British Premier Howled Down by the Militant Ones When He Attempts to Deliver a Speech on Settlement Work in the City Temple.

London, Nov. 29. — Suffragettes, in pursuance of the policy of militant tactics, recently revived, invaded the City Temple tonight and by noisy interruptions prevented Premier Asquith from delivering a speech on Settlement Work. The Premier, after repeated efforts to get a hearing, lett the church in disgust.

Hon. W. L. M. King Was Given a Most Enthusiastic Hearing When He Spoke to the Employees, of the Factories at Hanover.

[Special to The Advertiser.]

Hanover, Nov. 20.—Telford's Hall was well filled last evening when Hon. W. L. Mackenzie King and Wm. Calder, of Durham, the candidate for South Grey, spoke. The audience was made up almost entirely of workmen from Hanover factories, and Hon. Mackenzie King was repeatedly cheered as he touched on important labor matters. He made a strong arraignment of the evasive policy which has marked Sir James Whitney in relation to questions affecting workingmen.

Dr. Jamieson, of Durham, was scored for his inactivity during all the years dred whether anyone could point to one single thing he has done as a public man in the interests of his constituency or his province. Sir Richard Scott declared that i

ninion passed the duty of caring for public heaith on to the provinces, and the provinces passed it back to the Domninon. It was clearly time that laws were made and precautions taken. The census figures showed that \$1,000 persons were born in Canada in the year 1901. With the air, sunshine and water, Canada anould be the healthlest country in the world, and yet of these \$1,000 persons, 21,823, or more than a quarter of them, died before becoming a year old, and 10,019 cided within the next four years, making 31,347, or over three-eighths, who died within the first five years after birth.

The record was a shocking one, but the census figures showed that while \$1,000 persons had been born in that year, there had in the previous 25 years been 43,595 deaths of persons who did not reach the age of 25. Three score and ten was the allotted span of man, and it was a tragic thire to think that over half the people born in a single year in Canada should die before they had passed the 25th year. Conditions should be improved by law so that life would be lengthened. Most of the children who died under the age of 3 years were murdered through the ignorant administration of deadly soothing syrups, which were freely sold by every drug store in the country.

Hanging Exploded.

[Special to The Advertiser.]

Wyoming, Nov. 29.—The big barn of Wilfrid Chalmers, on the second line of Plympton Township, was completely destroyed by fire today. The fire is supposed to have been caused by an exploding lantern, as Mr. Chalmers had hung a lantern up in the barn when going to another part of the building. Returning in a few minutes he found the lantern surrounded by a great mass of flames. The barn was insured for \$390 in the London Mutual, and the contents in the same company for \$600. Nothing was saved except the live stock.

OF EARLY DEATHS FOR FRIENDS FAR AWAY Christmas Gifts Must Be Ready Right Now

Transportation to foreign countries cannot be depended upon to the day during the winter season, and more particularly at Christmas time, when express and mails are so congested—delays are unavoidable—past experience has taught us this. This week's foreign mails are the last calls for sure Christmas delivery to many foreign ports, and the last call, too, for the far north, and the thousand and one friends at the end of the earth will be happier to receive some little remembrance from you than all the kinspeople who are gathered around you. It means so much more to them. No man who has never stood at the door of some hut at the "jumping-off" place of the world can appreciate what it means to be remembered.

Then, too, we are able to say today that our Christmas stocks are at their flood tide-more duplicates may come later, but few more new things. Furniture, than which there is nothing more givable, makes a delightful picture here on our floors and should be chosen now. Indeed, when we say that we shall hold these heavy Christmas pieces for you and deliver them later to your order, it eliminates every reason in the world for crowding your holiday work into the last few days of hurried, almost breathless rushing about. Canadians are called a "deliberate people." Why not let us be "deliberate" now in our Christmas giving, and begin today?

and refused to say more until he had opportunity of consulting the men on whose support he must rely in carrying the Liberal policy into effect. "But we will consider this question," he said, "as soon as we have the opportunity, and when you come to vote upon our policy you will have it clearly stated. The Government of Sir James Whitney has done nothing for the advance of the cause of temperance. My friend knows how he treated the last temperance deputation. Like Gallio of old he drove them from the judgment seat. I am sure that the policy we will present will commend itself to you, as in the interests of the whole people, and temperance reform."
