

THE EXHIBITION.

Attendance Already Away Ahead of Last Year's Grand Total.

A Magnificent Programme of Outdoor Attractions Afternoon and Evening.

SATURDAY.—(Continued.)
EMERSON & FISHER'S have a large display under the gallery of the annex of the products of the Enterprise foundry of Sackville, flanked by a couple of manatees and grates of their own exhibition. The display is a creditable one and is well arranged. Prominent positions are accorded to the Royal Art range, the Jewell cook and the Prince Royal, while features for rooms, parlors, etc., are featured more or less conspicuously. A plentiful supply of advertising matter calls attention to the fact that the firm's place of business is on Prince William street.

The honey producers of New Brunswick are not to be left far behind. They have a display of their products, including honey, beeswax, and other articles. The display is well arranged and attractive.

THE PRIZE LIST.

HORSES.

In this important department of the exhibition the entries were large when it is taken into consideration that the new rule providing that horses that have taken prizes for two years at previous exhibitions of this association will not be eligible for cash prizes, had the effect of deterring many fine animals that had come to be regarded as annual offerings, and whose presence contributed greatly to the elevation of the show. The rule, while perhaps seeming harshly with some horsemen who have the cause of exhibitions to heart, is intended to induce more general competition on the part of farmers, etc. Had the rule obtained general publicity the number of horses this year would have been considerably larger than it is. Its good effect will be felt at the next exhibition. The award prizes included about 75 animals, divided as follows: Thoroughbred running horses, 4; standard bred, 10; carriage horses, 14; roadsters, 6; saddle horses, 4; agricultural horses, 12; heavy draught horses, 7; Clydesdales, 3; English shire, 1; Percherons, 2; poms, 1. The Suffolk Punch and Hackney classes did not fill, and the judge on consultation with a veterinary surgeon decided that the Percherons were not worthy of a prize. The awards taken by provinces fell as follows: 1st prize, New Brunswick, 23; Prince Edward Island, 2; Nova Scotia, 2. Second prizes, New Brunswick, 12; Prince Edward Island, 3; Quebec, 1. Third prizes, New Brunswick, 6; and Prince Edward Island, Nova Scotia and Quebec 1 each.

CATTLE.
 The display of cattle is pronounced by all visitors, expert as well as amateur, one of the finest and best ever seen in the maritime provinces. Americans and Upper Canadians who have inspected the array are loud in praise of the gathering, which they say would do credit to any of the New England States or Upper Canada. There are between 400 and 450 animals on the ground, and of these the dairy breeds largely preponderate over beef cattle. Of the latter, the Polled Angus are all from Quebec province, the Galloways and Guernseys all from Prince Edward Island, and the Devons all from Nova Scotia, while George A. Perley of Maugerville, Sackville, contributes the entire exhibit of Jersey cattle on the ground. Mr. Perley's cattle are splendid types of their class, and go to show what a general farmer, who has a taste for stock raising, can do on a St. John river farm. Mr. Perley makes no pretensions to fancy farming, but judging by his exhibits he can give cards and spades to a great many of the called scientific tillers of the soil. The exhibitors of Mr. Perley of Cookshire, Quebec, and Mr. Carr of Compton, in the same province, contribute valuable factors in the general show, and their presence made the competition much keener in several classes. As Nova Scotia and Prince Edward Island were also on hand in force, whatever prizes New Brunswick stock men carried off were so much the more to their honor.

The best bred exhibits comprise 55 Shortorns, 26 Herefords, 4 Devons, 12 Polled Angus, 12 Polled Norfolk and 10 Galloways.

The dairy breeds include 88 Ayrshires, 72 Jerseys, 31 Quebec Jerseys, 20 Guernseys and 27 Holsteins.

The grade exhibits are: Beef grades, 15; Dairy grades, 27; fat cattle, 19.

The prizes, taken by provinces, in the dairy breeds were: Jersey, 1st, 2nd, 3rd, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 14th, 15th, 16th, 17th, 18th, 19th, 20th, 21st, 22nd, 23rd, 24th, 25th, 26th, 27th, 28th, 29th, 30th, 31st, 32nd, 33rd, 34th, 35th, 36th, 37th, 38th, 39th, 40th, 41st, 42nd, 43rd, 44th, 45th, 46th, 47th, 48th, 49th, 50th, 51st, 52nd, 53rd, 54th, 55th, 56th, 57th, 58th, 59th, 60th, 61st, 62nd, 63rd, 64th, 65th, 66th, 67th, 68th, 69th, 70th, 71st, 72nd, 73rd, 74th, 75th, 76th, 77th, 78th, 79th, 80th, 81st, 82nd, 83rd, 84th, 85th, 86th, 87th, 88th, 89th, 90th, 91st, 92nd, 93rd, 94th, 95th, 96th, 97th, 98th, 99th, 100th.

HORTICULTURAL DEPARTMENT.

D. H. Knowlton, judge of fruits, one of the foremost practical authorities of New England on this subject, at the conclusion of his labors sent a letter to the executive head of the exhibition, of which the following is an extract:

"Your exhibition more than ever impresses my mind with the excellence of your organization and the high educational character of your exhibits. The visitor beholds these things and carries away with him some knowledge he did not have before and of the great busy world of industry and the subjects of nature among which he lives."

"The fruit exhibit is of excellent quality, better than the two previous years, though the large collective exhibits then shown were missing. It was difficult to judge these exhibits with justice to the exhibitors, as some have been large and some small, and the small ones are quite likely to be the best. Some of the larger horticultural societies in the states have stricken most of the premiums for collective exhibits from their lists. They argue wisely that such premiums have a tendency to drive away the small growers."

"There has been a marked improvement in the care shown by exhibitors in handling and displaying their fruits. While there are some who are confused in regard to the names of the fruits they raise there is much less inaccuracy in the names than two years ago."

"As fruit growing becomes more of a commercial industry we may hope
