Bowling

The play in the Heather tournament got away to a good start on Saturday afternoon, although the cool weather was not just to the liking of the bowlers. Two games were played in the rink series; the first skipped by E. C. Tench and W. J. Lalley was a close contest throughout and was finally won by Tench's rink. The second game was between rinks skipped by J. I. Miller and J. A. Ogilvie, the latter going down to defeat.

In the Scotch Doubles series only one game was played in which A. W. Bart and B. A. Caspell won from W. A. Burrows and T. L. Wood by a good margin.

In the Singles Competition Frank Read defeated D. H. Coates; B. A. Caspell won from A. W. Daniels; L. Newsome was successful against John Ryan; E. C. Tench beat F. E. Tobias; H. B. Beckett out-bowled Rev.

Children Cry FOR FLETCHER'S CASTORIA

Woodside, W. Moss was victorious over E. H. Newman; J. A. Grantham came out ahead of J. S. Dowling, and J. A. Ogilvie was the winner against Glad Raymond.

In the Novice Singles Series the winners were: I. Simpson, D. Morrison and J. W. Shepperson who played against T. Hendry, J. Wallace and R. M. Sheriff, respectively.

Further games will be played this afternoon and evening.

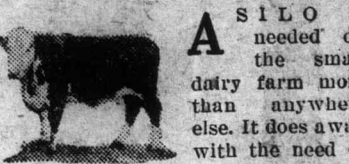

GEM FEATURES
"The Trapper's Mistake," a Pathé play in 2 parts, is the big subject for Monday and Tuesday of this week. It abounds in thrills and is photographically perfect. "The Penalty of Crime" from the Pathé studio, is the special for Wednesday and Thursday. This is one of the most sensational subjects yet provided, and includes a race between train and automobiles, one of the latter being driven over a bank into the river.

Making the Little Farm Pay

By C. C. BOWSFIELD

A SILO is needed on the small dairy farm more than anywhere else. It does away with the need of a large pasture and insures a full milk supply during summer droughts.

Fodder preserved in a concrete silo is safe from fire and waste and retains the maximum food value. The cost of building a silo with a capacity of 150 tons need not exceed \$300. It varies according to the supply of labor. Concrete costs little more than wood and is so much better in every way that it is confidently recommended. No fodder is relished so much by stock as silage. Its influence is beneficial to the animal system, is invigorating and prevents cripples and impaction. Succulent silage makes for good health and heavy milk flow. It is equally good for poultry and hogs.

Corn is the most suitable of all crops for silage. It should be harvested when the bottom leaves are drying off and the grain is doughy and glazing. Without hurrying the work of filling the silo, the best method is to ensile the crop as soon as it is harvested, cutting the stalks and cobs into small bits. The grain is more or less matted in the cutter.

The fodder thus treated is carried by means of an elevator or blower, which should deliver the material as near the center of the silo as possible. This may be done by the aid of a bag chute attached to the mouth of the elevator or the blower.

The labor of distributing the fodder is thus minimized, and an even supply of the material will be distributed all over the silo. If the fodder be allowed to fall direct from the mouth of the conveyor the heavier parts will fall on one side and the lighter parts on the other. The silage will not settle evenly, and loss will eventually result. To assist in close packing it is absolutely essential to trample the product all over the silo. Trampling the sides or around the edges is not sufficient, for with the shrinking of the center the outer edges creep toward it and away from the walls, thus allowing access of air and consequent loss. The center should always be kept a little higher than the outer edges. The rate of filling should be six to eight feet per day. Quicker filling than this may result in generating too much heat, in which case the silage is liable to decompose.

After the silo has been filled the fodder should be covered with a light framework or coarse sheet and weighted down. This is done to keep out air, and after the silo has been open for use in the spring or summer it is best to replace this top covering after each day's supply is taken out. Avoid, as far as practicable, sinking holes in the silage. In fact, keep as little of the silage exposed to the air as possible.

The daily ration of silage for a dairy cow is from thirty to forty pounds when fed with other fodders; when there is some grass available thirty pounds per day is ample. Sheep will eat as much as three pounds a day. It is advisable to give horses small quantities only of silage; otherwise they may be troubled from stomach derangements. Limit the amount fed to a few pounds per day. Pigs and poultry will eat small quantities.

