Radio Programs

TUESDAY, MAY 1.

WGY—380 Metres—Schenectady.
11:30 a.m.—Stock market quotations.
11:45 a.m.—Weather report, on 485 metres.
11:55 a.m.—U. S. Naval Observatory time signals.
1:00 p.m.—Music and address, "Furnishing the Summer Porch."
5:00 p.m.—Produce and stock market quotations; news bulletin; baseball results.
7:40 p.m.—Address, "New York's Fresh Water Fisheries," by Justin T. Mahoney, New York superintendent of inland fisheries.
7:45 p.m.—Musical program.

KDKA—380 Metres—Pittsburg.
10:00 a.m.—Music.
12:30 p.m.—Music; weather forecast.
3:15 p.m.—Scores of the baseball games being played today, by innings.
6:00 p.m.—Results of the baseball games played today.
6:05 p.m.—Organ recital.
7:00 p.m.—Results of the baseball games played today.
7:05 p.m.—"Monthly Review of Business Conditions," by Clark Hammond of the Columbia National Bank, Pittsburg.
7:15 p.m.—"Birds," by George M. Sutton of the Carnegie Museum, Pittsburg.
7:30 p.m.—A May Festival for the Little Folks.
8:00 p.m.—National Stockman and farmer market reports.
8:15 p.m.—Concert by the Pittsburg Musical Institute.

CFCA—400 Metres—Toronto Star.
12:00 noon—Weather forecasts; opening stock markets.
2:30 to 3:30 p.m.—Grain, produce and dairy markets; news items; music.
5:30 to 6:00 p.m.—Closing stock markets; late news.
8 p.m. to 9 p.m.—Concert program.

WJZ—360 Metres—Newark.
9:00 a.m.—Early morning reports and prices on farm products.
11:55 a.m.—Standard time signals and weather forecast.
12:00 noon—Opening prices on active bonds and stocks; musical program.
4:00 p.m.—Closing prices on stocks and bonds.
4:05 p.m.—"Fashions," from the Women's Wear daily newspaper.
5:30 p.m.—"The Music Lover," a weekly digest of musical happenings.
7:00 p.m.—Adventure stories for boys and girls from famous Celtic myths.
7:30 p.m.—"Boys' Loyalty Day Message," "What I Saw This Afternoon," by Raymond J. Knoepfel, past president of Rotary Club of New York.
7:45 p.m.—Concert by Walter Ehrman, tenor, of Englewood, N. J.
8:00 p.m.—"Home Making—A Business," by Ada Bessie Swann, supervisor home economics department, Public Service Electric Company, Newark, N. J.
8:15 p.m.—Continuation of program of Walter Ehrman, tenor.
9:00 p.m.—Concert under the direction of Charles D. Isaacson of the New York Evening Mail.
9:55 to 10:00 p.m.—Arlington time signals; weather forecast.

KYW—400 Metres—Chicago.

8:00 p.m.—Concert by Jack Williams, baritone; Pauline Settle, accompanist, and WBZ Orchestra.
9:00 p.m.—Baseball scores in the

Above is shown the large class of the Y. W. C. A. which will give a gymnastic demonstration Friday night in the Armories. From left to right, in the top row—V. Jacobs, E. James, M. Scott, A. Stoneman, E. Spry, Mrs. Rennie, Miss Edythe Wynn-Price (director), Bessie Hardie, M. Springett, A. McKee, L. Baskett, C. McLennen, L. Andrews,

MINUET DE LA REINE.

The upper group in this photograph shows the dancers in costume for "Minuet de la Reine," one of the most charming numbers in the physical culture class demonstration at the Armories Friday night. From left to right, in the first row—B. Skith, A. Margolis, A. Kent, E. Grand, A. Golby, D. Santo, P. Wingett, B. Day, E. Gibberd, F. Kirk, R. Forsyth. In the second row—A. Lyman, L. Garbutt, D. Waller, M. Santo, K. Winnett, G. Day, E. James, V. Jacobs. In the third row—G. Dean, M. Garbutt, G. Willmot, I. McKibben, M. Hart, C. Sothers, E. Stone, G. Gibberd, G. Holland, E. Williams. In the bottom row—E. Wolfe, C. Moote, M. Keenleyside, I. Duncan, G. Auden, P. Ashworth, N. Springett, A. Alderson, J. Mee, N. Boardman.

The lower group shows the quaintly costumed dancers who will give "Toujours," the opening number of the ballet, "La France Qui Dansait." From left to right, in the first row—Marion Davies, Gwynedde Auden, Bessie Hardy, Dorothy Anderson, Dorothy Coleridge, Marjorie Cuthbert, Louise Wolfe, Dorothy Buglar, Pearl Ashworth, Gertrude Day, Kathleen Howie. In the second row—Marion Baker, Hazel Aitken, Dorothy Reid, Beverly Westland, Jean Buchanan, Rita Willmot, Theina Wrighton, Marion Reed, Hilda Grant, Florence Foote, Audrey Sperin. In the bottom row—Dorothy Anderson, Mona McTavish, Minnie Gillette, Jean Watt, Katherine Medford, Pearl White, Dorothy Hockney, Dorothy Hart, Virginia Dyer, Claire Jones, Mrs. Milner.

THE "GAVOTTE PASTORALE."

