PREMIUMS! HOLY LAND OIL.

The True Witness For 1879. PRIZES FOR EVERYBODY

The TRUE WITNESS is the weekly edition of the EVENING POST. It is now in its twenty-eighth year, and has been recently enlarged and reduced in price from \$2.00 to \$1.50 a year. Being the leading Catholic paper in the Dominion, it will maintain a vigilant and defensive attitude in regard to the rights of the Catholic Church, and will be a paper essentially for the Catholics of the Dominion at large. It is our intention not to spare expense in making it a first-class paper, and particularly interesting to the farmer.

There is not a Man, Woman or Child anywhere in the Country who reads this, who does not care to have it. It is a paper for him or her in taking the Paper and thus secure, FREE, one, or more than one, of the desirable articles described below.

There are from 100 families, or more, in the vicinity of each Post Office, every one of whom would be benefited by having this paper for a year at a cost, postage included, of 50 cents. From like a silver-plated spoon, the small or large, may be gathered in the vicinity of each Post Office, and as many premiums be obtained. You may get one or more of them.

A GENERAL PREMIUM. A FREE COPY to the sender of a Club of 5 subscribers, at \$1 each, without other Premiums.

A PRIZE FOR EVERY SUBSCRIBER. Every subscriber whose name is sent in by those working for premiums or otherwise, will have the choice of the following:

1st - A NICKEL-SILVER TEASPOON, beautifully finished. Nickel silver is a white metal like silver, and being solid cannot wear down to brass like a silver-plated spoon. They are easier to keep bright than silver, and the six would sell in any retail store for 50 cents.

2nd - A BEAUTIFUL ILLUMINATED CHROMO MOTO WITH PORTRAIT OF Pius IX. OR LEO XIII. A written description cannot give the effect of the chromo, but it is a masterpiece of art. In their centre is a well executed and life-like portrait of Pius IX. or Leo XIII, surrounded by a wreath of lilies, and encircled by the motto in Latin and English. The size of the mottoes are 2 1/2 inches, and are worth 50 cents each. Any subscriber wanting both of them can have the extra motto by forwarding 25 cents extra, above the subscription price, this simply pays cost of importing, postage, &c. We will send them neatly framed in rustic for 50 cents extra, or in veneer, engraved corners, 75 cents; subscriber paying expressage.

The above prizes will be given only to such of our present readers as will have their subscription paid for the year 1879.

SHOW THE PREMIUMS to those whom you wish to get as subscribers, and they will subscribe for you.

We will send a canvasser's outfit complete for 75 cents.

EXPLANATORY NOTES. Read and Carefully Note the Following Items: The subjoined table shows the name and cash price of the article, and gives the number of names sent in at the regular cash price of \$1.50 a year that will secure any Premium article.

All subscribers sent by one person count, though from several different Post Offices. 2nd. But tell us with each name or list of names sent, that it is for a Premium. Send the names as fast as obtained, that the subscribers may begin to receive the paper at once. Any one can have any time desired, up to next June, to complete a list, by every Premium desired will be sent as soon as earned and ordered. 4th. Send the exact money with each list of names, so that there may be no confusion or delay in the receipt of the paper. Send at least \$1.50 to be sent for one year's subscription. 5th. Old and new subscribers all count in Premium clubs, but a portion of the list should be new names. It is particularly desirable that we offer Premiums to canvassers. 7th. One or two Specimen numbers, etc., will be supplied free, as needed by canvassers, and should be used carefully and economically, and where they will tell.

TABLE OF PREMIUMS. For subscribers to the TRUE WITNESS. Open to all. No competition.

Table with 3 columns: NAME OF PREMIUM ARTICLES, Price, No. of Subscribers with this.

1 - Improved Corn Shelter, \$5.00 10

2 - Signal Service Barometer, 2.00 6

3 - Pocket Watch, 10.00 40

4 - Challenge Printing Press and Outfit, 3.50 14

5 - Lany Combination Penholder, 0.25 1

6 - Wanner Sewing Machine, 60.00 100

OUR CHARITIES. A Visit to the Female Deaf and Dumb Institution, St. Denis Street - A Novel and Interesting Sight.

