk, Knapp expressed a fear that he would be thrown out of a job during the winter, and that his family would starve to death. This idea seemed to be uppermost in his thoughts, and he weighed upon him until it began to affect his mind. It grew upon him, and his services in the shop became of so little value that it was necessary to discharge him. This made him worse, and he became a monomaniac on the subject of starvation. He refused to eat or drink, and for fifteen days not a morsel of food or a drop of water has crossed his lips. For two weeks previous to that his diet consisted exclusively of an apple occasionally and a drop of water. His friends have endeavored by every possible means to induce him to eat and his physician has tried to persuade him to take medicine and nourishment, but all to no purpose. He stubbornly refuses to take anything or have anything done for him. When urged to do so, his only response is that it is too late. With the view to ascertaining whether he does not go to the cupboard at night and get something to eat, he has been watched, but it has been found that he does not. The nearest he has been induced to take anything at all was on Monday evening, when he dipped his finger into the water bucket, but, pausing a few minutes, wiped his finger on his pants and went away. Another singular feature of this case is that for over four weeks, he has neither taken his clothes off, gone to bed or slept. He sits in his chair all the time and when completely overcome dozes for ten or fifteen minutes but never longer. Keating is very much reduced from his long fasting. When in health he would weigh 150 or 160 pounds, but he now weighs less than 100. His flesh is dry and wrinkled and his stomach is shrunken so that he does not measure more than five or six inches through. Before his recent affliction he was one of the jolliest men in town, and was always joking and laughing. He formerly taught exacting such perfect work that his work has been very steady and regular. His name has been in the papers for some time. His case is one of the most remarkable on record. The physician says that the regular probable cause for him to take food now and that he cannot possibly survive many days longer.

**Lost Arts of Women.**  
It is possible that in olden times too much stress was laid on the importance of training girls to mend and darn so exquisitely that it would be difficult, almost impossible, to discover that there had been any necessity for the labor; but if there was any error in teaching such exacting such perfect work it was a fault "that leaped to virtue's work" and beyond all comparison better than the wretched "botching" to be found on the garments of some—many—of the girls of the present day. Laundresses that wash for school girls could make strange revelations of neglect of garments and careless repairs. We are not their lips sealed through fear of losing good customers. When a broken stick is allowed to go on uncorrected for until it has become so large that the stocking cannot be worn without some repair, and is then drawn up into an ugly bunch—"and enough" to blister the feet—instead of being nicely darned; or when a tear or rip on dress or undergarment is pulled together with thread coarse enough to injure the fabric, who is to blame—the mother or the daughter? What instruction has ever been given the young girl about looking out for the beginning of evil in her wardrobe? Has she been taught to darn or to mend every rent or rip the first possible instant after it was discovered, and to do it neatly? Oh, no! Her music or drawing lessons, her French and German and dancing, are apparently of more importance than such useful work as mending or darning. If a young lady has what is called a "good" dress, or a very nice dress, she should go to the mother or the daughter? What instruction has ever been given the young girl about looking out for the beginning of evil in her wardrobe? Has she been taught to darn or to mend every rent or rip the first possible instant after it was discovered, and to do it neatly? Oh, no! If a young lady has what is called a "good" dress, or a very nice dress, she should go to the mother or the daughter? What instruction has ever been given the young girl about looking out for the beginning of evil in her wardrobe? Has she been taught to darn or to mend every rent or rip the first possible instant after it was discovered, and to do it neatly? Oh, no! Her music or drawing lessons, her French and German and dancing, are apparently of more importance than such useful work as mending or darning. If a young lady has what is called a "good" dress, or a very nice dress, she should go to the mother or the daughter?
