PRODUCE. The market has remained inactive since our last, with offerings rather small, and prices generally steady. In some instances we should say that the FLOUR, t.o.c. enquiry has been improving, and the tendency upwards, and the only case in which it seems to have been downwards is in the lower grades of barley.

Receipts have been of fair amount; stocks have increased during the week, and stood on Monday morning as follows:—Flour, 12,990 bbls; fall wheat, morning as follows:—Flour, 12,990 bbls; fall wheat, 55,170 bushels; spring wheat, 104,798 bushels; cats, 11,630 bushels; spring wheat, 12,592 bushels; peas, 18,548 bushels; rye, nil; corn, ns., against corresponding date last year:—Flour, 18,575 barrels; spring wheat, 61,832 bushels; fall wheat, 208,410 bushels; cats, 12,638 bushels; barley, 184,985 bushels; peas, 10,796 bushels; rye, nil; and corn, nil bushels. Outside markets have generally been quiet. English quotations show an advance of 1d on white wheat; markets seemed to be moving upwards in the latter part of last weak, but during the last couple of days the last weak, but during the last couple of days the Peas, No. 1, per 60 lbs. Receipts in English markets seem to have taken a Rye... Receipts in English markets seem to have taken a turn, as for the first time in some months we have to report a deficiency. The total supply of wheat and flour in the week ending on the 4th inst., was equal to 383,750 to 411,875 qrs. vs. 411,000 to 420,624 qrs.; weekly consumption, indicating a deficiency under consumption of 8,749 to 28,250 qrs. The supply of maize for the week was equal to 800,000 to 840,000 bushels, against an average weekly consumption in 1877 of 1,261,124 bushels vs. 1,390,774 bushels in 1876, and 773,863 bushels in 1875. The amount of wheat and flour on passage for the Turkeys. has been \$7 to \$8.

APPLES—Have shown no change; offerings have remained much as before and prices unchanged at \$1.25 to \$1.76 for good "cookers," the general run being about \$1.50.

POTATORS—Ours have been offered more freely than in the preceding week, and have sold at 80c on track. On the street offerings have been very small and prices decidedly firmer at 90 to 96c per bag.

MUTRON—Has been in good demand and steady in price; the general run for good qualities has been \$5 to \$6.5c, but interior has sold as low as \$4 per cental.

Farms for Sale.

BERVES—The supply of export cattle, or of anything deserving to be called first-class, has continued to decrease, and scarcely any of them have been offered since our last; whenever offered they have been readily taken at from \$4.50 to \$5. but must be been readily taken at from \$4.50 to \$5. but must be steers weighing at least 1,200 lbs to bring the lowest of these figures, and still heavier and finer to bring more. Second-class seem to have been weak with enough in the market, and selling 25c lower, or from \$3.75 to \$4. Third-class have been more abundant and decidedly weak at \$5 to \$3.25, some "bulls" going still lower. The weakness in the lower grades would probably have been still greater than it has been were it not that the demand for choice has caused lots to be bought for the sake of the few good cattle in them.

SHEEP—Offerings have been very small and scarcely sufficient even for the local wants. Prices have shown no change, save that there have been little enquiry for expert lots. First-class, weighing 150 lbs., have been in active demand at \$6 to \$6.50, but seem to be less wanted than first-class. Third-class are nominal.

Lams—Receipts have continued to be small and insufficient, and a steady demand has been well sustained, though at rathor easier prices. First-class, dressing from \$4 the up price being for picked lots, or very heavy weights. Second-class have ranged from \$3 to \$3.37, with all offering wanted.

Calves—There have been none offered nor are there any wanted, and prices may be regarded as purely nominal.

HIDES, SKINS AND WOOL. TRADE—Has been dull and inactive all week TRADE—Has been dull and inactive all week.

Hiddes—There has been no chappe in the marke since our last. Green have been offering slowly an prices unchanged. Cured have been scarce and i steady demand with sales at 7 to 7‡c.

Calfering —There has been nothing doing an prices have been purely nominal.

Sherferkins—The dullness in wool has continue to affect skins; the demand for them is slack an prices remain low; still good green akins have bee bringing 90c, argi a few choice may occasionall bring \$1. Country lots have been offering slowl and selling at 70 to 75c.

Wool—There has been nothing at all doing a

bring \$1. Country lots have been offering slowly and selling at 70 to 75c.

Wool.—There has been nothing at all doing all week. Fleece has not been offered to any extent on the street, but it would probably still bring 20c there. Super has been purely nominal, being neither offered nor asked for; but it may be regarded as still worth 19c.

Tallow—Has been offered freely, and selling at unchanged price, for both rendered and rough. Quotations stand as follows:—No. 1 inspected, choice, \$6.00; No. 2 inspected, \$6.00; No. 3 inspected, \$4.00; Calfskins, green, \$ to 10c; Calfskins, cured, 11½ to 12c; calfskins, dry, none; Sheepskins, \$5c; Wool, fleece, 20c.; Wool, pulled, super, 19 to 20c; extra super, none; Wool, pickings, \$ to 10c; Tallow, rough, 3½c; rendered, \$ to 5½c.

THE CANADIAN AIR GAS MACHINE.

Rose Cold and Hay Fever. The late Jonas Whitcomb of Boston, visited Europe a few years since for the benefit of his health, which was impaired by frequent attacks of Spasmodic Asthma. While under the treatment of an eminent German physician his asthma disappeared; he procured the recipe which had done so much for him. This remedy has been used in thousands of the worst cases with astonishing and uniform success. It contains no injurious properties whatever.

St. Louis, Nov. 10, 1877.

Messrs. J. Burnett & Co.: The relief the Jonas Whitcomb's Asthma Remedy afforded me was perfect; I have not had a bad night since taking it, and I have in no case found any relief until your Remedy came to hand. I most cheerfully recommend it to any one troubled with Hay Fever or Asthma, for it is the only remedy ever used by

Landour, Jan. 19.—Advices from Gl w state that there is a fearful amount stitution existing in that city, and appions for relief are on the increase. The also many skilled workmen out of coment, who are subsisting on their land or on money received from ben

those localities continues to increase, a is attributed to the prolonged severe we ther, the stagnation in the iron trade, textreme dulness in most branch of the coal and coke trade, the d pression in other trades, and the notices to workmen. Many of the notices were issued to bring about reductions in wages. Hundreds of families are on the verge of starvation, and the work-houses are full to overflowing Charitable societies are hard at work, as collecting boxes have been placed in man places of business and public resort.

The North Wales slate quarrymen Union has offered the same premiums, members who will emigrate to America Australia as those offered by the Nor Wales miners' association. The quarmen's Union offers £2 additional to me bers emigrating west of Chicago. It believed many will accept, as the smal quarries mostly remain closed.

London, Jan. 20.—A series of inquir made to-day in London at the agencies the principal manufacturing companies the north of England respecting the sad counts of distress prevailing there amo the work people resulted in confiring the worst reports that he been received. Journals from the districts and telegraph reports tell the same story. Not even in time of the great cotton famine in Lan shire, caused by the war in America, there been so widespread and acute d tress. For a long time manufacturers habeen carrying en their business at an actal loss, hoping for a turn in the tide, a

of organizing a national system of relief the suffering operatives is now in agitat and it is likely it will be carried out or extensive scale.
