Dear Mother:—

Gallant Canadians Gained Objectives

Show Their Mettle in Victorious Struggle With Germans.—Progress of the War

Ottawa, Sept. 28.—Since last report the Canadian Corps in France has carried Hill 70, covering approach to Lens, from northwest.

On the eighth-ninth of August, a small force consisting of an officer and twenty men, surprised one of the enemy's outposts in Lens and without loss to themselves accounted for the whole garrison.

At 4.25 a. m. on August 15, two Canadian divisions attacked the enemy's trench system on a front of 4,000 yards, from the Lens-Bethin road northwards to Bois Hugo.

Our final object consisted of a line of German trenches which ran east of Cite St. Elizabeth and Cite St. Mile, just west of the defences of Cite St. August and east of Bois Rase. The greatest depth of our objects from the old German front line was 1,500 yards. The southern half of the ground attacked was covered with the ruins of a group of suburbs of Lens, Cite St. Elizabeth, Cite Edouard, Cite Emile and Cite Laurent. The northern half included the rising ground known as Hill 70, together with Bois Rase and the western portion of Bois Hugo. The whole was defended by an elaborate network of trenches and barbed wire and studded with strong points and machine gun emplacements. Our infantry attack, supported by our artillery, was immediately successful.

By 6.40 in the morning both divisions had captured the whole of the German front line system to a depth of some five hundred yards, and were established on the line of their first objectives. After a short halt to enable the assaulting troops for the remainder of our objectives to pass through, the attack was resumed. Hill seventy was captured by assault, and less than an hour later the whole of our objectives were in our hands except for a short length of trench at the spot of our attack opposite Cite St. August. Here our troops were held up within a short distance of the enemy's trench line by heavy machine gun fire from Cite St. August, and the brick fields at this southern end. The attack on this position was delayed until the German machine gun emplacements should have been located and dealt with by our artillery.

Between 8 and 9 a. m. a series of counter attacks were delivered by the enemy's local reserves east of Cite St. Mile. These were all driven off by rifle, machine gun and artillery fire. At midday a counter attack developed north against the left flank of our attack. The enemy advanced across the open under intense fire and the attack collapsed with very heavy losses. An hour later, two other counter attacks in the neighborhood of Bois Hugo and opposite Cite St. August were similarly broken up.

Paris, Sept. 28.—The Germans made an attack last night in the Argonne region. Today's official statement says they were repulsed three times, suffering heavy losses.

London, Sept. 29.—British casualties reported during the month of September total 104,598 divided as follows:
Officers killed or died of wounds 696 men, 13,302 Officers wounded or missing 2,151, men 83,509

London, Sept. 30.—Eleven persons were killed and 82 injured in last night's air raid. The material damage was not great. Four groups of German airplanes attempted to attack London in the course of last night's raid, but most of the machines were driven off. Bombs were dropped in the northeastern and southeastern districts of London and at various places in Kent and Essex. The casualties are believed to be comparatively light.

London, Sept. 30.—A British report announces the capture on Friday of Mush Aldridge, in the region of Baghdad. The British attacked the Turkish main position in the region of Ramadiah, from the south, east and west and continued the attack Saturday, the enemy everywhere surrendering. The captures by the British include guns, ammunition and several thousands of prisoners, including Ahmed Bey and his staff.
London, Oct. 1.—British naval air patrols destroyed two enemy machines and brought down another says an official announcement. A Gotha also was brought down and is believed to have been damaged. All the British machines are safe.

Get Behind the Wheel of a Ford and Drive

TRY it just once! Ask your friend to let you "pilot" his car on an open stretch. You'll like it, and will be surprised how easily the Ford is handled and driven.

If you have never felt the thrill of driving your own car, there is something good in store for you. It is vastly different from just riding—being a passenger. And especially so if you drive a Ford.

Young boys, girls, women and even grandfathers—thousands of them—are driving Ford cars and enjoying it. A Ford stops and starts in traffic with exceptional ease and smoothness, while on country roads and hills its strength and power show to advantage.

Buy a Ford and you will want to be behind "the wheel" constantly.
