#### FOREWORD

To the Farm Boys and Girls of Ontario:

In presenting this outline of a School Course in Elementary Agriculture and Domestic Science to the youth of the rural districts of our Province, your Provincial Department of Agriculture does so fully realizing that you are entitled to all the benefits that might come to you by tapping the accumulated knowledge of the sciences and practices that make for success in farm life. A period of three months is but a short period in a life-time, it is also a short period in which to attain a knowledge of the sciences underlying the practices that make successful farms, successful homes, successful farm men and farm women. This school is therefore of necessity planned to fill the immediate need and to reach those of you who have not had an opportunity of attending the established educational institutions of our Province and to give you within this short period a beginning in the sciences that mean so much to those living on the land. It is the hope of the officials of your Provincial Department of Agriculture that all of you who may elect to become students in this school will be aided in your progress toward successful rural citizenship.