Silage may be made of all plants that are permitted to eat in the green state, and such fodder preserved by this means loses but little of its feeding properties in the process. In one way there is a slight improvement. That is, the tougher fiber of silage fodder is softened and made thereby more digestible and acceptable to animals.

However, there is great risk in putting vegetables in a silo if a dairy is kept. The milk is apt to be tainted. Oats, rye, millet and alfalfa work well in connection with corn, but the latter is the main staple and may be used by itself.

EIGHT HOUR DAY ON FARMS.

A writer in Farm and Fireside says that the eight hour day with farmers consists of eight hours for work and eight hours for chores.

GROWN IN LEGAL SOIL.

A deaf mute is not incapable of entering into contracts if shown to have sufficient mental capacity. Alex versus Matzke, Mich. 115 N. W. Rep. 251.

Generally every partner is under obligation to exercise due diligence and reasonable skill and devote his services to the promotion of the common benefit of the firm without compensation by way of wages or salary unless otherwise agreed upon.

The United States patent law requires a person applying for a patent to make oath that he does verily believe himself to be the original and first inventor or discoverer of the art, machine, manufacture, composition or improvement for which he solicits a patent and that he does not know and does not believe that the same was ever before known or used.

HOW UNCLE SAM HELPS.

A bulletin of the Bureau of Plant Industry, "a study of farm equipment in Ohio," gives a most valuable review of important data of this character gathered and collected with much painstaking care by Mr. W. W. Ellis. On twenty-one farms investigated the following was found to be the average distribution of capital invested: In land, drainage and water supply, 31 per cent; in buildings, 21 per cent; in implements and machinery, 5 per cent, and in live stock, 13 per cent. The bulletin gives much detailed information, of which the figures just quoted represent a gross summary.

There is the day of scientific management. No longer need the farmer slowly find his way to the best working conditions by a series of successive approximations. The government helps him to profit by the experience of others who have preceded him and have paid the heavy dues of that excellent but dear schooling.

DON'T BURN ROUGHAGE.

Expensive and Wasteful Practice With Cornstalks, Straw, Chaff, Etc.

A contributor to Farm and Fireside writes: "A tendency exists among many farmers to burn up all cornstalks, loose straw, clover chaff and all superfluous roughage about the place. But it is too expensive."

"Every time an acre of stalks is burned twenty-one pounds of nitrogen go into the air, and it will cost you \$3.50 to buy it back again. Wheat or oat straw from an acre contains about twelve to fourteen pounds of nitrogen and clover chaff three times this amount."

"One can easily figure from these deductions what a reckless loss to the farm is a fire in the chaff pile or stalk field. The cutaway and disk harrows will chop the bulky materials up ready for the plow where they can be turned under. If you want to fatten the old farm, stuff it with organic matter."

FOR A SILO SCAFFOLD.

Directions for Making Necessary Part of Concrete or Tile Structure.

Should any one be thinking of building a concrete or tile silo, the accompanying cut might help in building the scaffold. After the foundation wall is laid get five poles at least eight feet higher than you expect the silo to be. Set inside of the wall deep enough to hold poles in place. Lay

Heavy lines, 2 by 4's; dotted lines, boards to work on; five small circles indicate position of support poles.

SCAFFOLD INSIDE SILO.
[From National Stockman and Farmer.]

the silo as high as you can from the ground, make 2 by 4's or 2 by 6's and build frame for scaffold as shown in cut.

Leave plenty of room for poles to work easily; then floor as shown by dotted lines in cut. Attach a pulley to each pole and raise when used. When a place under scaffold on pole. One scaffold does it all. The scaffold should have just play enough to let it slide up easily. Sometimes if it is too loose a wedge to hold it firm while at work should be put in.

The floor of the scaffold poles longer than the silo is high is to get pulleys high enough for last raise—National Stockman and Farmer.

Chicks Need Cleanliness.
Drinking dishes and feeding troughs for chicks are likely to become dirty and insanitary unless special precautions are taken according to Professor J. B. Ralph of the College of Agriculture of the University of Wisconsin.