Here are shown the performers in the "Gavotte Pastorale" of the French ballet, which is to feature the program at Friday night's demonstration in the Armories. From left to right, in the first row—Mrs. Rennie, Dorothy Buglar, May Stone, Bessie Hardy, Andree Smith, Mrs. Milner.

Eastern, National and American Leagues.
10:00 p.m.—Time signals.
VWJ—400 Metres—Detroit.
9:30 a.m.—"Tonight's Diner," a special talk by the woman's editor.
10:25 a.m.—Weather, 485 metres.
11:55 a.m.—Time.
12:05 p.m.—Music.
3:00 p.m.—The Detroit News Orchestra.
3:30 p.m.—Weather, 485 metres.
3:40 p.m.—Markets.
5:00 p.m.—Markets and baseball scores.
7:00 p.m.—The Town Crier; the Detroit News Orchestra.

REV. WORKMAN, WATFORD, ADDRESSES READING CLUB
Special to The Advertiser.
Watford, April 30.—At the regular meeting of the local Reading Club Friday Rev. H. V. Workman of the Presbyterian church gave an interesting and instructive lecture, "Facts of Interest About the New Testament." The meeting was held in the Public Library building and was well attended.
The Reading Club is expecting to have Dr. Hill of the Institute of Public Health, London, deliver an address to them in the near future.

WROXETER WOMEN'S CLUB HOLDS MONTHLY MEETING
Special to The Advertiser.
Wroxeter, April 30.—The regular monthly meeting of the Women's Institute was held at Mrs. Pope's residence Thursday last. An excellent dinner was served. An excellent report on "What Our Door Life Will Do For a Woman" was given by the president, Miss E. McEwen. This was followed by an interesting report of the recent library convention in Toronto by the librarian, Miss E. J. Horne. "Current Events" were in charge of Mrs. J. N. Allan, and the roll call was responded to by house cleaning hints.

Your Backyard Garden

How To Fight Insects Which Attack From the Air.

The insects which attack the garden are roughly divided into two classes, those that spend the greater part of the life cycle in the nymph and larval stages in the ground, and those that attack from the air. As mentioned in the last note, these can be controlled sufficiently by a general treatment of the soil with either commercial preparations or gas-lime and should give no serious trouble when so handled.

The insects which attack the garden as flying pests or from above ground are not so easily handled, and it is distinctly worth while to consider these at some length and discuss ways and means of combating them, since they cannot be destroyed by a general treatment as can those that live right in the soil.

Before discussing these, the following brief notes are offered as a help in reducing the possibility of attack, by preventive measures. All, or nearly all of the insects which we find troublesome are carried over from one season to another, either in the egg stage or in a dormant state as a cocoon or else as a complete adult. In some form or other the insect remains hidden in the old grasses, vines, canes and leaves of the last season, and if these are gathered or raked up carefully in the late fall and burned a great deal of the difficulty of controlling them is done away with.

This, however, is not a cure, but a help and regardless of how carefully it is done there will be plenty of new arrivals each season to worry the gardener, and it is necessary to know how to deal with them as soon as they make their appearance. One of the most common arrivals each year is the potato bug or Colorado potato beetle. There are several ways of handling this insect, some of which are shaking the adult bugs on the ground and treading on them, shaking them off into a small can of coal oil and spraying the potato plants with either paris green and flour or arsenate of lead and flour. These are both first-rate poisons, but differ slightly. The arsenate of lead will adhere to the plants much longer than the paris

green, but is not so quick in its action. A splendid plan is to mix the green and the arsenate of lead half in half, and mix this with an equal amount of flour or better still powdered slaked lime. This seems to give the good points of each poison, and will stick to the plants till after all danger of potato bugs is passed as a rule. It is a mistake to delay spraying, as most insects, especially those with biting mouth-parts, do most of their damage while in the larval stages, and are at that time unprotected by a hard, leathery shell or casing.

Another troublesome insect is the cabbage butterfly. The butterfly itself is a fully-grown adult, and does little direct damage. The part that it plays in spoiling the cabbage crop is the laying of eggs in the leaves of the half-grown cabbage, which hatch into very hungry green worms or larvae, which will quickly destroy the head of cabbage or cauliflower, as the case may be. There are two ways of putting an end to this nuisance, one by covering the plants with musquito netting to prevent the adult from laying her eggs, or by making conditions impossible for the larvae or worm. The first method speaks for itself, and where the number of plants is not large it is possibly the best, and certainly the simplest way out of this difficulty. If you intend to fight the worm stage of this insect it can be done either by using an irritant, such as wood ash or road dust. When swallowed in its voracious feeding habit, it will kill the worms, and some go so far as to say that it causes starvation as the worm refuses to move about and feed while it has to travel over this dust. If you intend to poison actually, by use either of heliothrips or pyrethrum powder, and dust this into the head and leaves of the cabbage. These two are mild poisons that lose their power on exposure to the air, and by the time the crop is ready for use do not present the slightest danger to those using the cabbage. If you think of using arsenic poisons as you would for potatoes, simply "don't do it." It is the leaf of the cabbage that we eat, while in the potato it is the tuber or root, and arsenic poisons are too dangerous to take chances with.

Heliothrips is at its best when freshly prepared, and you must insist on its being freshly prepared when you buy it from your chemist. It is applied by dusting it lightly into the cabbage heads when the worm is first noticed. The combatting of garden insects and pests will be discussed further in tomorrow's notes.
