The Reason.

Grandma Gruff said a curious thing, "Boys may whistle, but girls must sing." That's the very thing I heard her say To Kate, no longer than yesterday.

"Boys may whistle." Of course they may, If they pucker their lips the proper way; But for the life of me I can't see Why Kate can't whistle as well as me.

"Boys may whistle, but girls must sing;"
Now I call that a curious thing.
If boys can whistle, why can't girls, too?
It's the easiest thing in the world to do.

So if the boys can whistle and do it well, Why cannot girls—will somebody tell? Why can't a girl do what a boy can do? That is the thing I should like to know.

I went to father and asked him why Girls couldn't whistle as well as I, And he said, "The reason that girls must Is because a girl's a sing-ular thing."

And grandma laughed till I knew she'd ache
When I said I thought it all a mistake.
"Never mind, little man," I heard her say,
"They will make you whistle enough some

-108080 As to Pins.

The following is a literal copy of a composition written by a Georgia schoolboy, the original of which is now in my possession. With all its crudeness the essay shows considerable honest effort to learn and give facts relating to the subject, "The pin,"

"What is it?" asked several at once.
"You will see," said Frank. "Who
has a wood saw?"

"I have." "So have I," replied three of the boys. "Get them then, and you, Fred and

Tom each get an axe, and I will get a shovel. Let's be back in ten minutes.'

The boys all started to go on their several errands, each wondering of what use wood saws and axes and shovels could be in play. But Frank was much liked by all the boys and fully believed in what he said, and they were soon together again.

"Now," said he, "Widow Brown, v/ho lives in that little house over there, has gone to sit up all night with a sick child.

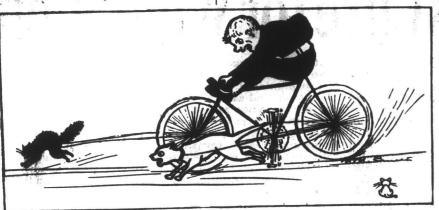

"A man brought her some wood today, and I heard her tell him that, unless she got someone to saw it tonight, she would not have anything to make a fire with in the morning.

"Now we could saw and split that pile of wood just as easily as we could make a snow man on her door-step, and when she comes home she will be greatly surprised."

One or two of the boys said they did not care to go, but most of them thought it would be fine fun.

It was not a long and tiresome job for seven strong and healthy boys to saw, split and pile up the widow's halfcord of wood and to shovel a good

When they had done this, so great was their pleasure that one of them, who had at first said he would not go, proposed that they should go to a car-Lenter shop near by, where plenty of

which was selected by the teacher: 'A pin is a very useful apparatus invention. It is very useful to the people of the United States as well as the people of other countries in Eurcre. It is used in pinning dresses and other toilets. The pin is very cheap in this town, and other counties of Georgia. They are 2 or 3 packs for 5 cents, and sometimes sold for 4 or 5 packs for 5 cents. Pins were first used in Great Britain, and they were first made of wire in 1540. Brass ones were imported from France by Catherine Howard. At first pins were made by filing a point of proper length of wire. In some parts of France the thorns are still used as pins. Supposing a boy was climbing a fence and he accidentally tore his coat, and he was scared his mother would whip him if she would see that whole in his coat, but if he had met another companion of his on his way home, and this boy had a pin, of course the boy would feel better, and go home on a sly, and slip in the house without seeing his mother. Some days after this the boy's mother would notice the whole in her son's coat, of course the boy's mother ask him about this whole, and the boy tell his mother the truth about this, of course the boy feels better after this, and after the boy receives a whipping he meets the boy that gave him the pin and thanks him. This is the good of a pin."-Truth.

Having Some Fun.

"Now, boys, I will tell you how we can have some fun, said Frank to his playmates, who had come together one bright moonlight evening for sliding and snowballing.

shavings could be had, and that each should bring an armful.

for another's.

They all agreed to do this, and when they had brought the shavings, they went to their several homes, more than pleased with the fun of the even-

The next morning, when the tired returned from watching by the sick bed and saw what was done, she was indeed surprised, and wondered who could have been so kind.

Afterward, when a friend told her how it was done, her earnest prayer, "God bless the boys!" was enough of itself to make them happy.—Our Dumb Animals.

Rules of Business.

Asuccessful eastern man is said to have given the following as the rules he has tried to follow in the government of his own life. It cannot now be recalled that any more comprehensive formulation of affirmative and negative guides for conduct have ever been given.

Do everything well.

Do more than is expected of you. Do things better than other people would do them.

Do your work as if it were a pleasure to do it.

Do exactly as you agree to do. Do some little kindness every day. "Do unto others as you would be done by.'

DON'T.

Don't drink. Don't swear.

Don't tell a lie.

Dont' run into debt.

Don't shirk your task. Don't stay out nights.

Don't be too independent.

Don't be late at your work. Don't think you know it all. Don't hold your head too high.

Why Should Not Your Span of Life be Three Score Years and Ten

The key-stone to a long span of life is health, and with health any man or woman may reasonably expect to attain a ripe old age.

Yet how many newadays do so?

How many fall ere they are half way across Life's Bridge? Alas! only too many! But there is no need for this. Any man or woman CAN, if they will, increase the length of their span of life, if they will only see that the span is fitted with a good Key-stone.

THE KEYSTONE

One drop of prevention is worth a dozen bottles of medicine. Therefore, see that the key-stone of your life is secure and strong. Look after your health. Electricity is the greatest force known to man. It outrivals the force of Niagara even, and without it man cannot live. In his daily work, be it in the office, the workshop, or the field, man is constantly using up his natural supply of Electricity. The more strenuous his life, the more electricity he needs to enable him to live to a hale and hearty old age.

Perhaps in his youth he has been prodigal.

"The excesses of youth are drafts on our old age; payable with interest about thirty years after date."

(As Colton, the eminent, said).

Therefore, see that YOU, who read these lines, have no drafts still unpaid.

Store up your Electricity by wearing

DR. MACDONALD'S ELECTRIC BELT

It will save you from many an anxious moment, and many an hour's pain and sickness; to say nothing of hard cash. If you feel tired and heavy; if you liver is not acting properly; if you have kidney trouble or rheumatic pains; if you have lost your manly vigour; do not hesitate a moment, but get my Elec-

TRIAL FOR NINETY DAYS

Not a copper down; simply drop me a postal with your name and I will forward you, at once, one of my latest Improved High Grade Electric Belts Free. You can use it three months, then pay me if cured, and the price will be only half what others ask for their inferior belts. If not cured, you return the Belt to me at my expense. I am willing to trust any responsible person entirely, knowing that I have the best and most perfect Belt ever invented, and nine me in ten always pay when cured.

I WILL TRUST YOUL—This readers Belt to the column and I will the state of the column.

men in ten aiways pay when cured.

I WILL TRUST YOU.—This modern Belt is the only one that generates a powerful therapeutic current of electricity without soaking the battery in vinegar as all other belts do, and it is guaranteed never to burn. It is a certain and positive cure in all cases of Rheumatism, Varicocele, Dyspepsia, Losses, Weak Back, Nervousness, Kidney, Liver and Stomach Troubles and Weakness brought on by abuse and excess.
