Highest endorsements. Fine CATALOG, the Taxidermy Magazine, and full particulars FREE for short time. WRITE FOR THEM TODAY.  
**THE N. W. SCHOOL OF TAXIDERMISTRY**  
48 R Omaha, Nebraska.

### THE SPICE OF LIFE.

Bill Nye late one night entered a fashionable New York hotel and asked for a room. He looked seedy, so the be-diamonded clerk told him there was only one room left, and that under the cornice, and that he'd have to pay in advance.

"Oh, all right," was the humorist's reply. He wrote his name in the register and pulled out a heavy roll of yellowback bills. When the clerk saw the roll and the name, a great light dawned on him.

"By the way, Mr. Nye," he said, with sugar in his voice, "come to think of it, we have an elegant room on the second floor you can have. I'd forgotten."

"Oh, all right," said Nye. "But do you know," he continued, "you remind me of Clay."

The clerk swelled and answered: "Why, no; I don't think anyone ever told me that I looked like Henry Clay."

"Oh, not Henry," responded Nye, "not Henry; just common ordinary clay, you know—mud."

An American newspaper man was reciting some of his early experiences the other day to a group of veranda listeners, and said: "When I was a youngster, writing all sorts of stuff for a small paper in the West, I made some weird blunders. I was to write an account of a wedding, and had heard that it had been a quiet affair. So in a hasty fashion I wrote that owing to a recent bereavement in the bridegroom's family, there were only relatives present. But I discovered too late that the bridegroom was a widower whose first wife had died only six months before his second matrimonial venture. Perhaps I didn't hear about it from the chief, for the bridegroom was his greatest political friend, and explanations were awkward."

### THE BOON OF HEALTH.

Health is a boon we value most  
When nearly giving up the ghost.  
'Tis only when we feel we're sinking,  
We're satisfied to do some thinking  
Of how we should ourselves behave  
In order best ourselves to save  
From neurasthenia's dire perdition,  
Abysses deep, where no contrition  
Can rescue from the pangs and woes  
Of gout and rheumatismal throes.  
Turn, sinner, while 'tis called to-day,  
Turn quickly from your sins away,  
And follow Nature's laws so true;  
There's joyous health in store for you.  
Come, turn your steps toward Nature's ways,  
And comfort find, and length of days.  
—K., in Good Health.

### WHAT A HORSE WOULD SAY IF HE COULD SPEAK.

Don't hitch me to an iron post or railing when the mercury is below freezing.  
Don't compel me to eat more salt than I want by mixing it in my oats. I know better than any other animal how much I need.

Don't think because I go free under the whip that I don't get tired.

Don't think that because I am a horse that iron-weeds and briars won't hurt my hay.

Don't whip me when I get frightened along the road, or I will expect it next time and maybe make some trouble.

Don't trot me up hill, for I have to carry you and the buggy and myself too.

Don't keep my stable very dark, for when I go out into the light my eyes are injured, especially if snow is on the ground.

Don't say "whoa" unless you mean it. Teach me to stop at that word.

Don't make me drink ice-cold water nor put a frosty bit in my mouth. Warm the bit by holding it a half minute against my body.

Don't run me down a steep hill, for if anything should give away I might break your neck.

Don't put on my blind bridle so that it irritates my eye, or my forelock that it will be in one of my eyes.

Don't be so careless of my harness as to find a great sore on me before you attend to it.

Don't lend me to some blockhead that has less sense than I have.—[Successful Farming.

### Take a Look at a Farm Fence Worth Building

Ideal is the recognized standard fence for Canadian Railways. Railroads build fences for permanence. Canadian farmers are buying more Ideal Fence to-day than any other make. They keep our two factories busy, turning out fence at the rate of 30 miles a day. You see this fence everywhere you go. You know there must be reasons. Just take a good look at it as shown above and read the argument for buying

### IDEAL FENCE

Looks strong, doesn't it? It is strong. It's made to last. All made of No. 9 hard steel wires, both horizontals and uprights. Heaviest fence wires used. It adjusts itself in extremes of temperature. That's why Ideal fence always stands up erect. The lock which is used at every intersection of wires is shown in lower left hand corner. Neither climbing over nor horning, nor crowding, nor anything else can make the wires slip. It is not a fence that gets holes in so cattle and horses can poke their heads in and hogs root their way through. You can't tell about the galvanizing from looking at the picture but look at the fence itself for that. More heavily galvanized than any other. Easy to build, fits any surface, hilly or level.

### Is the Argument sound?

People who have investigated it answer yes. That's why so many are buying it. Take a little time to think of the *consequences* of good fencing before you buy. The Ideal has all of them. We know you'll want Ideal when you know about it. Write for our book about fencing, FREE.
