MR. MURPHY'S BAD BREAK.

Mr. Murphy says that the Conservative papers pub- Murphy's Toronto speech. ish misrepresentations and even falsehoods. The of-dence of the Government journals is that they all fail to refute these false accusations, while some of them too often admit their truth, and the Globe even goes so far

The first is the Hodgins charges concerning which
Mr. Murphy is thus reported:—The falsehoods of the

Peary did not leave his ship at Etah, but worked her north to Cape Sheridan, a point not far from the northern extremity of Grant Land, which seems to be a Sheridan he spent the winter. He was as near the pole as Dr. Cook would be when he sent his Eskimos and we agale to start in sledges February 15.

Mr. Marphy is thus reported.—The falseholods of the "Tory, greas gu these matters continued day after day "and she Labend press had bell tiltle to say on the she will be shered and a series of the Tory greas and severe costing obtained. The charges were a love and choose of the state of the single transcribed and present calculations and the committee, endorsed by a party vote in the Mouse. The charge made by Maylor Holeius was reported.

The shows that its consequence of the correct charges of the party of the par

which might apply for a charter to do any unlawful or immoral act. There is no doubt that Toronto opinion supports the Globe, and will resent the minister's reproach.

The next two charges are against the Liberal organ alone. Mr. Murphy says:—"Later on the Globe started "in to pat Sir James Whitney on the back. It said he "had put forth and was carrying out some fine policies." The ravincial elections, it finds that it suddenly has to "change front. It finds that it suddenly has to "change front. So sudden, though, is the change that "charge front. So sudden, though, is the change that "charge front. So sudden, though, is the change that "the average reader is not able to turn so quickly."

They were not able to get the ship out for nearly three months.

According to Dr. Cook's story he arrived at Etah April 15 of this year after reaching the pole and spending the following winter at Jones Sound. That would be while Peary was returning from the pole to his ship to govering the polin referred to by Justice Cullen, and then Dr. Bandel rovel the following winter at Jones Sound. That would be while Peary arrived at the Greenland rendexvous that he would not be until Peary arrived at the Greenland rendexvous that he would hear the story of the Eskimos who had been in the other party.

Commander Peary makes the statement that Professional or the pole. That is the time that he would hear the story of the Eskimos who had been in the other party.

Commander Peary makes the statement that Professional or the pole. This would indicate that the profession and amend entor was made to the Sanitary Code overring the pole and spending the following winter at Jones Sound. That would be until pearly arrived at the Greenland rendexvous that he would hear the story of the pole that it could not be until Peary arrived at the Greenland rendexvous that he bold otherwise than that this restriction or regulation of the Board of Lavors and the policies would learn of Dr. Cook's claim to have discovered the bold otherwise than that this

and sought the same legislation. It was a clear in

appears to think that Mr. Gibson's connection with the
concern should be enough to make the Globe at traitor
to what it believed to be true and right.

Mr. Murphy has the advantage of the Globe in
the last charge:—"Then along comes a man and makes ac"Sus charges against the Minister of Public Works, Hon"Mr. Pugsley. Next morning the Globe promptly retires
"Pugsley, saying that no doubt he will make quite as

It was not the personal charges against Mr. Pugs-

ey which caused the Globe to say that he ought to re-sign. The advice was given after the documents were produced. But it is true that when Sir Wilfrid Laurier aid he and his colleagues were proud of Mr. Pugsley, the Globe found a place to fall. Mr. Murphy could not make much of a case against the Globe if it stood by its lark declaration.

Finally Ma Murphy comes in with something characteristic. Referring again to the race track campaign to minister said:—"A very prominent Liberal in private life, a man who is a great friend of mine and of the Liberal party at large, comes to me and says, 'Did you 'see that? What do you think of it? Do you see "the way the Globe is slating you and Mulvey?' I said 'yes.' 'Well,' said he, 'do you know what I think? Do "you know the reason that they have attacked you and "not other people concerned with that matter? It's 'because you and Mulvey are Catholics.'

"Now, gentlemen, I don't believe that. I know for 'a fact that that is not true. I told the man so, but how many people will not think or hear the same story, and 'to how many of them would I be able to talk and say 'that is not the truth?

"Do you see the harm that that did?"

This is an appeal borrowed from Mr. Brodeur and

This is an appeal borrowed from Mr. Brodeur and his organs. When the Minister of Marine is criticized, or when his department is found to be sodden with graft, Mr. Brodeur and his organs tell the people of Quebec that he is assailed because he is French. Mr. Murphy takes this way of intimating to the Globe that it is referred by the real by source the Globe will be according to the control of the Globe will be according to the control of the Globe will be according to the control of the Globe will be according to the Glob if it reflects further on his course the Globe will be ac-cused of intolerance, and appeal will be made to Catholics against the Globe and its friends.

There was much surprise when Mr. Murphy, a mar Hon. Charles Murphy, Secretary of State, has a grievance against the press. He expressed it on Wednessey at the annual meeting of the Ontario Reform Association, where he was the principal speaker. Several ministers have from time to time complained of the Conservative newspapers, but Mr. Murphy departiced from the custom and bestowed his censures on the Liberal press. The Toronto Globe was the particular offender, but all the journals of the party were criticized.

Mr. Murphy says that the Conservative papers publications are made and surprise when Mr. Murphy, a man who had never been in Parliament, and who as a private person could not expect a nomination anywhere, should have been called to the ministry over the heads of experienced and able members of his own race and faith. Those better acquainted with the conditions knew that Mr. Murphy had long been an intercessor between contractions and the support of influences not wholly unconnected with campaign funds. But those who do not find these circumstances sufficient, will be still more at a loss after Mr. Murphy says that the Conservative papers publications are presented in the particular of the ministry over the heads of experienced and able members of his own race and faith. Those better acquainted with the conditions knew that Mr. Murphy had long been an intercessor between could not expect a nomination anywhere, should have been called to the ministry over the heads of experienced and able members of his own race and faith. We get a better idea of what is the matter with Mr. Murphy when he gives illustrations. There are in his bill of particulars.

There are leaves to attack the Government on its own account. Such its the pole he reached Etah in Greenland, August 1, 1908. This is the place where Dr. Cook had passed the previous with remaining to the pole he reached Etah in Greenland, August 1, 1908. "the average reader is not able to turn so quickly."

This only means that the Globe, though a Liberal organ, was obliged to commend Mr. Whitney's course in many things. The Provincial Premier's course was so eminently honest and wise that even the Globe was tonstrained to praise. When election time came the Globe changed its tone as Mr. Murphy says. That is where the Globe went wrong.
