##### Earthquake in England.

LONDON, April 22.—A severe shock of earthquake was felt in several of the eastern counties at nine o'clock this morning. A number of church steeples and chimneys were thrown down, houses were unroofed, and many buildings had their walls badly rent, while the furniture in the residences and shops, together with the fixtures of stores and the windows, were broken. No lives are as yet reported lost, though it is known that several persons were severely injured.

LONDON, April 22.—At 9.30 this morning an earthquake shock was felt in the city, and in the suburbs of England. At Ipswich the walls of the houses were shaken, plates were rattled and bells rung. People were thrown into such a state of consternation that business was suspended. The shock was still more severe in Colchester, where the earthquake lasted half a minute. The first symptom was a deep, rumbling sound; this was speedily followed by the quaking and shaking of the buildings. The tall chimneys of factories fell, and other structures were destroyed. The spire of one of the largest churches in the city, one hundred and fifty feet in height, fell with an awful crash. One part of the city fire was caused by the falling of the spire.
