**Sharples Tubular SEPARATORS**

**Only Bowl With Proper Bearing**

All "bucket bowl" separators have incorrect bearings. The bowl is set upon the spindle and held upright by rigid bearings. Such bowls are top heavy, inclined to wobble, sure to bind.

Tubular bowls, only, are properly supported, being suspended from and turning upon a single ball bearing. A breath almost turns them. They cannot wobble or bind. Catalog L-198 tells all about them.
