Choice young stock from imported prizewinning stock for sale. **GEO. M. SMITH, HAYSVILLE, ONT.**

**QUESTIONS AND ANSWERS Miscellaneous.**

**RHEUMATIC PIGS—CURB.**

1. Would you give advice on how to treat pigs crippled with rheumatism? Have been in a warm building, with plenty bedding, with all winter's manure under them. They appear to be in terrible pain.

2. A horse, eight years old, has a small curb on back of right hind leg.

R. C.

Ans.—1. The pigs should not be on their winter's manure. Lying on manure is a prolific cause of pneumonia, rheumatism, and other ailments to which swine are subject. Clean out the pen, and re-clean it once a day. Keep well bedded with clean, dry straw. Feed on skim milk, shorts and crushed grain. Keep a mixture of salt, ashes and charcoal before them in a box, or scattered three times a week on a clean part of the floor. Arrange a yard where they can run out daily on a clean grass plot, and lie on straw in a sunny spot. Get rid of them as soon as possible. Rheumatic pigs make unprofitable gains. Indeed, it is a question whether it would not be better to make fertilizer of them at once.

2. Get him shod with high-heel calkins to ease the tension on the ligament. Blister as follows, once a month until the enlargement disappears: Take 1 1/2 drams each binioidide of mercury and cantharides, and mix with 2 ounces vaseline. Clip the hair off the part; rub well with blister; tie so that he cannot bite the part. In 24 hours rub well with the blister again, and 24 hours later wash off and apply sweet oil. Let his head loose now, and oil every day. It will be better if he is allowed to rest.

**FEEDING CALVES WITHOUT MILK—COMPUTING PAYMENTS.**

1. Tell me the best method of feeding heifer calves for dairy purposes. I have no skim milk because I am selling whole milk to city, but I could spare some new milk instead. Would you advise feeding oil cake cooked or not along with new milk and water?

2. How much per year would a person have to pay for a farm costing \$4,500, said farm to be paid for in twenty years, and the interest at the rate of 5 per cent.? Please calculate the interest and principal for each year. G. W.

Ans.—1. Cocoa-shell milk, made by the boiling of about one-quarter of a pound of cocoa shells in two gallons of water, and fed at the rate of from one and a half to two gallons per day, along with bran, oats, oil meal, hay and green feed, makes a very good substitute for milk, and is worthy of a trial by those who wish to rear calves with little milk. Taper them gradually from milk to the cocoa-shell decoction. Adding a pint of new milk to each calf's daily ration till it is several months old will pay well. Another fairly-good plan is to dilute the milk with clover hay or alfalfa-hay tea. In any case, after the liquid has been drunk, throw into the bottom of the pail a little bran, whole oats and oil meal, or something of the sort. The following appears to be a very good recipe for calf meal, taken from Hoard's Dairyman: One part ground flaxseed, two parts finely-ground corn meal (sifted), two pounds finely-ground oatmeal (sifted), and the whole well mixed. Boil, and allow to stand for twelve hours, covered. Begin with two or three ounces daily at a month old, and gradually increase, but not to exceed half a pound per day. It might be worth while trying one of the proprietary calf foods, such as Bibby's Cream Equivalent, advertised in these columns. When calves reach the age of two months, and are eating dry feed and grass, the new milk may be diluted with warm water.

2. Assuming that the first payment is to be made a year hence, the twenty annual payments would be \$361.09. If the first payment be made now, the annual payment will be \$313.89.