Drinking water should never be placed in common dishes or vessels where the chicks may get in with both feet, but "sanitary" fountain, either homemade or purchased, should be used. Refreshers be cleaned and rescaled at frequent intervals. Wet manure when fed in wooden troughs mold unless all refuse feed is scraped off and the troughs are placed on end so that they may dry in the sun. Neglect of these two simple matters may cause considerable loss.

Coverings For Silage.

The use of heavy tarpaulin to cover the surface of silage during summer feeding is being practiced quite successfully by some of the readers of the Kansas Farmer. The tarpaulin is very carefully spread over the whole surface of the silage, and the silage is removed from half the surface only at each feeding, alternating from one side of the silo to the other. In this way a thicker layer can be removed from the surface fed from daily. The tarpaulin cover retards the tendency to spoil on the surface left untouched.

County Council.

(Continued from Page 1)
annexed statement are not such as are chargeable under the head of maintenance, and the larger portion of which were also incurred previous to the last of July, 1912, being the date when the claim of the Brantford Collegiate Institute against the county commenced, all previous matters having been settled between the county and Collegiate Institute.

Your committee has therefore deducted the sum of \$1,814.07, being the amount of the accounts amended as improperly charged, from the total cost of maintenance as shown by the account of the trustees.

Your committee reports on the basis of amended account, the amount due the Collegiate Institute being the sum of \$1,618.83, made up as follows:

Total cost of maintenance \$25,281.75
Less accounts improperly charged 1,814.07
\$23,467.74
Less Government grants 3,018.00

\$20,449.74
Total days attendance of pupils in school year, 79,113
Divide \$20,449.74 (net cost of maintenance) by 79,113 (total days' attendance) gives average cost per pupil per day, i. e. \$26.166.

Multiply 25,166 (average cost per pupil) by 6938 (days in school county pupils, Sept. 1 to Dec. 31) gives to cost of county pupils for term \$2,023.33.

80 per cent (proportion of cost payable by county, \$1,618.83.
Your committee would therefore recommend that the Warden be authorized to issue his order on the treasurer in favor of the board of trustees of the Brantford Collegiate Institute for the sum of \$1,618.83, in payment of the above claim.

All of which is respectfully submitted.

Raised Objection

Councillor Layton raised objection to the councillors not being supplied with a detailed statement of the account before being asked to vote upon such a matter. He was drawing attention to the matter in order that in future the statement would be on hand for perusal.

New Road

The rebuilding of the House of Refuge road and the building of the road leading to the sanitarium will cost \$2,192.50. Each municipality will pay half the cost and the road will be built by tender and under the supervision of the roads and bridges committee of the county and the public works committee of the city. There will be considerable grading to be done. The hill on the House of Refuge road will be cut down and the gully filled in. The road will be macadamized. The road to the sanitarium is badly needed. The whole work will be got under way as soon as possible.

Those present were Warden Kendrick, Councillors Layton, Jennings, McCann, Simpson, Cook, Davison, Burtis, Milmine and County Clerk A. E. Watts.

You Have Heard Him.
"How long did Baker talk?" asked the Boob.
"About two hours," replied the Grouch.

"What was he talking about?" asked the Boob.
"I dunno," replied the Grouch. "He didn't say."

Last Resource.
"Darling," he cried, "I cannot live without you."

"But," she replied, "my father is bankrupt."
"In that case," he despondently replied, "I guess I'll go and shoot myself."

The straw hat season is surely over. There were no hold-ups or robberies on Dalhousie Street last night from George to Alfred. The Hydro system was given a try-out and citizens were delighted.

DRESSMAKING ANNOUNCEMENT

We are pleased to advise our lady patrons that we have secured the services of Miss Nellie Berry to take charge of one of our dressmaking. Miss Berry has had a number of years experience both in Toronto and Brantford, in designing and fitting gowns, both fancy and street, and we know that our customers will be well pleased with her work. Miss Berry will be pleased to meet any of our lady friends and discuss styles with them. J. M. Young and Co.

Cider Mill Open

Cider Mill now open for the season, every day except Saturday. One-quarter mile west White School House. S. J. Carter.

Laundry Notice

NOTICE is hereby given that the laundry formerly carried on by King Lee and Lee Hing at No. 262 Colborne street has been sold to me, Lee Kew, and that I will continue on running the laundry at the said stand in the future. I guarantee that this will be the best hand laundry in the city. Dated at Brantford this 13th day of September, A.D. 1913.

