

A WEAK ACHING BACK Caused Her Much Misery.

Mrs. W. R. Hodge, Fielding, Sask., writes:—"A few lines highly recommending Doan's Kidney Pills. For this last year I have been troubled very much with nasty sick headaches, and a weak aching back, which caused me much misery, for I could not work, and had no ambition for anything. My kidneys were very badly out of order, and kept me from sleeping at nights. I tried many kinds of pills and medicines, but it seemed almost in vain. I began to give up in despair of ever being well and strong again, when a kind neighbor advised me to try Doan's Kidney Pills, which I did, and am thankful for the relief I obtained from them, for now I am never troubled with a sore back or sick headaches.

"I will always say Doan's Kidney Pills for mine and can highly recommend them to any sufferer."

Price, 50 cents per box, or 3 boxes for \$1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

Scotch Shorthorn Bulls

Have a number of good, thick-fleshed bulls of up-to-date type and breeding, from 8 months to 14 months old, also cows and heifers at reasonable prices. Write to, or call on

Shorthorns of Show Calibre

Only one bull for sale now, but 13 grand heifers by Mildred's Royal must be sold, as we have no bull to breed them to. Come and see them, or write.

GEO. GIER & SON, Grand Valley, Ont.

Shorthorns Choice selections of bulls and heifers at all times for sale at very reasonable prices. Robert Nichol & Sons, Hagersville, Ont.

The Englishman who made his first visit to New York recently by the "Lusitania," and went back on the same boat thirty hours later, saw all he could in a bird's-eye view of the city; but he was beaten by that other stranger from up the river who went down in the subway and returned by the same route, boasting that he had had a worm's-eye view of New York.—Independent.

CURED ACES AND PAINS LIKE MAGIC

When he used Dodd's Kidney Pills for Rheumatism.

Saskatchewan man tells of quick relief after three years of suffering.

Holbeck, Sask., January 29.—(Special.)—Among the many on the prairies who are shouting the praises of Dodd's Kidney Pills, none speak with more enthusiasm than Mr. Matt. Syverson, a well-known resident of this place.

"I suffered from rheumatism for three years," Mr. Syverson says; "and I was also troubled with an acute pain around my heart. My case was a severe one, and several times I doubted if recovery was possible. But seven boxes of Dodd's Kidney Pills cured me completely.

"I can truly and honestly recommend Dodd's Kidney Pills as a remedy for cases like mine. They surely cleared out all my aches and pains as if by magic."

Rheumatism is caused by uric acid in the blood. When the kidneys are right, they strain all the uric acid out of the blood. Dodd's Kidney Pills make the kidneys right. That's why they never fail to cure rheumatism and kindred diseases.

QUESTIONS AND ANSWERS. Miscellaneous.

SEEDS FOR TESTING.

Would like to know how to send seed to have it tested; also what address to send to, and quantity to send.

W. M. M.

Ans.—Enclose in a manilla or other strong envelope, a representative sample of the seeds to be tested, say, one ounce of clover or grass seeds, and forward to the Seed Branch, Department of Agriculture, Ottawa. No postage is needed, but be sure to enclose your name and address.

VINEGAR FROM FROZEN CIDER —OIL FOR SIGNAL LIGHTS.

1. I had some cider last year I saved for vinegar, and last winter it froze. I made some more cider this year and mixed with it—with that that froze. Will the freezing prevent it making good vinegar? If not, how shall I go about it to make good vinegar?

2. Can you tell me the composition of the oil the railroad men use for signal lights and lanterns?

J. W. C.

Ans.—1. The freezing of the cider will not necessarily destroy it for vinegar-making. The low temperature would, of course, hold in check the action of the fermentative organisms present, and possibly some of them have been destroyed, but the freezing would not destroy the sugar or alcohol, from which the acetic acid of the vinegar is derived.

If the two lots of cider are mixed and a little "mother of vinegar," from a barrel containing a good vinegar, added, and the whole left at a temperature of about 80 degrees F., a good article should be obtained. The "mother of vinegar" is added to start the desired fermentation, and to thus hold in check the undesirable ones. Do not try to hurry the fermentative action by raising the temperature too high.

2. Most of our railroads use seal oil for signal lights and for lanterns. It is similar in composition to other animals' oils or fats, and may be burned in safety lamps.

R. HARCOURT.

CORN AND SILO QUESTIONS.

1. Owing to scarcity of help, I have decided to try corn-raising instead of roots, and am undecided to know what kind of a silo would be best to build to suit my circumstances. I certainly believe a cement silo would be most durable; but as I have my own lumber, I thought it advisable to build a board one, as it would best suit my means at present. Or would you advise me to borrow the difference at six per cent. and build a cement one?

2. What is best to put on the corn before planting to prevent birds from taking it? Have tried tar, but it is of little benefit.

3. What quantity of corn does it take to the acre, planting it in hills thirty inches or more apart, to get the best results, and when scuffling corn, do you prefer deep scuffling or light, in heavy land.

A SUBSCRIBER.

Ans.—1. If your buildings are permanently arranged, and you know pretty well what size of a silo you want, and where it could be best placed, we believe it would be sound economy to borrow the money and build a cement one, unless by so doing you would be exhausting your credit and depriving yourself of the privilege of making other much-needed improvements. You must decide such a question for yourself.

2. We know nothing better than coal tar. You might try sowing thickly a small patch of corn without tarring so as to feed the birds and draw them away from the tarred corn. We have never done this, but have often thought of it since reading of the idea many years ago.

3. We planted our silage corn in hills 42 inches apart one way and 44 the other, dropping four and five kernels to the hill. We shall repeat this next year, possibly increasing the drop to five or six kernels. A bushel of ear corn is ample to plant four acres, after discarding butts and tips. We prefer scuffling rather deeply at first, reducing the depth at each cultivation.

This Feed Costs Nothing

if you count the results it gives.

Livingston's Oil Cake is just what cows need.

It tastes good—is easily digested—keeps stock in prime condition all the year round—actually increases the percentage of Butter-fat by 16% over Pasture Grass. The richer the cream, the more money you make. Livingston's is the feed that pays for itself.
