

Face scarcely convex, luteous ; above, a pitchy-black band separating the antennæ ; this band sends a median acute prolongation from the anterior border toward the clypeus ; furrow, between face and inner orbit of the eye, fuscous. Circumocular area luteous, except along the depressed portion of the vertex. Clypeus subhexagonal, luteous, on each side anteriorly an impressed dot. Labrum transverse, rounded laterally and narrowed anteriorly, emarginate in front, luteous, a few hairs on emargination. Mandibles piceous.

Maxillary palpi luteous ; first two joints short, about as broad as long, subequal in length, the first somewhat stouter than the second ; third joint somewhat longer than the first and second together, a very little curved, enlarged at apex ; fourth joint straight, a little shorter than third ; apical joint a little longer than third, rufo-piceous (except at articulation, where it is luteous) ; truncate and notched at tip.

Labial palpi somewhat longer than maxillary, luteous ; first joint short, not quite twice as long as broad, enlarged apically ; second joint about three times as long as first, somewhat curved, strongly widened and thickened apically, sparsely clothed with dark hairs ; on inner side at apex a perceptible concavity ; apical joint about same length as second, swollen, fusiform, luteous, clothed with dark hairs ; on the outer side, surrounding the ocellus-like spot, rufo-piceous ; apex narrowed, tinged with rufous ; tip truncate, slightly notched.

Maxillary palpigers luteous, clouded with darker. Maxillæ luteous, tinged with rufous. Labium, labial palpigers, mentum and gula, luteous ; each side, next anterior portion of maxillary palpigers, a brownish area with some dark hairs.

Antennæ clavate, shorter than head and thorax ; luteous, darker apically ; clothed with very short dark bristles or hairs ; first and second antennal joints luteous, shining, a piceous spot or two at their bases. Between the antennæ posteriorly, a narrow, transverse luteous band.

Vertex elevated behind, rounded, luteous ; in front, just behind antennæ, a transverse, pitchy-black band ; in front, on elevated portion, a transverse, shining-yellow ridge ; behind this, four black dots in a transverse row.

Pronotum as broad as long at base, somewhat narrowed anteriorly, luteous ; anterior angles rounded, front margin truncate ; a longitudinal dark fuscous stripe each side near middle line ; on the outer side of each of these stripes another irregular dark fuscous stripe extending forward to