ONE OF THE LARGEST INSTITUTIONS of the kind on the continent, and has connected with it a cooperage, blacksmith shop, carpenter shop, boiler making and repairing shop and other necessary branches of industry. The manager is Mr. George A. Drummond, a man of great business capacity and ability, assisted by Mr. Peter Redpath, also a pushing, energetic young man, thoroughly acquainted with the business. Those gentlemen are the proprietors, the original founder, father of the last-named, and father-in-law of Mr. Drummond, having died a few years ago. Mr. Drummond it was, by the way, who pushed the late Honorable John so hard in the election contest of 1874 for Montreal West. The Redpath Sugar Refinery is now in

THE TWENTY-FIFTH YEAR OF ITS EXISTENCE, if we include the interregnum of three years during which operations were suspended. Through the courtesy of Mr. Drummond a Post reporter was permitted to go through the buildings yesterday, conducted by Mr. Redpath, who explained the workings of the establishment, the uses of the machinery and other matters which might be of interest to the general public. The first thing that struck him on ascending was the vastness and range of the system of machinery required to carry on the business. On all sides were furnaces, boilers, condut pipes, feeders, engines, air pumps, charcoal refiners and other requisite machinery, which would take more than a day to give every meagre outline of

THE ASYLUM is under the patronage of the Sisters of Providence and was founded in this city in 1853 by Sister Mary Bonsecours, the institution being at that time situated in Mignonne Street, adjoining where the Reformatory School now stands. Finding the building too small to accommodate its growing requirements the lot where the present structure stands was negotiated for in 1864 and a commodious building erected, which was, however,

DESTROYED BY FIRE on the evening of its completion. Nothing discouraged by this visitation of Providence, the Sisters again set to work, and after years, at last their labors were rewarded in the possession of the fine institution they at present occupy. The building is a spacious stone structure, built in the form of a T, and housing over one hundred and sixty deaf mutes, together with a number of lady boarders, who have no doubt selected this convent for its superior healthful and picturesque surroundings. Having made mention of the external advantages of the Institution, we will now take

A REVIEW OF THE INTERIOR. The first impression which strikes the visitor is the neatness and order which is everywhere displayed. After an introductory conversation with Sister Mary Victor, the Superioress, and another lady of the Order, our reporter was, at their kind invitation, shown through the institution. After passing the boarders' wing we proceeded up-stairs to a long room, where some sixty of the inmates, whose ages were between fifteen and twenty, were actively employed doing all manner of work, including dressmaking, the execution of which

SHOWED CONSIDERABLE SKILL, especially the embroidered work and crocheted edgings, which were hand wrought and of handsome pattern. The Sister here explained that girls here assembled received instruction every day the same as the junior inmates, after which a share of their time was employed as mentioned. In reply to a question as to whether their industries were liberally patronized, the Sister replied that the Directoress being often changed, owing to death and other causes, that their former patrons had in a great measure fallen off. As in many instances they were strangers to each other, she said, however, that by constant and unceasing exertions, and God's assistance, that

THEY WANTED FOR NOTHING. Before leaving the room the Sister gave a practical illustration of the fact that by ingenuity and patience even a deaf mute may be taught to hold a conversation as well as the more fortunate portions of humanity; for instance, the Sister on making a few signs to a mute, was answered by her repeating the sentence "you are welcome," perfectly distinct. Leaving the room the next object of attraction was an apartment where the senior members of the Asylum were busily engaged at all manner of employment, some making shoes, others weaving cloths, carpets of handsome pattern and durable texture, grass linen and other fabrics; then there were others carding wool, more spinning it into yarn which was speedily transferred into hose. We next proceeded to

THE SCHOOL ROOM, when a number of bright, cleanly looking children were assembled, who went through a variety of exercises in a manner which reflected great credit on their teachers. The Sister explained that the want of expression which those poor children lacked caused it to be a matter of great difficulty and labor, to impress lasting ideas on their minds, as the name of each object must be explained to them. After the teacher had thought a favorable impression had been made in the child's mind, (the result of patient teaching), her hopes would be dissipated by the pupil next morning expressing ignorance of the previous day's lesson, thus showing the amount of patience required for the mission. Next in order were

THE DORMITORIES, which looked as neat as needles in a case, each apartment being provided with an improved contrivance for the comfort of the inmates when making their toilet. The sanitary features of these apartments were noticeable, being ventilated by numerous windows on each side of the building, admitting both light and fresh air. Altogether, the institution is

AS COMPLETE IN EVERY RESPECT as it were possible to be, the benefits derived being manifold. Regarding situation, scenery and healthful position, the site is unrivalled, which, together with the kind and more than motherly attention bestowed on those unfortunates, both in a physical and moral point of view, forms a result that it would be found hard to excel. The sequel is apparent; every face wears a happy and contented expression. There is here no sullen or downcast looks, the slightest wish of the Sisters being implicitly obeyed in an eager manner, which shows that their natures have been worked upon by arbitrary measures, but by the rule of love.

In conclusion, we would say that this asylum, like all the undertakings of this noble organization (the Sisters of Providence), is characterized by the completeness of its arrangements, and is like others of its kind - a boon to suffering humanity.

