

United States 157 per cent. In Rhode Island the divorces average one to every twelve marriages, in New Hampshire one to eleven, in Connecticut one to eight, and so on, while in Arapohoe Co., Colorado, which contains Denver, there was in 1883, one divorce to every 3.89 marriages. Think of it! One couple divorced in every four married; and throughout the Union about 25,000 homes are broken up every year by divorce.

CANADA.

Compare that awful record with Canada where, thank God, divorce is rare, on account of the strong Catholic influence which prevents legislation on the subject.

In Quebec, Ontario, Manitoba and the N. W. Territory, divorce is only granted by special Act of Federal Parliament, for adultery, impotency, or if voidable through nonconsummation; divorces, beyond these causes granted to Canadians in the United States, who have gone there for that purpose, are void, and if the parties enter into fresh unions they can be prosecuted

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.