LEE KEW.

Wool's Cotton Root Compound

The great Western Tonic, and the only medicinal remedy for all ailments, is Wool's Cotton Root Compound. It is a powerful tonic, and is sold by all druggists, or sent free on receipt of price. Free pamphlet. Address: The Wool's Cotton Root Compound Co., Chicago, Ill.

E. B. Crompton & Co.

THE SATISFACTORY STORE --- TEST IT

WE are on the threshold of a busy season, an unusually busy one, as indicated by the favorable criticism we hear on all sides relative to the merits of our stocks. Everybody is enthusiastic, everybody is satisfied, gratified with the variety, value, quality and styles of the merchandise assembled here. Our method of merchandising which calls for a personal visit of our buyer to the foreign markets twice every year, and the maintenance of several permanent offices and agents in the European Centres, tells most forcibly in favor of this store. The people recognize the advantage of all this. They know that as a result of these arrangements that the advanced styles as they appear in the Metropolitan Centres of the world are immediately found here—and it is so.

The New Coats

It is a simple matter for you to select your new coat here. Every garment is a gem in its way.

The styles will appeal to you at once; there's a smartness about them which will compel you to admire; and in nearly every instance there is but one coat of a kind, thus ensuring exclusiveness to you.

See the beautiful coats at \$9.50, \$10.00 and \$11.50. We are proud of this group. And, the stunning styles at \$12.50, \$13.50 and \$15.00. You will be impressed with these.

Women's Overall Aprons

A splendid style. A good washing, large size house apron at 49c.

Women's Very Stylish Autumn Suits at \$15

Never before have such suits been offered at the price; for besides being made of really wonderful materials, they are finished and trimmed far beyond your expectations. These suits are worth half as much more money, we believe, and as to that you will certainly agree with us. Made of all wool whorlards, serges, tweeds, and novelty fabrics, satin lined coats; all touched up and trimmed in a manner just right.

Other prices \$16.50, \$18.50, \$22.00, \$25.00, \$27.50 to \$50.00.

Women's \$2.75 Satin Underskirts \$1.49

This little lot of 84 skirts will find new owners Saturday, sure. It's a remarkable skirt; a nice quality, a good style and a real bargain; shades are black, white, cream, grey, periwinkle, purple, Nell Rose, violet.

A Great Showing of Children's Hats, Bonnets, Dresses and Coats

A very beautiful showing, indeed. Every mother, every child, is interested in this department. Such pretty things—no wonder this department is always busy.

E. B. Crompton & Co.

Marabout Neck Ruffs, Stoles and Muffs

There'll be too few of these to nearly supply the demand this autumn. They are the rage in New York. We have a beautiful assortment which our buyer secured when in Paris. Such dainty things they are; they put the finishing touch to the stylish toilet.

All colors and kinds. Prices \$2.50, \$3.50, \$4.50, \$5.00 up to \$12.50.

Lovely Ribbons

They are that, indeed. The new department (centre aisle), is a picture. The dainty colors, the perfect harmony, the fascinating designs and styles is attracting everybody's attention. Come see the ribbons.

Women's Hats

which will compel your admiration. Second floor rear. The display is at its best. Never have we had such pretty hats—such becoming, wearable styles.

Everybody is complimenting us on the exhibit.

New Dress Goods For Fall

Heavy twilled chevrons for suits, a rough finished fabric, in all the popular shades, 44 inches wide, 85c. yard.

Black and white checks, used for separate skirts with plain material for coats, in small and large checks, 42 to 54 inches wide, 50c. up to \$1.50 yard.

Two-tone, heavy reversible coatings, tweed and Chinchilla effects, 54 in. wide, \$2.00, \$2.25, \$2.50, and \$3.00 yard.

Velvets in plain and corded effects; all colors. (These will be scarce before the season closes). Prices from 59c up to \$3.00 yard.

Serges are selling very strongly, and our stock is large, navy and black being particularly good sellers; 42 to 56 inches wide. Prices from 50c. up to \$2.75 yard.

Agents for Skinner's celebrated satins for coat lining, in all shades, \$1.25 yard.
