Notes and Comments.

The Financial Post says that about 8,500,000 persons paid income tax to the British Government out of a population of 40,000,000. This is, roughly, ten per cent. In Canada payments were made by about one-half of one per cent. This source of revenue evidently is capable of great returns.

When the Bulgarian delegates entered the chamber at Versailles to sign the Peace Treaty, the Allied delegates rose as a mark of courtesy, while they remained sitting when the Germans came to take their medicine. This was not because they loved the Bulgars more, but because they loved the Germans less.

The electric razor is coring. Whiskers will not be electrocuted nor burnt off by this new implement. The electric is a little larger than the safety. It is attached to a light socket by a flexible cord. The current causes the blade to vibrate one-sixty-fourth of an inch, 7,000 vibrations a minute. As it is moved across the face it scrapes away the beard without scraping or pulling.

A remarkable cure has been effected at King Edward VII Hospital, Windsor, G. B., in the case of William Robertson, a stableman. His nose was cut off by a piece of broken glass. He was taken to the hospital where a surgeon asked for the missing nose. A doctor's son cycled off to the stable, found the nose among the straw and returned with it to the operating theatre, where it was replaced after an absence of nearly an hour.

Those who purchase articles made of pure silver should not accuse the jeweller of profiteering without first taking into consideration the price of pure silver to the trade has risen from .52 cents to \$1.12 an ounce. This might also be an added incentive for us to look with more respect on the silver coins which once in a long time reappear in our pockets and are disdainfully referred to as 'chicken-feed'.

An instructor of the University of Michigan was sent to the University of Illinois to prepare posters and circulars illustrating the inadequacy of compensation for college professors. He received eighteen dollars for the five days he worked on these matters, while the carpenter who constructed the signs and standards bearing this information received five dollars a day, or twenty-five dollars for the same period. The moral is obvious.

The preliminary crop reports of the Dominion Bureau of Statistics give the following estimates of the grain yield for all Canada in 1919: Wheat, 199,289,800 bushels, as compared with 189,075,350 bushels in 1918. Of the total for 1919, 22,475,800 bushels are fall wheat and 176,814,000 bushels are spring wheat. The estimated total yield of oats is 381,850,000 bushels, as compared with 426,312,500 bushels in 1918, of barley it is 65,584,000 bushels, as compared with 8,019,500 bushels in 1918, and of flax seed, 7,350,000 bushels, as against bushels in 1918.

Some comparative figures which force a realization of the magnitude of the world war just ended are given in a current issue of Henry Ford's 'Dearborn Independent', from which is quoted: There were nineteen major wars fought in the world in the 117 years from 1793 to 1910. The late war cost 50 per cent more in lives and lost 700 per cent more in money spent than the whole nineteen wars put together.

The most costly in lives of the previous wars was that between England and France, 1793-1815, a total of 1,000,000 men having perished. Next came the war of 1854-56, in which England, France, Sardinia, Turkey, Austria and Russia fought; 69,797 men were killed. The more recent war between Russia and Japan came third, claiming the lives of 655,000 men. In our own War of the Rebellion both sides together lost 494,400 men.
