CARTER MEDICINE CO., New York. Small Pill. Small Dose. Small Price.

General Trednoke's ranch was very near the borders of these two mighty forces. An hour's easy ride would carry him to a region as barren and apparently as irreclaimable as that through which Childe Roland journeyed in quest of the D.rk Tower; lying, too, in a temperature so fiery that it coagulated the blood in the veins, and stopped the beating of the heart. Underfoot were fine dust, and whitened bones: the air was prismatic and magical, ever conjuring up phantom pictures whose characteristic was that they were at the farthest remove from any possible reality. The azure sky descended and became a lake; the pulsations of the atmosphere translated themselves into the rhythmic lapse of waves; spikes of sage-brush and biades of cactus became sylvan giades, and hamlets cheerful with inhabitants. Only, all was silent; and as you drew near, the seene trembied, altered, and horned toads crawl and hop amid the deadly little sidewinder rattlesmake lies basking in the blaze of sunshine, which it distills into venem. Sometimes the level plain is broken up into savyage ridges and awful canons, along arid bottoms no water streams. As you stagger through their chotic bottoms, you see vast boulders poised overhead, tottoring to a fall; a shiver of earthquake, a breath of hurricane, and they come crashing and splintering in destruction down. Along the sides of these accivities extend long, level lines and furrows marks of where the occan followed years are. But sometimes the hills are but accumulations of desert dust, which shift slowly from place to place under the action of the wind, melting away here to be restrected yonder; mounding themselves, perhaps, above a living and stuggling human being, to move forward, anon, eaving where he was a little heap of withered benes. A feerful place is this broad abyss, where once murmured the waters of a prehistoric sea. Let us return to the cool and fragrant security of the general's ranch.

woolen settees are bolted to the walls; from hooks hang Indian baskets of bright colors; in one corner are stretched raw hides which serve abeds. Small brown children, half naked, trot, clamber, and crawl about. Black haired, swarthy women squat on the blief floor, pursuing their vocations, or, often, doing nothing at all beyond continuing a placid organic existence. Boys and men saunter in and out of the court-yard, chatting or elling in their musical patois; once in a while there is a thud and clatter of hoofs, a rider arriving or departne. It is an entertaining scene, charming in its monotony of small changes and evolutions; you can sit watching it in a half-dozs for twenty years at a stretch, and it may seem only as many minutes, or vice versa.

Mos' of the rooms in the wings are used for the kitchens and other servants' quarters; but one large chamber is devoted to a special purpose of the general's own: it is a museum; the Curiosity-Room, he calls it. It is lighted by two windows opening on opposite sides, one on the court-yard, the other on an orange grove at the south end of the house. Besides being, in itself, a cool and pleasant spot, it is full of interest to any one who cares about the relies and antiquities of an ancient and vanishing race, concerning whom little is or ever will be known. There are two students in it at this moment; though whether they are studying antiquities is another matter. Let us give sar to their discourse and be instructed. "But this was for you to wear, Miss Tred-rocke. Try it. It fits you perfectly, you see. There say he had not a she had a princess, now!"

It think it is better not to try to explain these things," said she, with the unconscious haughtiness which maidens acquire who have not seen the world and are adored by their family. "They are great mysteries—or else nothing." She now removed from mented with gold and with the green feathers of the humming-bird, which her companion had crowned her with, and hung it on its nail in the cabinet. "Perhaps the thoughts came with the cap," she remarked, smi ing slightly. "I don't feel that way any more. I ought not to have speken oit."

"I hope the time will come when you will feel that you may trust me."

"You seem easy to know, Mr. Freeman," she replied, looking at him contemplatively as she spoke, "and yet you are not. There is one of you that thinks, and another that speaks. And you are not the same to my father, or to Professor Meschines, that you are to me."

"What is the use of human beings except to take one out of one's self?"

"But it is not your real self that comes out," said Miriam, after a little pause. She never epoke hurriedly, or until after the coming speech had passed into her face.

Freeman laughed. "Well," he said, "if I'm a hypocrite, I'm one of those who are made and horn. As a boy, I was frank enough. But a good part of my life has been spent with peopie who couldn't be trusted; and perhaps the habit of protecting myself against them has grown upon me. If I could only live here for a while it would be different. Here's an odd-looking thing. What do you call that?"

"We call it the Golden Fleece."

"I'm Golden Fleece! I can imagine a Medea: but where is the Dragon might appear."

"I'remember reading somewhere that the Dragon was less to be feared than Medea's

"If Jason came, the Dragon might appear."
"I remember reading somewhere that the Dragon was less to be feared than Medea's eyes. But this fleece seems to have lost most of its gold. There is only a little gold embroidery."
"It shows where the gold is hidden."
"It's vou that are concealing something now, Miss Trednoke. How came a woolen garment be a talisman?"
"The secret might be woven into it, perhaps," replied Miriam, passing her fingor caressingly over the soft tunic. "Then when the right person puts it on, it would—
But you don't believe in these things,"
"I don't know; you don't give me a chance. But who is the right person? The thing seems rather small. I'm sure I couldn't get it on."
"It can fit only the one it was made for," said Miriam, gravely. "And if you wanted to find the gold, you would trust to your science, rather than to this."
"Well, go'd-hunting is not in my line, at present. Every nugget has been paid for more than once, before it to found. Besides there is something better than goldin Southern California—something worth any labor to get."
"What is it?" asked Miriam, turning her

irritation, he heard the voice of that young lady, mingled with others, approaching along the verands. At the spreaching along the verands. At the spreaching along the verands. At the whim of fortune which had made himself and that sprightly young lady fellow-passengers from Panama, and at the idle impulse which had prompted him to flirt with her.

But the past was beyond remedly: it was his concern to deal with the present. In a few seconds, Grace entered the curiosity-room, followed by Professor Meschines, and by a dashing young Mexican senor, whom Freeman had met the previous evening, and who was called Don Miguel de Mendoza. The senor, to judge from his manner, had already fallen violently in love with Grace, and was almost dislocating his organs of speech in the effort to pay her romantic compriments in English. Freeman observed this with unalloyed satisfaction. But the look which Grace bent upon him and Miriam, on entering, and the ominous change which passed over her mobile countenance, went far to counteract this agreeable impression.

One story is good until another is told. Freeman had really thought Grace a fascinating girl, until he s. w Miriam. There was no harm in that: the trouble was, he had allowed Grace to perceive his admiration. He had already remarked that she was a creature of violent extremes, tempered, but not improved, by a thin polish of subtlety. She was now about to give an illustration of the passion of jealousy. But it was no her jealousy that Freeman minded: it was the prospect of Miriam's scorn when she should surmise that he had given Grace cause to be jealous. Miriam was not the sort of character to enter into a competition with any other woman about a lover. He would loss her before he had achance to try to win her.
