HIGH DIVING ELK

The Camera Catches One of Its Wonderful Feats, In conversation the other day, Will J. Barnes of Sloux City, Iowa, said:
Some people have an eccentric hobby, others have a bobby that appeals to the general run of beings as sensible and proper. Whatever you may call my hobby, it is one that has taken complete, possession of me, and I am proud of the

I was prompted to train the elk because I heard it so frequently stated that it was the dullest animal living. The fact that the undertaking seemed to be one almost impossible to carry through successfully gave additional zest to the task I set for myself, which was to train a team of elks to do the most remarkable thing I could think of that was compatible with the nature of the animal.

Modera Chivalry.

Sir Walter Raleigh's cloak has been a symbol of chivalry for many years, but the little street boy's cap in the following story, from The Sunday Magazine, deserves an equally honorable place:

The best story I know of an Edinburgh street boy was told me by a lady who witenessed the incident. There was a Christmas treat given to poor children at a mission hall, and hundreds of little ones were assembled at the doors in advance of the hour of admittance, many of them bare-hour of admittance, many of them bare-

Among the number was a sweet faced little girl, who seemed less hardened than most to the cold, for she shivered in her poor jacket and danced from one foot to the other on the cold, hard stones. 1. The Perfection Shown In Time of Danger on Board a Man-of-war.

After lunch, writes Stephen Bonsal, in McClure's, as I walked with an officer apon the spar deck an orderly came up and said just as if he were announcing supper or eight bells, "I have to report a fire in a coal bunker." "All right," replied the officer, "will be down immediately." Then, with a parting whiff, he threw away his cigar, and we went down the companionway tegether.

There upon one of the lower decks a sentry, with the most quizzical expression of curiosity upon his face that I have ever seen, stood before a great dial like those in use in modern hotels, the indicator of which pointed stoadfastly to the little face of the dial marked "B 31."

My companion, the officer, went down still further into the bowels of the ship, while I stood with astonishment at the indicator, with wonderment as great, if not as open mouthed, as the sentry's. "It's a wonderful thing, this here machine," he said. "It keeps me awake at night, it's codarn human. It rings up a fire in some spooky way, just as if you or I might touch a bell and order up a mint julep. Yee, it do, sir."

Where B 21 was neither he nor I knew, but we agreed in the hope that the burning bunker might be far from the magazines. There was some talk about playing that number and that letter in the next game of chance upon which we entered until gradually the consciousness dawned upon a stant we were even at this moment engaged upon a game of most serious hazard and that the cards might go against us. I smoked my olgar for an hour upon the signal tower, wondering all the while

"Iry to sleep, of course," I replied.
"Is it a riddle?"
"No," said he, "but I want you to tell me what little trick you resort to—what particular disposition of your anatomy you make in order to woo the dream god?"
I failed to haswer satisfactorily, so, with a gratified smile, the physician continued: "I scarcely exposted you would know. In face, there are few porsons who can tell off hand just what positions they assume to invite sleep, and yet there is not an individual in the world who has not some favorite, esoteric little plan, some trick of distributing limbs and trunk, to insure slumber's blissful spell which he practices unconsciously. This is a night habit, as perpetual and immutable under normal conditions as the succession of the seasons.

"No sconer are we really off for the land of nod than the night habit asserts its dominion. It is soldom of our own deliberate volition that we place our bodies in position for sleep, as you will find tonight on going to bed if you remember my words. In truth, if you do not seek to combat the inclinations of your mysterious instincts you will be surprised at the disposition of the various members involuntarily made.

"If you endeavor to go te sleep by a new arrangement of the body and limbs, you will also be surprised by the rwoit against slumber which will surely ensue, but even before the struggle is well begun you will probably surrender and permit the all masterful night habit to reinstate those little dutails of position which long practice has made necessary to your comfort."—New York Herald.

Persistency is characteristic of all mem

fort."—New York Herald.

Persistency.

Persistency is obaracteristic of all men who have accomplished anything great. They mag lack in some particular, may have many weaknesses and eccentricities, but the quality of persistence is never absent in a successful man. No matter what oppositionhe meets or what discouragements overtake him, he is always persistent. Drudgery cannot disgust him, labor cannot weary him. He will persist, no matter what comes or goes. It is a part of his nature. He could almost as easily stop breathing. It is not so much brilliancy of intellect or fertility of resource as persistency of effort, constancy of purpose, that gives success.—Keystone.

Improved on Solomon.

In a Pontine (Mich.) Sunday school a little girl told the story of Solomon and the disputing mothers in this wise: "Solomon was a very wise man. One day two women went to him, quarreling about a baby. One woman said, 'This is my child,' and the other woman said, 'No, 'tain't. it's mine.' But Solomon spoke up and said: 'No, no, ladies; don't quarrel. Give me my sword, and I'll make twins of him. se yeu can both have one.' "—Exchange.

Mr. Morgan, and Mr. Morgan went to
the Bank of England in Loudon, the manager sent word to the Plymouth branch
manager and that gentleman came personally to the Royal hotel and with his hat
in hand begged to be of service to Paymaster Clark in any way that gentleman

paymaster, accompanied by his clerk, accompanied the bank officer to the bank.
The drafts were duly passed over and a
large bundle of Bank of England notes
placed before the paymaster.
"What are these?" said Clark.
"Those are Bank of England notes."
"Yes, I see they are notes signed by
Frederick May that the bank will pay
bearer, et. Well, I do not know Mr. May,
and of course I do not know you. This
paper may be good, but I have me assurance of that. I'll trouble you for the

it down to the boat in triumph. "I would
