It is rather rich to learn that Varsity students are going on strike. Who is it they are going to hit? Let them reflect on this for a moment. Our advice to the college authorities is to let them go on strike by all means, and let them keep on striking till they get sick of it.

If the University needs overhauling the people of Ontario will overhaul it is adue time. They, we imagine, have as much of machines, and claims that for amount of money he can supply double the number of machines that have been recommended by the committee. Mr. Ronald expresses his willingness to submit his engines to any committee, from any city to rillage in the Dominion where his engines are in use. On their record he learns that have been recommended by the committee. Mr. Ronald created a debt of \$3,000,000,000. The true value of the assets in 1860, including 4,000,000 slaves, was \$16,000,000,000. When we ceased to deal in human chattels and began our new career in 1865, it is doubtful if the value of our assets exceeded \$12,000,000. When we have neithed the honorable and manly part. He is not a sincere or insincere rainbow chaser, but a wise, candid and sound counselor. When the civil war closed in 1865, the republic had created a debt of \$3,000,000,000. The true value of the assets in 1860, including 4,000,000 slaves, was \$16,000,000,000. When we ceased to deal in human chattels and began our new career in 1865, it is doubtful if the value of our assets exceeded \$12,000,000,000. Since that time we have near the part of the content of the conte people of Ontario will overhaul It in due tification, that Canadian industries time. They, we imagine, have as much should be patronized ahead of any other to say about the University as the students. These young men are sent to and cheaper are produced here.

Dale has already met with his deserts, Mr. Hellems, who admitted when taxed with it on Friday, to having incited the students to oppose the faculty, should judicial district of Nipissing, pro temnot be allowed to resign, as he desired. He should be dismissed; he should be dismissed before noon to-day. What would happen if the Canadian market for manufacturif the Canadian market for manufactur-ed goods were thrown open on the broad and glorious lines of British free trade? The answer is a simple one. The hundreds of millions of dollars at present invested in our home industries would soon be compelled to seek new fields of employment at fabulous sacrifices. The busy hum of the manufacturing life of the nation would by rapid degrees flag and ultimately almost wholly cease. And why? Because we have experienced a similar process before, only on a much smaller scale. It is too well known that extent, the Americans would at once monopolize the home trade, because our manufacturers could never compete with the surplus goods that would be flung on this market by United States manufacturers, more for the sake of realizing cash than doing business at a profit. The immense manufacturing concerns of the United States catering for the wants of 70,000,000 of its own people besides

the United States catering for the wants of 70,000,000 of its own people, besides probably 20,000,000 foreigners, could easily annihilate the manufacturing interests of Canada by placing their surplus stocks on this market at prices which our own manufacturers could not compete with. Then, the destruction of Canadian industries once accomplished, our neighbors would be in a much better position to regulate prices. The Trade Bulletin therefore takes this opportunity of saying to the Liberal party:

"If you are victorious at the next general elections, look before you leap from our present modified protective policy, and the trade methods which have grown a up therewith, on to the broad lines of British free trade, remembering that the constant of the produces consumption.