THE CANADA SUGAR REFINERY. A "Post" Reporter's Visit to the Establishment and What he Saw There - An Immense Industry - How Sugar is Refined &c.

The above named establishment, commonly called "Redpath's Sugar Refinery," commenced operations once more on Monday, after it had been closed for three years. Politically speaking, its fortune fell with the rise of the Mackenzie party to power, and rose again with its collapse on the 17th of September last, though, of course, it was only after the re-adjustment of the tariff last month that the proprietors saw any hopes of conducting the business successfully, and with profit to themselves.

THE REFINERY is not yet in full swing, having only one-half the usual number of men employed, these being mostly old hands, who were the first to be taken on. It is expected, however, that in a month or so fully six hundred men and boys will, one way or another, be enabled to earn a living for themselves, and their families on the premises. It is not to mention the number of men employed, but to mention the fact that the building, connected with it, which are situated on both sides of St. Denis Street, are the largest and most modern in the city.

THE COST OF MACHINERY. It may be stated that two boilers of the fourth flat cost the handsome sum of \$24,000. It would take a professional at the business and more space than the Post can afford, in order to do justice to this fine establishment, and to describe things as they ought to be described, but for a run through in very busy times the account will give a faint idea of the celebrated Canadian Sugar Refinery, spoken of in Canada so much at present, and from which so much is hoped by those desiring the prosperity of Montreal.

By order of the Italian Ministry of Agriculture, the following plants are to be thickly planted in spots throughout the Campagna, in order to give the sanitary properties of the foliage a trial.

placed upon carriages, which are drawn under the door. In the bottom of each mould is an orifice, which is kept closed for several hours by a stopper until the sugar crystallizes, when it is removed and the syrup allowed to drop away. The loaf is afterwards dried in an oven, and a colorless solution of sugar made to pass through it, giving it the beautiful white coloring we see when it is finished. As an instance of

which there is also twenty-four, where it is heated with close copper coils to about a temperature of 210 degrees Fahrenheit. From these pans the syrup passes down to the next flat into filters which deprive it of all suspended solid particles that may have escaped the pumping up process. The filters consist of a number of long bags, about six inches in diameter, made of two thicknesses of closely twilled cloth, an outer of coarse, and an inner one of finer material, which are enclosed in sets to prevent cooling. After awhile, when they become foul, they are turned upside down and thoroughly cleaned. After leaving those bag filters, keeping a gradually decreasing temperature all the time, the solution is this time run through

FILTERS OF ANIMAL CHARCOAL, or bone black, of very fine quality. This charcoal is prepared by the firm and may be seen in a flat below lying in large heaps and kept perfectly clean, if one might use such an expression in speaking of charcoal powder. The filters are immense cylinders, from 6 to 8 feet in diameter and about 24 feet in height, and are filled with pulverized bone black. This substance has the power of absorbing the coloring matter in the syrup, which now runs from the bags a beautiful sherry color. After having been some time in use the charcoal becomes foul and loses its absorbing properties, when it is taken to the kilns below, reburned and rendered fit for use once more.

THE SYRUP, after undergoing the last mentioned process, has a temperature of 150, and is almost in a perfectly colorless condition, so much so indeed that our reporter when shown a specimen of the liquid in a small glass thought it was either a very light wine or pure water a little ruffled by shaking. In this state it is pumped into vacuum pans, which are larger conical shaped vessels, heated by steam, and exhausted through the means of air pumps, by which the vapor is rapidly and completely removed. In these vessels the liquor is concentrated to the granulating or crystallizing point, the temperature is about 140, this being the lowest at which granulating sugar boils at a pressure of three inches of mercury. When arrived at this stage, the sugar is run off, and the syrup is discharged by means of what are termed

CENTRIFUGAL MILLS. An ingenious method of emptying the sugar into the receptacles ready to receive it is in operation in the Refinery by which wagons are run on slides along the ceiling, something like an inverted railroad truck only that the rails are circular, and emptied without the wasting of unnecessary force. The proprietors have not yet commenced making hard or loaf sugar but the large number of conical moulds standing ready testify that they will soon begin. The process is the same only that the soft sugar, instead of being placed in its proper receiver, is put in a vat which has a door at its bottom whence it runs into the

CONICAL MOULDS

placed upon carriages, which are drawn under the door. In the bottom of each mould is an orifice, which is kept closed for several hours by a stopper until the sugar crystallizes, when it is removed and the syrup allowed to drop away. The loaf is afterwards dried in an oven, and a colorless solution of sugar made to pass through it, giving it the beautiful white coloring we see when it is finished. As an instance of
