NEW AMERICAN WITH BEAN HARVESTER ATTACHMENT.

The Bean Harvester is an attachment which is easily put on to the New American Harrow and Cultivator after removing the sections. It pulls two rows of beans at once, leaving them in a perfect windrow, and harvesting from 12 to 18 acres in a day. This machine is indispensable to bean growers, and is highly recommended by all who have seen it. As a harrow its work is perfect; the teeth have reversible points and can be locked down or allowed to float. As a cultivator the New American has no equal; it cultivates perfectly all crops planted in rows, and with the Extension Arms two rows of beans can be cultivated at once. We sell the New American either as a cultivator or bean harvester. If you have one of the machines you can obtain the attachments for making the other at a small expense.

Knives can be Locked in any Desired Position.
