

who have respectively been life members for the long period of 47 years; and of Mr. C. W. Wilson, a life member of 21 years standing.

We deeply regret also having to record the death of our highly revered Patron, the late Right Reverend Dr. Williams, Lord Bishop of Quebec, who for nearly thirty years filled that position, ever a warm friend of the Society, and who frequently appealed in aid of its funds at anniversary services, contributing also of his own means to its charitable work. The Society attended his funeral in large numbers last St. George's Day, thus testifying to the love and esteem in which our good Patron was held.

Five new members have been added to the roll, three life and two ordinary. The resident membership now stands at 132, of whom 59 are life members. Four of the new members are non-residents of Quebec, showing that much interest is taken in the Society by Englishmen residing in other parts of the Province. Your Committee would again urge upon all, the need of securing new members to fill up losses by death and other causes. We receive very few members voluntarily, by some exertion on the part of present members many might be obtained. We are much pleased to note a larger attendance at the meetings of the Society than formerly, thus showing increased interest in its work.

The directors of the Mount Hermon Cemetery have, since the last report, accepted the Society's offer of \$200 for the the vacant lot and path adjoining the Society's lot, this amount to be paid in four annual instalments, the first of which has already been paid, as shown in the Treasurer's statement.

Your Committee wish to place on record the valuable aid rendered at various times by the Revd. A. J. Balfour, Miss A. Healey and Miss Latimer, whose kindly offices have been much appreciated by the Sub-Committee of Charity.
